Four Leading Varieties

We have millions of fruit trees that must be sold. To dispose of this tremendous surplus of guaranteed perfect Fruit Trees, we are offering them at Less than Wholesale Prices—barely enough to pay the cost of digging and packing. They are trees that usually sell at \$1.00 to \$1.50 each.

You have never been offered such a Bargain in Fruit Trees before. I defy anyone to meet this price with the same quality of trees. I guarantee every tree to be state inspected, uniformly 4 to 6 feet tall, two years old; hardy, well branched root system and in prime condition.

FOUR LEADING VARIETIES 25 of Each—100 Trees In All

DELICIOUS—The most popular apple of all time. A big, beautifully shaped, red apple; tempting flavor; alluring aroma. A popular home and market apple; a prolific cropper and money-making leader.

STAYMAN WINESAP—The best of all the Winesap family. One of the best known, best liked and most profitable of all apples. Enormous fruits, beautiful bright red, crisp, juicy, finest flavor. Unlimited market for the fruit.

GRIMES GOLDEN—The best of all yellow apples. Distinctly flavored. Finest of eating apples; excellent cooker. A favorite for home or market; always commands top price.

ARKANSAS (Mammoth Black Twig)—Another home and market favorite. Large, dark red, crisp, delicious apple for winter use. Strong growing, heavy fruiting tree. Does well anywhere.

BIG MONEY IN APPLES

We send you 25 big, two-year-old trees of each of these four grand varieties, 100 trees in all, for only \$15, express collect.

Nothing will yield a larger profit on your investment than this offer. You take no chances, run no risk. We guarantee to satisfy you with these trees or refund your money.

Orders are bound to pour in for these trees. While our supply of trees is large, they will be bought up quickly. When our supply is gone, we cannot furnish more at this below-cost figure. Avoid being disappointed. Order today.

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

I Tell You!

THAT you are missing the opportunity of your life if you have never enjoyed the good feeling—the exhilaration—of knowing that when you do your planting you have done everything possible to assure a good crop.

When you have worked hard to put the soil in shape and have bought the best seeds and trees to plant and planted them carefully, you have done everything that human power can do.

Here we are again around to a new planting season!

Just a few nice sunny days, with the birds singing merrily in the tree tops and every one will be filled with that desire to get out and dig in the garden, scratch in the fresh, crumbly soil and plant something—seeds, trees, shrubs, flowers.

About this time of year I always get that tickling, itching, dirt-digging feeling that always comes at spring time. Words can't describe what the feeling is, where it is or where it comes from. But it comes, just the same!

When I was a boy, my father told me it was the spring fever.

But, whatever it is, everyone who loves plants, and likes to see things grow, knows just what I mean.

And what a satisfaction it is, when you do plant seeds, trees, or what-not,

to know when you are planting them, that they are going to produce. You want to know that all the time, labor and money that you put into the preparation of your garden, field or orchard is sure to produce the biggest possible profit for you. That's only good judgment.

But no matter how much work and time you put on the preparation of your ground, unless you have good seeds and trees, your time, labor and money is all wasted—thrown away!

Many, many times I have seen great fields planted, where the returns did not pay for the labor of planting—because the seeds were no good to start with. I have seen orchards turn off most disappointing crops, just because "cheap" trees had been planted.

Poorly rooted, poorly grown trees are not worth planting. It takes just as much time to plant a poorly rooted, crooked, stunted, "cheap" tree as it does one that is absolutely first class all the way through. It takes just as much time, work and worry to bring a cheap tree into bearing as it does a good one. And what a difference in the results when the bearing time comes around!

Good tree can be sold at a low price.

And that is just what I am doing—selling good trees for little money!

I was raised on my father's farm, just a few miles from where my thousand acre nursery is now located. My father taught me how to bud and graft trees, select seeds, and how to grow fruit trees for orchard planting.

When I was just a boy, I peddled my father's trees through the Ozarks of Arkansas, and out over the broad, dusty plains of Oklahoma.

I walked from farm to farm!

I have walked clear across the state of Oklahoma and back again, peddling trees. I got a good insight into the nursery and seed business in that way, and learned to love the business.

Later, as I grew into young manhood, I left my father's farm and started a little nursery of my own. But I had learned

My
Guarantee
to You

You positively take no risk when you buy your trees from me!

I started into business giving my customers a square deal, and I still stick to it. "Satisfaction guaranteed, or your money back" has always been my policy.

I can safely make this guarantee, because I grow all of the trees and plants that I sell. I grow them right here in the "Heart of the Ozarks" of northwestern Arkansas, where I have the finest tree-producing soil that the sun shines on. There is no better soil for the growth of nursery stock anywhere in the world. I do not say that boastingly. It is a fact. And that fact, together with my fair and square, iron clad guarantee, takes all the guess out of buying for you.

You are the judge. You must be satisfied with your purchase from me.

how the cost of selling trees affected the price the consumer had to pay. When I started into business on my own account, I decided to give my customers the fullest possible benefit in the way of prices, by growing my trees in such quantity that good trees could be sold for a very modest price and still leave a little profit for me.

And during the years that I have had my own nursery, it has been my effort and desire always to produce just the very best possible trees, plants and seeds that it is humanly possible to grow, and to sell them for the lowest price within reason.

That this idea has produced results is evidenced by the steady growth of my nursery until it now covers a thousand acres, and my satisfied customers number thousands and thousands, in every state of the United States, and even in many foreign countries.

As you look through this catalog you will see reproduced, just a very few of the thousands of letters I have received from satisfied customers. They are proof that I give my customers a square deal—that I do just as I say. Look through this catalog carefully. Be sure to read my Big Bargain offers if you are really looking for some extra big values for your money.

I assure you that I want your order. I will personally do my level best to see that your order is filled with extra care. And every one of my big and loyal staff of ambitious workers will do likewise.

Just run through this catalog. Look at my prices. Compare them with others if you like. And remember my guarantee—

"Satisfaction or Your Money Back." You are the judge.

Read What These Folks Say

My sample order sent to you has just been received, and I want to thank you for the nice trees you sent. They got here in exceptionally good shape and are equal to trees we have ordered from a nursery in this state at a cost of from 50 to 75 cents each.—J. L. K., Texas.

I got my trees and planted them out in just 5 days from the time I mailed my order to you. They were in fine shape and I like them fine. Trees like you sent me cost 50¢ each and better here.—F. B., Oklahoma.

I received my trees in good shape and think they are fine for the money.—Mrs. A. T., Oklahoma.

My order received yesterday and will say I was much surprised at the trees received. They are far above my expectation.—B. R. K., Missouri.

The trees arrived in fine shape. Am very well pleased with their looks. I will recommend your nursery to anyone wanting first-class stuff.—M. B., Oklahoma.

Some time ago I ordered some peach and apple trees. I sure am well pleased with them.—R. T. L., Mississippi.

Yesterday I received the trees which I ordered from you but five days before. Gentlemen, I wish to thank you for the nice trees you sent me, and also for the promptness in getting out this order. All who saw the trees were surprised at the quality and price. A number of persons asked me to write and find out if you would send out a like number of trees of the same quality for the same money.—J. A. B., Kansas.

If saving Money means anything to you, here is where you get the biggest value for your dollar you ever got. For a \$5 bill we will send to you, express charges collect, 25 big, thrifty, one-year-old Peach Trees—5 Trees Each of 5 Different Varieties of Our Selection—25 trees in all. Our Expert Horticulturists will pick out varieties that will do best in your soil and climate.

Every Tree Guaranteed

We stand behind every tree we send out. If you are not entirely satisfied,—if you are not entirely pleased—if you do not think that we are giving you the biggest value in trees that you ever got for your money—just send them back, and we will refund your money. Send for these peach trees. Plant them this spring. Have a dandy peach orchard of your own. Enjoy the satisfaction of having all the peaches you want all summer long right off your own trees. We will send you an assortment that will give you a succession of high quality fruit from early till late.

FREE

Send your order now—TODAY—and not only be sure of getting these 25 Fine Peach trees, but a Campbell Early grape vine as a

Free Gift from us. This vine produces large black grapes of excellent quality. It ripens very early. Delicious fruit to eat and makes the finest of jelly, marmalade and juice. Our supply is limited, and cannot last long, because of the extremely low price we are making on this offer. To be sure of getting yours, you should send your order immediately—RIGHT NOW—and get the FREE grape vine with your trees.

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Apples! The Big Money Crop

Grown in
the "Heart of
the Ozarks"

to have. School boys and girls used to have an apple in their lunch basket when they went to school. And they should have now. Plenty of apples to eat give the youngsters their rosy cheeks, their good health and active minds.

I'm a strong believer in an orchard for every home. I am convinced that at least one apple tree should be in every door yard. And I know as a positive fact, that as a money maker, as a big profit business, there is nothing that will beat a good big commercial apple orchard.

Putting your money into an apple orchard is just like putting it into a Savings Bank. But it makes money faster. No investment in any branch of farming makes money more certainly or more rapidly than that of growing apples for market. It is just like having a mint of your own.

I can point to hundreds of apple orchards of our trees, where the owners started in business with just a little land and a few dollars. Today they are living in big, comfortable, up-to-date homes, with fine automobiles to ride in, and money in the bank. Apples did it!

To my notion, apples are the greatest fruit in the world. There is nothing better. They are easy to grow. There is a hungry market ready and waiting. Everybody likes them. They can be used in more ways than any other one kind of fruit. In fact, I venture to say, apples can be used for a greater variety of purposes than can all other kinds of fruit put together!

And how genuinely good they always are! What can beat that sweet smell that comes from a basket of rosy cheeked apples? Where in the world is there a sweeter fragrance than that of the apple cellar? What tastes better than a big red apple, so crisp that the juice fairly flies when you bite into it? And what pleasure of childhood can compare to that of digging away the frozen dirt of the apple pit, pulling off the straw and then drawing out big, juicy apples, cold, fragrant, delicious and healthful? If you have passed along in life without that pleasure, you have really missed one of the pleasures of being alive.

But you need not wait much longer. You can begin getting ready for it right now. An apple tree, or a whole orchard of them planted this spring will soon be in bearing. And if you will plant a real, man-size orchard, it will make more money for you throughout the rest of your life than any other crop you can plant.

There is no need to envy the man who rides past your home or farm in a high powered car. You can have one of your own. You children, too, can go to college. Apples will make the money.

You can have a modern home, with all sorts of labor saving devices to cut out the drudgery of taking care of a big house. Apples will make this possible.

And it won't cost you a fortune to plant these trees. We grow them and sell them to you direct. No middlemen's profits for you to pay. No extra charges. A guarantee with each tree.

What is nicer on a cold winter evening, when you are sitting around the fire with the children, reading, studying, playing games and talking, than a basket of big, rosy, luscious sweet smelling, juicy apples?

Just think of the pleasure of it! It is real living comfort, and especially when you can know that these very apples came off your own trees. I tell you, there is nothing just like it. Nothing can beat it!

It is a pleasure I wish every home in the land could enjoy. I wish more homes—many, many more homes where there are children, could enjoy that most pleasant experience of childhood of munching apples from the old home orchard, as they sit around the family table at night studying their lessons.

When I was a boy, everybody had a cellar full of apples for winter. Apples are just as easy to grow as they ever were. And we now have better varieties than we used

Offer No. 1011

A Home Apple Orchard

"An apple a day keeps the doctor away." Here are apples for the whole year 'round. The very finest varieties for every home use—eating, cooking, and storing in the cellar for winter. Genuine goodness in every kind. In this assortment, we have taken care to pick varieties adapted to a wide range of soils and climates, and varieties that need no introduction. Every one of these is a well known, time tried and tested sort, and popular with everyone.

If you want a really fine assortment of choice varieties, and just enough for a nice orchard in your back yard, here are the trees. Each tree is of guaranteed "Heart of the Ozarks" quality, straight, clean, healthy, one year old. As a pace setter in value, this offer simply cannot be beat.

You will be greatly pleased with these trees. They will make that orchard of your dreams, and at such a small cost, too. Order them now.

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

Offer No. 1001

300 Two-Year Old Sturdy Apple Trees

Three Standard Varieties of Our Selection \$100

Transportation Charges Collect

This is one of the biggest values in apple trees that I have ever been able to offer to commercial orchard buyers. It is made possible by the great quantity of extra fine two-year-old trees that I have this season. Every tree is a specimen—big, clean, healthy, well branched, 5 to 7 feet tall—just as fine as fine can be. I have never grown finer trees than these in the many years I have been in the nursery business. I may never be able to equal them again soon, as it may be a long time before we have so good climatic conditions. And never again will it be possible to offer such a large value—300 two-year-old apple trees of three standard varieties of my selection, for only \$100.00.

GENUINE WHOLE ROOT GRAFTS
The "business end" of the tree is its roots. We use nothing but the first grade, whole roots. Every tree has a perfectly made "tongue" cut right at the crown, to which the scion of the same caliper is carefully fitted. The whole then is smoothly wrapped and a perfect union results. Such trees are the only kind worth planting.

ENOUGH TREES TO PLANT 10 ACRES

This makes an orchard of just the right size to make big money for you. And in filling your order, I will select varieties that are adapted to your locality. But in this low priced offer, I reserve the right to select the kinds, and in making this selection I will be aided by some of my skilled assistants. The trees will be sent to you well packed and in fine condition for planting, by freight or express, which ever you prefer, and with transportation charges collect. In ordering, please indicate whether you want the trees sent by express or freight.

If you intend planting a commercial apple orchard within the next year or two, I urge that you buy these trees, as you will not soon have the opportunity of getting such fine trees as I will send to you in this offer for so little money. I could not afford to make such a liberal offer as this under ordinary conditions. But I have a large over-supply of fine two-year-old apple trees and I would much prefer to dispose of them at a very low price than to burn them at the end of the season. Not More Than Two Lots of These Trees Sold to Any One Customer

**Plant
10 Acres
of Apples
This
Spring
for \$100**

WHY YOU SHOULD CHOOSE "Heart of the Ozarks" Trees

FIRST—They are grown in the best root producing soil in the country. Good roots are of first importance in the value of a tree.

SECOND—The high altitude of the "Heart of the Ozarks" gives our stock the hardiness of trees grown in the far North. Our Southern latitude gives us all the advantages of a long growing season—sturdiness, vigor, health.

THIRD—The favorable climate produces trees of the utmost vitality—trees that are bound to grow and thrive.

FOURTH—We grow trees by the millions. That gives us a low production cost and permits us picking out the very best for our customers.

FIFTH—Every tree is guaranteed. Your money back if you are not satisfied.

THESE TREES ARE TRIMMED And Ready for Planting

We have trimmed them for you, so that you will have nothing to do but to plant them. So many persons overlook this matter of pruning, with the result that the plants make a poorer growth than they otherwise would. Read the directions for planting on the other tag, other side of this tag. Keep these plants for a short time, other side of this tag, in a cool place, to exclude the air. When you are ready to plant, dig a hole, put the roots in, and fill the hole up around them, so that the roots are not cut out.

THESE TREES
have been trimmed and are

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Stayman Winesap

Big Money Winter Apples

24. ARKANSAS (Mammoth Black Twig) There is more real goodness wrapped up in the skin of this excellent apple than most folks realize. The fruit is big in size. It is beautifully colored with a dark, rich red cheek—although often red all over. As a late keeper in cellar or cold storage it is one of the best. Commercial growers like this apple because it fills the barrels quickly. The trees are healthy, strong branched and able to hold up the big crops they produce. It is closely related to the old Winesap, and, in flavor, has much of the snapiness of that good old apple. That is one reason why it always sells at good prices. In our territory this apple is better known under the name "Mammoth Black Twig" than as Arkansas. But Standardized Plant Names gives Arkansas the preference.

13. ARKANSAS BLACK—Easily confused with the preceding in name only. This apple is so red it is almost black in color. The flesh is of a distinct yellow color; very firm, juicy and fine flavor. It is best to eat in late winter or early the next spring after ripening. This apple is much liked as a commercial fruit.

16. COLLINS (Champion)—This apple originated here at Fayetteville, Ark., and therefore is a real "Heart of the Ozarks" apple in more ways than one. The fruit is of large size and solid red in color. In shape it is somewhat flat. The flavor is fine, either when eaten out of the hand or when cooked. It is a good variety for home use, and is much liked by the commercial

grower, because of its heavy regular crops.

17. DELICIOUS—Words are simply too weak to express the beauty, the fragrance, the inexpressible flavor of this grand apple. Without a doubt it is the finest apple in every way that is grown. There is no other apple like it in appearance, in flavor or productiveness. In size it is large to very large. The skin is heavily splashed and streaked with a brilliant red, sprinkled with tiny pin dots of light yellow. The flesh is creamy white, and of a flavor that causes everyone to immediately exclaim its name—Delicious! As an apple for the home, this variety should be in every doorway. As a commercial variety, there are none that bring more money for the grower, year in and year out. It is the one, outstanding gem among apples, and the one you should, by all means, include in your apple tree order.

18. GANO—Large, solid red apples with white flesh. Its close relationship with Ben Davis is very evident in every way except in having a higher color.

19. GRIMES GOLDEN—There is a wonderfully pleasing flavor in this apple, and it is much liked for eating. It makes the finest pies, sauces and salads. The fruit is of a yellowish green color, becoming bright yellow when fully mature. One of the best varieties for the commercial grower.

20. INGRAM—This apple looks much like the old-time Geneton except of larger size and better colored. Blooms very late and frequently has a crop when other kinds are killed. Originated in the Missouri Ozarks.

21. JONATHAN—The best of all solid red apples for any purpose. It is a universal favorite. Bears well; keeps well in storage; always fine for use from early fall.

22. KING DAVID—This is another good apple that originated in the "Heart of the Ozarks," having been found growing in a fence corner on a Washington County, Arkansas, farm.

It is evidently a cross between Arkansas Black and Jonathan, having the rich, dark red coloring of the former and the snappy juiciness of the latter. The fruit hangs on the tree well until it becomes highly colored, in which form it has a most appealing appearance. As a commercial variety, this is one of the good ones.

23. LIMBERTWIG—A deep red, medium sized apple having late keeping qualities. Much liked in the Southwest. Trees of rather spreading habit; productive.

25. McINTOSH—Skin solid, dark red;

variety, this is one of the good ones.

26. YORK IMPERIAL—A deep red, medium sized apple having late keeping qualities.

Much liked in the Southwest. Trees of rather spreading habit; productive.

27. WINE SAP—Everybody who knows apples knows this good old apple. In quality, it is one that is used as the standard by which others are judged. The fruit is of medium to large size and solid red color.

Its name is suggestive of the excellent, spicy goodness of its flavor and juiciness, and few apples are in any better demand on the market. Winesap is an excellent variety for the home orchard, and an indispensable sort for the commercial grower.

28. WHITE PEARMAIN (White Winter Pearmain)—Not particularly attractive in size, shape, quality or appearance, but holds its own as a home and market favorite. Fruit greenish-yellow, blushed with red; mild flavor; yields well and keeps very well.

29. YORK IMPERIAL—Fruit of large size, conspicuous because of its unusual pinkish-red color and odd shapes the fruit sometimes have. A splendid variety to grow for market; excellent for baking. As a cropper York Imperial is one of the best yielders throughout the Middle West and Eastern apple districts. The fruit runs well to large sizes so that it fills the barrels rapidly. It is a good keeper in storage, and sells readily at profit-making prices.

flesh snowy white, tender, juicy and of most excellent flavor. A splendid market apple when grown in cool climates.

26. STAYMAN WINESAP—Of the several different kinds of apples in the Winesap family, this is the largest in size, handsomest in

appearance and heaviest bearer. Its quality begins in the tree—sturdy, strong, well shaped and able to hold up the tremendous crops it will produce. The fruit is of large size, simply huge on young trees; brilliant, showy red in color and with a flavor possessing all of the goodness, juiciness, crispness and tang of the old Winesap. Stayman Winesap is a highly satisfactory apple for every purpose. It is excellent for home use, and a money maker for the commercial grower and an apple that is sought for by consumers at the markets of the country.

27. WINESAP—Everybody who knows apples knows this good old apple. In quality, it is one that is used as the standard by which others are judged. The fruit is of medium to large size and solid red color. Its name is suggestive of the excellent, spicy goodness of its flavor and juiciness, and few apples are in any better demand on the market. Winesap is an excellent variety for the home orchard, and an indispensable sort for the commercial grower.

28. WHITE PEARMAIN (White Winter Pearmain)—Not particularly attractive in size, shape, quality or appearance, but holds its own as a home and market favorite. Fruit greenish-yellow, blushed with red; mild flavor; yields well and keeps very well.

29. YORK IMPERIAL—Fruit of large size, conspicuous because of its unusual pinkish-red color and odd shapes the fruit sometimes have. A splendid variety to grow for market; excellent for baking. As a cropper York Imperial is one of the best yielders throughout the Middle West and Eastern apple districts. The fruit runs well to large sizes so that it fills the barrels rapidly. It is a good keeper in storage, and sells readily at profit-making prices.

Grow Some More Summer Apples

Here are Extra Fine Varieties, with Genuine "Heart of the Ozarks" quality.

1. **EARLY HARVEST**—One of the most popular early apples. Yellow, tender, fine in flavor; comes into bearing young.

3. **LOWLAND RASPBERRY**—Large fruits, creamy-white skin streaked with brilliant crimson. Excellent flavor. Tree bears young and heavily. Fine apple for home or market.

4. **MAIDEN BLUSH**—This variety is a gem. The fruit is big, with a clear yellow color, and a brilliant red cheek on the sunny side. It is a beauty to look at, and with just the right snappy juiciness to make it an extra fine eating apple.

For cooking, it makes a most delicious sauce and pies that are simply wonderful. It is about the latest of the summer apples to ripen, and if put in a cold cellar, or in cold storage, can be held for months. The tree is a good grower and bears well. This is a mighty fine variety for home use, and is a money maker for the commercial grower.

5. **RED JUNE**—Fruit of medium or small size, solid red; flesh white tinged with red. Much liked in early summer for sauce. Trees bear well.

5A. **RED ASTRACHAN**—One of the most popular of the large, red summer cooking apples. Fine market variety everywhere, and one of the best for home use.

6. **SWEET BOUGH**—Fruit of large size; yellow, very sweet, and most pleasing flavor. The best of the sweet summer apples.

7. **SUMMER QUEEN**—Good for cooking. Fruit of medium to large size; yellow, heavily streaked with red. Snappy, agreeable flavor. Tree yields well.

8. **YELLOW TRANSPARENT**—Of the gold yellow, early summer apples, there is no variety any better than this. The fruit is of medium size; whitish-yellow in color and of a flavor that makes one want to eat and eat and eat! It is one of the best apples for home use, because it comes so early and is so fine to eat or cook. And as a market apple, it brings top prices.

Fall Apples

9. OLDENBURG (Duchess of Oldenburg)

This is the most popular and best liked of the late summer apples for cooking. It is an old time, well known favorite. The fruit is of large size, beautifully colored; fine, acid flavor. Tree of medium size, and liked as a filler.

10. **MAMMOTH PIPPIN**—An apple of the Rhode Island Greening type, similar in appearance and quality.

11.—**ROME BEAUTY**—The big, large, round, red striped fruits of this fine apple are luscious for eating, extra fine for baking and other cooking purposes. The strong demand for the fruits of this apple, together with the heavy production of the trees and its adaptation to a wide territory, make it one of the best commercial apples. A popular and profitable sort to grow, for either home or market.

12. **WEALTHY**—The beautiful, red striped fruit of this apple is well known on all of the big markets of the country. Excellent in flavor. The trees come into bearing early and are about as sure croppers everywhere as any of the fall varieties. It is an apple that is a continual delight. Growers like it because it is an excellent cropper, packs well, looks good and sells for good prices. Fruit dealers like it because it is one of the most attractive apples of its season, and the market never drags on Wealthies. Consumers like this apple because of its excellent flavor for eating out of the hand, because of the excellent pies it makes and because it is a splendid cooker. Wealthy trees make an excellent "filler" as they come into bearing early, often producing a bushel to a tree when five years old.

We are just as anxious to give you big value as you are to receive it.

Crab Apples

30. **WHITNEY**—One of the largest and handsomest Crabs. Flesh firm, juicy and rich. A great bearer and extra hardy. Tree a vigorous and beautiful grower. Excellent for cider and cooking. Season early.

30A. **TRANSCENDENT**—Tree immensely productive, bearing after the second year. Excellent for sauce or pies, either green or dried, and unsurpassed for cider. Flesh yellow and crisp, with an agreeable flavor. Season medium.

31. **HYSLOP**—A handsome Crab of excellent quality and unsurpassed for general purposes. Flesh yellow, with a sub-acid, pleasant flavor. Tree highly ornamental. Season late.

32.—**SIBERIAN**—Vigorous grower. Highly flavored and juicy. One of the best.

LIKES OUR TREES

I received the 6 apple trees and they all were in fine shape. They sure did have fine roots. The order I got from you early in the fall they are all looking fine. The climate is so much warmer here the trees sure are doing fine. I like your trees better than any other nursery I have ordered from. The way you pack the trees they have always reached me in good shape. Thank you very much for your apple trees. I think they will do well. We are having a fine season in the ground for the trees this year.

Please send to my neighbor, whose name is enclosed, one of your catalogs early this fall. He is a talking about putting out an orchard this fall. I have showed him the trees I got and he is well pleased with them. He likes the way you pack them. He likes the trees because they have got such fine roots.—J. W. LABSTEIN, Texas.

EVERY TREE LIVED

I am writing you concerning my trees I ordered from you in 1922. I was well pleased with them and they are thriving well and every one of them lived. Please send the trees I am ordering at present by return mail with information how to plant.—B. C. NORRIS, South Carolina.

OUR PRUNING APPRECIATED

I will take the pleasure in writing to tell you how well pleased I am with the trees. General directions for planting and the trees pruned ready for planting, was very much appreciated. Will you please give me information for taking care of trees during cold weather.—A. F. SHELTON, Texas.

Peaches and Cream

The very thoughts of a big, dead ripe, juicy peach, cut up and spread with plenty of cream and sugar makes one ravenous for it. It is a dish fit for a king, and yet a dish that can be enjoyed in the humblest home.

Peaches are never so good as when you pick them yourself right off your own tree, and so ripe the juice fairly bursts through the skin as the fruit is held in the hand. Peaches were made to eat! And such luscious fruits as they are.

Next to apples, more folks can grow peaches with satisfaction than any other fruit. And the fruit can be used in such a variety of ways in the home. What pleasure it is to have the pantry shelves loaded with canned peaches, preserved peaches, peach pickles, marmalade, conserve, and peach jelly! Nowhere can more delicious good things like these be found than in the home abundantly supplied with peaches of their own growing. And there are few places in the

Peaches all The Year 'Round

Peaches every day! Peaches fresh; Peaches canned; Peaches Dried; Peaches preserved; Peaches pickled; Peaches made into butter, marmalade, jam, jelly!

Yes, and even more thoughts will come to mothers of big families of the good things that can be made from peaches so these delicious fruits will be available every day of the year.

It fairly seems peaches were made to be canned. In cans they lose none of their lusciousness, none of the brilliant sunshine under which they were produced, none of the sweet perfume of the orchard.

Grow peaches to can! Grow them in the home yard or orchard for home use. Grow them in large orchards for other families to can, or for big commercial canning factories to pack.

They are always best when canned at home, when the big, juicy fully ripe fruits, fresh off the tree and loaded with superb goodness are dropped right into the hot syrup, then into the can and sealed. How delicious they are when snow covers the ground, and how the kiddies love them when they come home hungry from school.

You may have peaches every day when you grow them yourself and can them at home. Then you know the real joy, the pleasure, the profit of this superb fruit. And then to think of the real enjoyment of having luscious, juicy peaches to eat to your heart's delight right off your own trees. Nothing can beat them. Plant peaches.

country where peaches cannot be grown. And as a money maker for the commercial grower, fabulous fortunes have been made in a very few years by peach growers. Many instances are on record where peaches have proved to be a veritable "get rich quick" crop. But we do not encourage our customers to rush into the planting of peaches with the certain feeling they will reap enormous profits in short order. Commercial peach growing has its hazards. It is immensely profitable under the right conditions of soil and climate, and in the hands of one who "knows the game," or who is willing, through hard work, study and patience to fit himself for the business. For years we have made a specialty of growing peach trees for home and commercial orchard planting. Next to apple trees, they are our most important line. We grow them as "June buds" for the commercial orchard planters of the South; and as one-year-olds and two-year-olds for the home orchard planter and the Northern markets. We grow these trees by the millions and sell them by mail, thereby giving you the greatest value for your money. "Every tree with a guarantee."

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

Early Peaches

33. MAYFLOWER—This is the earliest peach to ripen. The fruit is medium size, creamy white, blushed with red on the sunny side. Clingstone. The chief merit is earliness, and that is why this variety is liked among commercial growers.

34. EARLY WHEELER (Red Bird)—The earliness of this beautiful peach, together with its fine flavor, make it one of the most sought after of the very early ripening kinds. The fruit is creamy white, overspread with bright glowing red, making a fruit of exquisite beauty. The flesh is firm and meaty, yet very juicy, and of a genuinely good flavor. It is a splendid variety for the home orchard, as it ripens almost before the berries are gone.

35. ARP (Arp Beauty)—The earliest good yellow cling. The fruit is of beautiful appearance, splendid in flavor and an excellent sort for the market grower.

36. CARMAN—Among the white fleshed, freestone peaches, few are more delicious than this kind. The skin is brilliantly splashed with red on a creamy white background; and in taste, its appearance is not a bit deceiving. It tastes just as good as it looks, and is especially good when canned in a thick syrup. This is a very good variety for the home orchard and a money maker for the market grower.

37. EARLY CRAWFORD—If this peach was more certain in its productiveness it would be the leading early yellow freestone. It deserves a place in the home orchard because of its fine quality.

38. GREENSBORO—One of the best early white-fleshed, semi-cling for regularity of crops. Quality fair, but a good commercial variety.

Splendid Mid-Season Peaches

40. BELLE (Belle of Georgia)—A beautiful, large, creamy white peach with a bright red cheek, and exquisite flavor. Semifreestone. A dandy for the home orchard, and a favorite among commercial growers of the South. Deserves to be more largely used for home and market growing.

41. CHAMPION—Did you ever go out into your orchard on a bright, sunny day in July or August, and pick several big, rosy cheeked Champion peaches, take them in the house and cut them up, cover them with thick cream and plenty of sugar, and then eat them? If you never have, you have missed completely one of the most superb dishes ever prepared. Peaches are always best picked fresh from your own trees when fully ripe, and Champion is no exception. It is good anytime after it has become well colored. But for the supreme essence of real flavor, let Champion get fully ripe and then eat it! One peach won't be nearly enough. You will only regret that you can't accommodate the entire crop.

Champion is a grand peach in flavor. It is a beauty in appearance. It is a very good cropper, even in years when other kinds run light. It is a superb variety for the home, and should be planted wherever peaches will thrive. It is a splendid variety for growing in a large way for the local market, but a little too tender for shipping. For home canning there is no peach that carries its flavor so well.

42. EARLY ELBERTA—The ripening period of this peach is 10 days or two weeks ahead of Elberta. The quality of the fruit is better than of the later variety, but otherwise it is almost identical. Commercial growers find it valuable in lengthening the Elberta season.

46. ELBERTA—One of the great peaches of the earth. (Freestone.) Ripens here early in September, following closely up on Early Crawford. A beautiful, extra large, golden yellow peach, with a brilliant red cheek, firm, juicy, high flavored, rich and sweet. This is the best commercial variety. For years it has been the standard market variety and its place in the estimation of commercial growers would be hard to fill with any other variety, for no other peach has yet been introduced that will fill all requirements of a commercial peach with such success as the Elberta. In addition to its high quality, large size and attractive appearance, the Elberta has a tough skin and consequently does not bruise easily and ships exceedingly well. Elberta remains the peer of all commercial peaches, and from present indications will hold this place undisputed.

47. FITZGERALD—An improved Early Crawford, being fully equal to it in size, quality and color. The fruit is large, brilliantly colored yellow skin splashed with red. Flesh is deep yellow. The fruit is of very large size, exceeding that of Early Crawford. In quality, it is greatly superior, and as a cropper it is one of the best. This peach originated in Canada, and therefore is extremely hardy, and has the very desirable character of fruiting at a very early age. Two-year trees often are well loaded with fruit.

48. HILEY—This is the earliest commercial white-fleshed freestone peach. Large, handsomely colored and of excellent quality. Liked as a market fruit.

57. INDIAN—This is the old time Indian Clingstone, so much loved for peach pickles. Deep red skin, blood red flesh; juicy; delicious flavor.

49. J. H. HALE—What Elberta has been and is, as a commercial fruit, J. H. Hale gives promise of being. In color, it is very similar to Elberta, but the fruit is larger, more nearly as round as an orange, and is almost free from fuzz. In quality it is very much better than Elberta, being even more juicy, much sweeter and without so much of the bitter tang that characterizes Elberta. As a market fruit, J. H. Hale is rapidly becoming one of the leaders.

50. OLDMIXON FREE—An old, white-fleshed variety of good flavor; once a good market sort, but dropping in favor because of the uncertainty of its crops.

51. ROCHESTER—A new, very early, yellow-fleshed peach of the Crawford type. It is beautiful in appearance; its flesh is deep yellow, tinged with red next the free stone, and it holds up well after being picked. It is high in quality, being one of the best flavored of any peach, and it ripens early, ahead of Early Crawford, Elberta or other well known yellow peaches. This makes it very valuable for the home garden, and for the commercial planter, because it is the early kinds that always get the best prices. Plant a few Rochester peaches this year and find out for yourself just how good this new variety is.

52. TRIUMPH—An extra early, yellow-fleshed peach with a very fuzzy, dark red skin. Semi-cling. Valuable chiefly because of its earliness and hardiness.

Select Summer and Fall Peaches

54. CHINESE CLING—This old favorite is much appreciated for home use because of the delicious preserves and spiced peaches that can be made from it. The fruit is greenish white in color, slightly blushed on the sunny side. Flesh white, juicy, meaty, good. Tree somewhat tender in bud.

5. CROSBY—A round yellow peach with a mottled cheek. Large size, especially when the trees are well fertilized and the fruit thinned; delicious, rich and one of the sweetest and best quality of all the yellow peaches for eating or for canning. The tree is an open grower, somewhat inclined to overbear. Extremely hardy in wood and bud, and on that account is a good variety in cold climates.

CHERRIES

Few fruit trees are more beautiful when in bloom than the cherry. Almost before winter has passed, the cherry tree spreads its canopy of white, to entice the bees, and to hold forth the promise of abundance for the season.

Then comes the crimson, juicy fruits in June—fruits almost without equal for pies—fruits that so readily lend themselves to canning, the pantry shelves may fairly bend under the loads. How delicious the canned cherries taste when winter's winds howl! As a fruit for the home orchard, cherries are superb. The trees are among the most ornamental for the lawn, and, indeed, may be used to advantage for purely decorative purposes. Their garland of white, coming so early in spring, is a real harbinger of good cheer. Then when their branches bend under the loads of ripening crimson hued fruits, few trees are more beautiful, and at the same time afford a fruit of such excellence for so many purposes. For the commercial grower, cherries are great profit makers, rarely failing to produce a heavy crop and always bringing profitable prices on the market.

105. COMPASS CHERRY—This tree produces the first year after planting. When the Compass Cherry was first introduced, it was given a wide berth by most nurseries, but in the last few years it has been taken up in all sections of the country and put into the best fruit lists. It bears invariably at two years old and bears large quantities of most excellent fruit. In size it is larger than the Early Richmond cherry. The quality is between the cherry and the plum. This perfectly hardy fruit was originated at Springfield, Minn., and is a cross between the native Sand Cherry and the American plum. The fruit brings the best prices of any on the market, and the demand has never been supplied. Anyone planting trees should not be without the Compass, and then you would never be without good fruit.

106. DYEHOUSE—A very early and sure bearer, ripening a

week ahead of Early Richmond. It is better in quality than that variety and fully as productive.

107. EARLY RICHMOND—A most popular variety for home growing, as it is one of the surest croppers, ripens early, and its bright red fruits are of most excellent flavor. It is an excellent pie and canning cherry, and when the fruits are fully ripe they are delicious to eat out of the hand.

108. ENGLISH MORELLO—The tree of this variety is an especially fine one for ornamental purposes, as it is dwarf in growth. The fruit ripens very late; extra large in size; almost black in color; of excellent flavor, but too sour for pleasant eating out of the hand. It is the favorite late, sour cherry.

109. LARGE MONTMORENCY—The best, the most popular, and without doubt the very finest in every way of any cherry adapted to the Middle West. The fruits are very large in size and ripen ten days or two weeks earlier than Early Richmond. They are of much darker red color and much superior in flavor. This fruit is ideal for canning, the finest of all for pies, and possessed of a flavor that is simply superb. If you want a few cherry trees for your yard, where the children can have all the cherries they want to eat, buy this variety. If you want to grow cherries for market, you can put your dependence on this, and be sure you are growing a profit maker.

110. BLACK TARTARIAN—The most fruitful, healthful, and vigorous of the sweet cherries that are adapted to the Middle West. Fruit of medium size, almost black, and of most pleasing taste.

Pears the Quality Fruit

Kieffer

Pears are famous for the great delicacy, the mildness, sweetness, and lusciousness of the melting, buttery, juicy fruits. They combine the lusciousness of the finest of peaches with the character of the apple, forming fruits of amazing goodness. In many parts of the Great Lakes region and on the Pacific coast, pears are grown in a large commercial way, and have become one of the important fruit crops. Throughout the central part of the country the pear is primarily a fruit for the home orchard. And what a luscious fruit is it! Delicious for eating out of the hand, and even better when made into preserves or marmalade, or canned in a heavy syrup. In the opinion of many, pears are really finer in flavor when canned or preserved than when eaten fresh. But for either purpose, the fruit should be picked from the tree several days before it matures and be permitted to ripen in a cool cellar. Its flavor is much superior to the tree ripened product. Plant a few pear trees in your home orchard and enjoy the lusciousness of fruits of your own growing.

89. ANJOU—A large, heavy, yellow pear, often shaded with dull crimson. It has a short, chunky neck, tapering slightly toward the stem. The flesh is whitish, fine grained, buttery melting, with a rich, high flavor. The fruit always looks attractive, keeps well, and is a splendid shipper. The tree is an upright grower, very vigorous, productive, and invariably has a crop every year.

90. BARTLETT—Beautiful, large yellow fruits of excellent flavor. Fine for eating and cooking; probably more extensive for market than any other variety.

In this locality, as if it is the most largely grown of all pears blight. The fruit is large to very large, rich yellow in color, oval, "pear" shape, although sometimes tapering nearly to the blossom end and to the stem end. The Kieffer tree is a remarkably strong grower, vigorous, very productive, and flavor, but ripens several days earlier. Grows best on the heaviest clay soils.

PRICES

3 to 4 feet....	60c Each
4 to 5 feet....	75c Each

95. DUCHESS D'ANGOU-LEME—The fruit of this variety is the largest in size of all commonly grown pears.

Good to excellent in quality. Tree a good grower, heavy and regular bearer. One of the best to plant.

86. EARLY HARVEST—The chief value of this fruit is its earliness. Fruit large, early; quality only fair. Tree of straggling growth.

97. FLEMISH BEAUTY—Handsome in appearance, excellent in quality, but very subject to blight and scab. Worth growing in home orchards where it can be given the necessary care.

93. GARBER—A large, roundish, oblong fruit, tapering toward the stem end. The skin is yellow when ripe, and sometimes has a red cheek. The flesh is firm, juicy and of fair quality when eaten out of the hand, but of much excellence when canned. The tree is very strong, hardy, vigorous and very resistant to blight.

94. SECKLE—Equalled by no pear in the high quality, sweet sugary flavor. Good producer; healthy. Fruits small, reddish brown in color, ripen early.

98. WILDER EARLY—Bright lemon yellow with red cheek; very attractive. One of the best summer pears.

99. VERMONT BEAUTY—Fruits similar to Seckle in flavor, but much larger in size and better appearance. Ripens late. Excellent for home or market.

PLUMS—The Superb Jelly Fruits

To my taste, nothing nicer can be served with roast pork or roast lamb, than a liberal helping of plum jelly! It is simply delicious. And there are so many different kinds of plums, that the varieties of jellies seems endless.

Except in a few localities where plums are grown on a large commercial scale, plums are altogether a home fruit—just a few trees in the yard will produce an abundance of fruit for eating, for canning, jellies and preserves. They are the easiest of all fruits to grow, requiring but little care and rewarding almost every year with a profusion of fruits. But plums, like any other fruit, respond best when given the best care.

As shade producers for the chicken yard, no tree is more popular or better adapted than plums. The poultry aid in keeping down troublesome insects, while their dusting pieces under the trees serve to stimulate the growth and fruitfulness of the plums.

Here are some of the best varieties for home use in the Southwest:

74. **ABUNDANCE**—Medium to large; round, pointed; skin greenish yellow, overlaid with dull purplish carmine; flesh light greenish yellow, juicy and sweet, with a slight apricot flavor; cling; quality best; pit small; strong-growing, upright, very prolific. More extensively planted than any other of the Japanese plums. It is one of the most popular and prolific early sorts in the plum-growing sections of the North.

75. **BURBANK**—The best of all the Japanese plums; nearly globular, clear cherry-red, with a thin lilac bloom; the flesh is a deep yellow color, very sweet, with a peculiar and very agreeable flavor; tree

vigorous, with strong, upright shoots, large, broad leaves; begins to bear usually at two years. It blooms late, and consequently is more likely to escape the late spring frosts.

76. **GOLD BEAUTY**—A large variety in a rich yellow. Flesh is very firm and sweet, always in big demand.

77. **POOLE PRIDE**—Fruit of attractive appearance, about an inch in diameter; clear, bright red; flesh yellow, juicy, sweet with a strong, peculiar flavor. Ripens early.

78. **RED JUNE**—A very handsome plum, about a week earlier than Abundance. By all odds the best Japanese plum ripening before Abundance. Medium to nearly large size, deep vermillion red, with handsome bloom and very showy; flesh light lemon-yellow or whitish, firm and moderately juicy, very slightly subacid to sweetish, of good, pleasant quality; pit small; tree upright, spreading, vigorous and hardy, and as productive as Burbank.

79. **SHIRO**—The Shiro is a brilliant, transparent, yellow plum, large, round, tapering slightly at the end, covered with a thin bloom. Flesh, light yellow, and the thin, clear skin adds to its translucent appearance. It is good quality, very juicy, sweet and mild. The tree is large, upright, spreading, vigorous and hardy, except in very cold localities. There is no other yellow plum that has the brilliancy and beauty of the Shiro. The quality is good, very pleasant and it ships well when picked before maturity. Splendid plum for the home garden and commercial planting.

80. **SHROPSHIRE DAMSON**—Larger and better flavored fruits than the old Damson. Fruit about an inch in length, dark purple, overlaid with a heavy bloom. Very productive. The finest of plums for preserving, making a heavy, rich, delicious preserve.

81. **WICKSON**—A plum of the Japanese type, producing the largest fruit of any plum in this region. The skin is dark red over a yellow ground; the flavor of the fully ripe fruit is very fine, sweet and delicious, with a distinct flavor quite unlike any other plum. This variety is excellent for canning, making a splendid sauce. The tree is a splendid grower, wide spreading and a good bearer.

82. **WILD GOOSE**—The best known and most popular of the American type of plums. The fruit is of brilliant red color, somewhat egg shaped; ripens early, and is excellent for eating out of the hand, for canning or jelly making. The tree grows well and bears heavily. It is very ornamental when in bloom, and because of its abundant foliage, makes a beautiful ornament on the lawn. A splendid tree for use in the poultry yard.

APRICOTS—Of Course You Can Raise Them

Moorpark

Many persons in this Middle Western country seem to think the only place where apricots can be grown successfully is on the Pacific Coast. But it can be fruited almost as well right here in the Middle West, or any place where peaches can be grown. It is one of the most delightfully luscious of fruits. It is remarkable that such a rich and beautiful golden, sweet fruit is not more largely planted, especially for home use, where they may be eaten right off the tree, or canned or made into pies. Fresh apricot pie is wonderful! The culti-

vation and care of the apricot is just about like that of the peach, and it is just as productive. Because of the great beauty of its bloom, and the earliness of its blooming, an apricot tree on the lawn is a grand sight during the warm days of early spring. It is worth planting as an ornament, if for no other reason.

100. **ALEXANDER**—Orange yellow, coarse, juicy, sweet, fair quality midseason. 75¢ Price, each

101. **EARLY GOLDEN**—Ripens early, fruit small, round, moderately juicy and sweet. Makes a large, productive tree. \$1.00 Price, each

102. **ROYAL**—The variety most largely grown for commercial purposes. Not so good in flavor as some, but being more fruitful and ripening early. 75¢ Price, each

104. **EARLY MOORPARK**—Creamy-yellow fruit with a brilliant crimson cheek. A beautiful fruit, and of the finest flavor and best size of all. Price, each 75¢

104A. **SEEDLING RUSSIAN APRICOT**—A most delicious fruit for home growing. Is of a distinct flavor and one of the best and most profitable market fruits. The tree bears very young and most profusely. Ripening, as it does between the cherry and peach, the apricot is the most welcome fruit. The tree is slender in form, has beautiful dark green foliage, pretty pink blossoms, and will give very satisfactory results as an ornamental tree in garden or house lot. You will find the Russian Apricot very hardy. It will pay you to plant a few apricots about the place for home use. 50¢ Price, 2 to 3 ft., 40¢; 3 to 4 ft.

QUINCE

88. **ORANGE**—The leading commercial quince. Tree very vigorous, hardy, productive and about the most resistant to blight. Fruit roundish, very fuzzy, ripening early; pale yellow when ripe, but cooking to a rich red color. Price, each \$1.00

NECTARINE

This fruit is identical with peaches in every way except that the skin is smooth and glossy like a plum. As a novelty for the home orchard they have a distinct place, but are little grown for market.

86. **RED ROMAN**—The fruit is large, or greenish yellow color and brilliant red cheek. Flesh yellow, tender, rich and a spicy peach-like flavor. Fine for home planting. Price, each 50¢

87. **NEW WHITE**—In appearance this fruit is quite like a Carmen peach. Ripens late. Sweet, juicy. Price, each 50¢

PRUNES

88. **AGEN** (French Prune)—One small sweetest of all plums—a violet color, semi-clinic.

84. **GERMAN PRUNE**—Large purplish-black fruits, ripening late. The thick, meaty, sweet flesh of this plum make it excellent for culinary purposes.

85. **ITALIAN PRUNE** (Fellenberg)—This is the leading plum in the northwestern United States, and the chief variety for drying into prunes. A good dessert plum and excellent for cooking. Thrives over a wide territory.

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

Strawberries Big Red and Juicy Fresh from your own Patch

Ozark Crown

Of all the berries, strawberries undoubtedly are the most popular of all for home use and for market. The demand for strawberries is always good, and while, at the height of the commercial shipping season, some markets become oversupplied, yet there are others that are begging for strawberries. In the great commercial districts co-operative marketing is doing much to regulate the distribution of the crops and obtain better returns for the growers.

For quick returns, no fruit brings a profit sooner than strawberries. Set the plants in the spring and they are in bearing the next spring. Strawberries do best on rich, well drained land, but they will yield a fair crop on almost any kind of soil, from a dry, rocky hillside to very wet bottom land.

It is better to set strawberry plants in the spring—the earlier the better. For field culture, set the plants two feet apart in the rows, with the rows four feet apart. In the home garden they may be set as close as one foot apart in the row with the rows two feet apart. Bury only the roots in the soil, being careful not to cover the crown of the plant. Keep the plants well cultivated throughout the season, removing any blooms in spring that may appear. This will enable the plants to make an abundant lot of runners from which the fruit will be gathered the next spring.

In the extreme South the fields are reset each year. In other places fields may be profitably fruited for two or three years. Everbearing strawberries are given the same cultural treatment as spring bearing kinds, but will produce fruit the same season they are planted. If you have never grown everbearing strawberries, try some of them this season.

SPRING BEARING VARIETIES

68. KLONDYKE—This is the leading commercial berry of the South, where it is grown more extensively than any other one variety. As a shipper it is among the best. It is a good plant maker and heavy cropper. Toward the end of the season the berries are inclined to run to small sizes. Its flavor is not the highest quality. Perfect flowered. Prices, 100 for \$1.00; 1000 for \$7.50

69. LADY THOMPSON—An old home and market favorite. The fruit is of large size, flavor fine and greatly liked, but as a market berry its place is being taken by more productive kinds that ship better. Prices, 100 for \$1.50; 1000 for \$10.00

70. DUNLAP (Senator Dunlap)—Unparalleled for home use and local markets. A little too soft for distant shipping. Berries rather long and with a more or less distinct neck. Dark red all through; sweet, rich, juicy. Plants healthy, productive and a good plant maker. Perfect flowered. Prices, 100 for \$1.50; 1000 for \$10.00

71. MICHEL EARLY—The earliest strawberry of good flavor. Fruit of fair size, good color and fine flavor and the best of its season for home or market. Prices, 100 for \$2.00; 1000 for \$15.00

72. AROMA—This good berry has been one of the leading market varieties for a long period of years. It is of large size, chubby shape, firm and of good flavor. The berries hold their size well through the ripening season, and while lacking in some points of goodness for home use, it is a leader among shipping berries. Perfect flowered. Prices, 100 for \$1.50; 1000 for \$10.00

73. GANDY—Handsome, deep red berries of very good quality and very late. In many localities preferred as a late shipping variety. Excellent for the home garden. Does best on heavy, moist soils. This variety has long held an important place in many localities as a commercial variety. Because of its late ripening it is an excellent home fruit. Perfect flowered. Prices, 100 for \$2.00; 1000 for \$15.00

131. **GIBSON**—A new claimant for distinction as a shipping berry and finding much favor through the Middle West. Berries of large size, good shape, splendid color, flavor and aroma. Excellent for the home garden, and a good shipper. Gibson has leaped into popularity because it has so many good qualities that appeal to the home owner and the commercial grower. Try a hundred or so of them. Prices, 100 for \$1.50; 12 for 40c; 50 for 85c; 100 for \$15.00

131. GIBSON—A new claimant for distinction as a shipping berry and finding much favor through the Middle West. Berries of large size, good shape, splendid color, flavor and aroma. Excellent for the home garden, and a good shipper. Gibson has leaped into popularity because it has so many good qualities that appeal to the home owner and the commercial grower. Try a hundred or so of them. Prices, 100 for \$1.50; 12 for 40c; 50 for 85c; 100 for \$15.00

WILL TELL HER FRIENDS
I received the strawberry plants and the Crimson Rambler rose and was more than glad to get them. I don't know what I can do for you, but I will tell all my friends about them and I will always remember you if I need anything in trees and seeds, I will order from you.—MRS. WILL BRANDER, Missouri.

NEVER STOPPED GROWING
The trees, plants, etc., received of you arrived in first class condition. Planted them the next day and they have never stopped growing.—GEO. F. WALLENMEYER, Kentucky.

ARRIVED IN GOOD SHAPE
I thank you very kindly for your prompt shipment of plants. They reached me in good condition.—MRS. BESSIE JACKSON, Mississippi.

NICE BERRY PLANTS
My strawberry plants are sure nice. I received them in good condition. This fall I will make an order for fruit trees of all kinds, as it is too late now.—ELLEN SEALS, Oklahoma.

EVERBEARING STRAWBERRIES

Everbearing strawberries came into prominence just a few years ago, but have made good everywhere. When you plant this wonderful strain of berries, you begin picking fruit the same summer the berries are planted, and keep on right up to freezing weather. They begin bearing again with the earliest of berries the next spring and produce continually through the summer. If you have never grown any of these wonderful berries, try some this year. A hundred plants make a nice patch to start with.

66A. AMERICUS—One of the first of the everbearing kinds to obtain general favor. Its berries, while very good, are of small size. Good for home use. Prices, 25 for \$1.25; 100 for \$3.00; 1000 for \$25.00

66. PROGRESSIVE—This is the heaviest cropper of all everbearers. Its spring crop is as good as any of the standard spring bearing varieties, and the plants continue producing during the summer and autumn, yielding berries of good size right up to freezing weather. Berries of deep red color clear through, very sweet, rich and aromatic. A good plant maker and heavy yielder. Prices, 25 for \$1.00; 100 for \$2.50; 1000 for \$20.00

67. SUPERB—The berries of this variety are the largest of all everbearers, and hold their size well through the season. The flavor is excellent, but the plants do not multiply as freely as with other varieties, thereby cutting down the yield. Well worthy of a place in the home garden. Prices, 25 for \$1.50; 100 for \$3.50; 1000 for \$30.00

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Offer No. 1014 Grand Home Size Blackberry Garden

For the home garden, no small fruit can beat blackberries. The glistening, juicy, jet black fruits are simply superb with cream and sugar. Unequalled for pies; and what makes a finer spread for hot biscuits than blackberry jam!

This Grand Home-Size Blackberry Garden will give you enough plants for an abundant supply of delicious fruit. Our horticultural experts will send you varieties well adapted to your soil and climate. Every plant will be tip top and backed by our fair and square guarantee.

50 Blackberry Plants \$25.00
3 Choice Varieties, our Selection. Postpaid

berries as Early Harvest or Dallas. The fruit ripens two weeks ahead of Early Harvest and always commands a top price. Preferred by Southern growers.
165. LAWTON—This big sturdy variety is one of the leading market berries of the Southwest. The fruit is of large size, jet black color, very sweet and ships well. Perfectly hardy and very fruitful.
164. RATHBUN—The fruit of this variety is fine in size, flavor and quality, but the plants rather weak and unproductive. Worthy of a place in the home garden.
165A. ROBINSON—A large, fine berry of vigorous habit similar to Lawton. One of the best for the Southwest.

RASPBERRIES

Blackcap Varieties

129. BLACK PEARL—A variety introduced a few years ago from the Missouri river valley in Kansas. Fruit large, jet black, heavily overspread with a blue bloom. The fruit is produced in large clusters, well supported on strong stems. They are meaty, rich and do not crumble when being picked. The plants are strong growers, productive and healthy.

130. KANSAS—Long popular as a market berry. Its fruits are rather deficient in size and inclined to crumble, but of good flavor. The plants are quite subject to anthracnose, causing it to decline in favor as a market variety.

133. CUMBERLAND—Next to Black Pearl this is the most largely grown of the blackcaps in the Middle West and Southwest. Its fruit of fine size, color and flavor; heavy cropper; healthy, although more subject to anthracnose than Black Pearl.

Red Varieties

122. BRANDYWINE—An old, popular variety having bright red fruits firm enough for shipping. Plants rather weak and tender.
125. KING—One of the best early reds, but a few days later than the preceding. Fruit of medium size, light red color, tender and inclined to crumble.

CURRENTS AND GOOSEBERRIES

Because of the Federal quarantine on currants and gooseberries, plants of these fruits cannot be shipped west of the west line of Arkansas, Missouri, Iowa, etc.

FAY (Fay Prolific)—The best of the large fruited currants. Berries dark red, juicy, thin skinned. Bushes are dwarfish and yield abundantly. A very fine currant for home use.
PERFECTION—A vigorous grower, healthy and productive. Berries large, in long clusters; bright, clear red and of very fine flavor. Of recent introduction, but because of its many merits is becoming one of the most popular.
RED DUTCH—One of the oldest and best known currants, but giving way to varieties having larger fruits. Its berries are bright red, juicy and fine in flavor.

PEARL—Fruits of this gooseberry are larger and much better than Downing, and the plants somewhat more productive.
DOWNING—An old gooseberry and one of the most widely grown. The fruit is of medium to small size, but so abundantly produced the total volume of the crop is large.

HOUGHTON—This gooseberry stands next to Downing in popularity. Fruit somewhat larger in size, but not so good in flavor, and in some localities the bushes are more inclined to mildew.

Ranere [St. Regis] Raspberry Bears Fruit for Four Months

128A. RANERE (St. Regis)—This is the wonderful Everbearing Red Raspberry you have heard so much about. Fruit commences to ripen with the earliest varieties of red raspberries, and continues to produce fruit during the summer and fall, right up to freezing weather. Ranere is exceedingly hardy, even in the extreme North. The fruit is of bright crimson; large, rich, sugary and of the best flavor, and produced in abundance. It is the only red raspberry that yields a crop the first year. Plants set in the spring bear that summer.

Strong, selected plants, prepaid, \$1.00 per dozen; \$1.75 per 25; \$3.50 per 50; \$6.00 per 100; postpaid.

Choice Blackberry Plants

160. BLOWERS—A tall, vigorous productive variety notable for the long period over which the fruit ripens. The plants are hardy and the fruit is a good shipper in addition to being of high quality.

161. DALLAS—This is one of the best varieties for the Southwest. The fruit is of fine size, flavor and quality; the plants are vigorous and productive and the blossoms are preferred by many growers as pollinizers for the McDonald. It ripens mid-season.

162. EARLY HARVEST—The earliest of the true blackberries. Plants are small and the berries have the appearance of mulberries, but possessed of a most excellent flavor, very delicious for jams because of the small, soft seeds. It is one of the best for the home garden, and a splendid market variety. Tender to extreme cold.

163. McDONALD—A blackberry-dewberry hybrid having all of the desirable characteristics in fruit of the best blackberries, but with imperfect flowers. It must be planted with some dewberries, or such black-

126. LOUDON—Long a dependable variety, and still one of the best for every purpose. Hardier than Cuthbert, but not so good in quality, and plants more subject to crown gall.

127. CUTHERBERT—This is the most largely grown of all red raspberries, and thrives over a great range of soils and climates. Berries of bright, attractive color; of rich flavor; productive; ripens mid-season.
128. EARLY KING—This is an extra early variety, ripening several days ahead of Cuthbert. It is a strong grower, producing many erect canes. Berries of fine size, bright red color; splendid flavor.

Everbearing Red Raspberries

128. ERSKINE—The fruit of this variety is very good, and the production continues more or less throughout the summer, with a fairly heavy crop in autumn. But the plant is very subject to crown gall and it is probable that we shall discard it after this season on that account.

DEWBERRIES

135. LUCRETIA—This is the best known and most widely grown of dewberries. The vines are trailing, and in colder climates need winter protection. Fruit early, jet black in color, of good size but somewhat insipid. A good pollinator for McDonald.

144. PREMO—A new variety, much like Lucretia, but ripening a week or ten days earlier. Fruit large, jet black, sweet and delicious and possessed of quality that makes it certain to meet with favor as a home and market variety.

144A. MAYES (Austin)—Characterized by its very large, black, highly flavored berries. One of the finest, and its canes are more upright in habit than most dewberries.

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

GRAPES—The Tonic Fruit

There's health in grapes. They are Nature's tonic fruits! A favorite with the folks in ancient times. More popular today than in any age. Grapes are the juice fruits de luxe. Grape juice, the most delicious of beverages, health-giving, refreshing, strengthening, nourishing. Liked by all. Splendid for the children.

No home yard is too small for at least one grape vine. Train it over the sunny end of the porch where its refreshing shade may be enjoyed on hot days—where the sweet aroma of the ripening fruits can float through the house—where you can eat the juicy fruits.

There is big money in growing grapes for market. The demand is constantly increasing and prices are mounting higher and higher. Grapes thrive almost anywhere, in any soil or any climate, and never disappoint in their abundant crops. Plant a few grape vines this year—have an abundant supply for home use, or market—enjoy the profits, enjoy the delicious juice, jam, and jelly you can make from them.

112. BRIGHTON—Bunch large, shouldered; berries medium large, dark red, tender, rich, sweet and of best quality. Vine vigorous and hardy. **30¢**

Price, 10 for \$2.50; each **30¢**

113. CAMPBELL EARLY—Black with purple bloom; bunch and berries large. Juicy with rich, sweet flavor; almost seedless; hardy and vigorous growth, and very productive. **30¢**

Price, 10 for \$2.50; each **30¢**

114. CONCORD—The most popular grape in America. They grow in full clusters of large berries, with a thin skin; flesh tender, sweet and juicy. Vine a strong grower and very hardy. Price, **15¢**

10 for \$1; 100 for \$7.50; 1,000 for \$50; each **15¢**

115. DELAWARE—One of the finest table grapes. Bunches not large; compact and well shouldered. Berries rather small, juicy and sweet, without any hard pulp. Price, 10 for \$2.50; 100 for **30¢**

\$20.00; each **30¢**

116. IMPROVED DELAWARE—Much larger and better grape than the Delaware. The vine is a hardy, vigorous grower. A very fine delicious table and market grape. **40¢**

Price, 10 for \$3.00; 100 for \$25.00; each **40¢**

117. IVES SEEDLING—Black. Bunch long, medium to large, compact; berries medium, skin thick and tough; flesh sweet. It is a good market variety and is highly esteemed for red wine. Vine hardy, very vigorous and healthy. A good shipper. Ripens medium late. Price, 10 for \$3.00; 100 for **40¢**

\$25.00; each **40¢**

118. MOORE EARLY—An extra large grape of extraordinary fine sweet flavor. Excellent for home use and one of the hardest for the far North, ripening about two weeks ahead of the Concord. Berries of large size; succeeds everywhere. A fine market

berry. Price, 10 for \$3.00; 100 for **35¢**

\$25.00; each **35¢**

119. NIAGARA—The very best white grape. Berries large, light greenish yellow; very fine for table use; very prolific, hardy and of fine flavor. Fruit keeps well, if properly handled. Price, 10 for \$3.00; 100 for **35¢**

\$25.00; each **35¢**

120. SCUPPERNONG—This variety is purely Southern, and is of no value to the Northern or Western states. The vine is free from all diseases; fruit never decays. Plant twenty to thirty feet apart in rows. Train on an arbor or trellis and never trim. The product is very large. **50¢**

and cultivation reduced to simple form. Price, each **50¢**

121. WORDEN—A splendid grape of the Concord type, larger, better quality and earlier. Vines vigorous, hardy and productive. A valuable market sort, especially for a local trade. Worden does not ship well as the berries have the fault of cracking when they become fully ripe. In spite of this, it is planted in a large way in the vineyard districts of the North. The fruit of Worden is of much higher quality, and, therefore, better for home use. Price, 10 for \$3.00; 100 for \$25.00; each **35¢**

Offer No. 1003

Special Concord Grape Bargain

Concord is the grandest general purpose grape grown. It is a home and market favorite, and continually increasing in popularity. In this offer, we send to you 500 fine 1-year-old vines—enough to plant a 1-acre vineyard—big enough to produce an income for you of \$200.00 year after year. Grapes are immensely popular. There always is a good market for the fruit at profitable prices. No fruit makes money for the grower so quickly and surely as grapes. You have never been offered better vines than we send to you for so little money.

500 Vines \$25.00

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

PLENTY OF BEAUTY FOR A COZY HOME

PRIVETS FOR HEDGES

Few things about the yard can be more attractive, or give greater satisfaction than a hedge of privet. It gives the grounds a charm not obtainable from wire or picket fences, and adds a touch of privacy and real charm. In the warmer parts of the South, privets are evergreen or semi-evergreen, but deciduous in the North. As fence for the yard, the privets are of great beauty; inexpensive to plant; endure for many years and are cheaply maintained. 951. CALIFORNIA PRIVET—Very vigorous grower. Foliage glossy green all summer, becoming deep purple in autumn. Not reliably hardy in the North. 950. AMOOR PRIVET—Evergreen in the South; hardy in the North. Forms a most attractive and durable hedge. When not trimmed closely, produces a profusion of lilac-like clusters of white flowers.

Offer No. 1020 Beauty Home Shrub Collection

FREE Sweet Scented Honeysuckle Vine
I want more folks to know about the fine ornamental shrubs that I am growing for the landscaping of home grounds. And just to introduce my shrubs to you, I am making you this genuine bargain offer of 10 lovely flowering shrubs for only \$6.50, and will give you, with each order and absolutely free 2 honeysuckle vines.

With these charming shrubs, you can landscape around your porch, or beautify a corner of your grounds, and create a real picture. The shrubs I will send you are of regular "landscape size" stock—nice and bushy, just the kind that are regularly used in landscape planting. Our supply of these shrubs is very limited. But just to introduce them as samples of our ornamental plants, in as many different localities as possible, we make this grand bargain offer. And with every order, we give 2 of our fine sweet scented honeysuckle vines absolutely FREE.

10 Beautiful, Flowering Shrubs
2 Bridal Wreath
2 Mock Orange
2 Golden Bell
2 Rose of Sharon
2 Weigela

Express Charges Collect

\$6.50

You always admire the homes of others, when the yard is gay with the beauty of flowers, shrubs and trees. You can make your yard just as pretty with the shrubs and flowers listed below. It will give you much pleasure. It will increase the value of your property. Just go through the following list shrubs, trees and hardy flowers, pick out the kinds you like and **SEND YOUR ORDER NOW**. In just a few weeks you will be enjoying the beauty of leaf and bloom, and set your home off most attractively.

ORNAMENTAL SHRUBS

901. ABELIA GRANDIFLORA (Glossy Abelia)—A beautiful evergreen shrub, hardy in this latitude, having dark green, glossy leaves, becoming bronzy in winter. Flowers white, funnel shaped, tinged with pink, borne in clusters; delicately scented.

902. ACANTHOPANEX PENTAPHYLLUM—A shrub of medium height, with long, slender branches; leaves deeply lobed; flowers greenish in umbels. Very ornamental and useful.

903. AMORPHIA FRUTICOSA (Indigobush)—A large, spreading bush with pinnate leaves; flowers in slender spikes, deep purple in color, coming in early or mid-summer.

907. BERBERIS THUNBERGII (Japanese Barberry)—A dwarf shrub with small leaves which turn to brilliant hues in autumn. Blooms inconspicuous but forming bright red berries that hang until late winter. Excellent for massing or for hedges, making an impenetrable hedge because of the thorniness of the branches.

910. BUDDLEIA (Magnifica), Oxeye Butterlybush—A most beautiful shrub, and one that should be widely planted for its profusion of bloom in late summer and autumn. Blossoms in long spikes, small sweet scented and very attractive to butterflies. The plant sometimes freezes back to the ground in the North, but comes up again from the roots.

912. CARYOPTERIS INCANA (Bluebeard)—Of vigorous growth, producing flowers of rich lavender or sky blue color in great profusion the entire length of the branches. The canes frequently die to the ground in winter, but come again from the roots.

913. CALYCANTHUS FLORIDUS (Common Sweetshrub)—A large, vigorous shrub having

decidedly ornamental foliage. The leaves and twigs are sweet scented when crushed or broken. Flowers in the axils of the leaves; deep chocolate colored and of spicy fragrance.

914. DEUTZIA GRACILIS (Slender Deutzia)—A splendid and useful low growing shrub of graceful form. In spring its canes are densely clothed with white star-shaped flowers.

915. DEUTZIA SCABRA CRENATA (Fuzzy Deutzia)—A sturdy, bushy shrub that is a mass of bloom in late spring. Flowers single, white.

916—DEUTZIA (Pride of Rochester)—The most popular of all the taller growing Deutzias. A splendid grower and a profuse bloomer. Flowers about half an inch long, very double; pure white, with the outer row of petals tinged with pink.

917. EXOCORDA GRANDIFLORA (Common Pearbush)—A vigorous growing shrub, becoming 6 to 10 feet tall. The blossom buds in spring, before they open into flowers look like pearls strung on slender threads. Flowers pure white.

917. FORSYTHIA SUSPENSA (Weeping Forsythia)—The very long, curving branches of this shrub adapt it to covering arches and trellises, where its bright blossoms light up the landscape with glistening masses of yellow in spring before the leaves appear.

919. FORSYTHIA VIRIDISSIMA (Greenstem Forsythia)—Canes tall and erect. Flowers rich yellow color with twisted petals. Foliage dark, rich green. The earliest of all shrubs to bloom.

920. HIBISCUS SYRIACUS (Shrub Althea)—Of the late summer blooming shrubs, there are none that equals the wealth of bloom or the grand array of colors afforded by the shrub altheas. We have a large number of sorts, some with double flowers, some with single, in white, red, lavender, and purple.

930. HYDRANGEA (Snowball)—One of the showiest of summer blooming shrubs. Grows about four feet high, the canes terminated by a gigantic, flattened snowball.

931. HYDRANGEA (Pee Gee)—Becomes a tree-like bush, often 10 feet tall. Branches terminated in late summer by immense panicles of snowball-like flowers, white at first, turning bronze.

935. KERRIA JAPONICA, (Kerria) (Corchorus)—A very bright and cheerful shrub of dwarf or medium growth. Its numerous, slender green canes are very attractive in winter. Its flowers are of bright yellow color, resembling half opened

rose buds.

940. LAGERSTROEMIA INDICA (Common Crape Myrtle)—Vigorous shrubs or small trees clothed with small, bright green, glossy leaves. The flowers, which appear in spring, are fringed and colored in different shades of white, scarlet and purple, and last for several days. Throughout the South, no other shrub is more satisfactory for general planting.

950. LIGUSTRUM AMURENSE (Amur Privet)—For massing as a background, this privet is unexcelled. It grows tall and very dense. Leaves dull green; blooms profusely in early

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Forsythia

ing bush unfolds its leaves very early in the spring, affording a contrast with those shrubs that bloom ahead of the leaves. Its flowers are of pinkish hue, followed by red berries.

953. MAHONIA AQUIFOLIUM (Oregon Hollyberry)—Grows about four feet high. Leaves compound, each leaflet resembling that of the holly. Canes terminated by panicles of yellow flowers, followed by blue berries. Evergreen in this latitude.

960. PHILADELPHUS CORONARIUS (Sweet Mockorange)—Strong, erect shrub, very popular everywhere. The flowers are very profuse, resembling in size and color that of the strawberry, and in fragrance, that of the orange.

965. PRUNUS PURPLELEAF PLUM (*Prunus pissardi*)—A tall tree-like shrub clothed with leaves of deep reddish purple color. Distinctly ornamental.

966. PHYSOCARPUS OPULIFOLIUS, (*Spirea opulifolia*) Common Ninebark—Growth upright, attaining 8 to 10 feet, although the white, heavy flowered umbels in June make the branches droop. Seed pods turn dark red; very striking in appearance.

967. RHAMNUS CATHARTICUS (Common Buckthorn)—A dense, twiggy bush 6 to 10 feet high, with dark foliage relieved by masses of attractive white flowers in mid-summer. May be trimmed as a hedge.

968. RHODOTYPHUS KERRIOIDES (Jet-bead)—A twiggy, dense shrub with attractive, serrate leaves. Twigs terminated by white flowers borne at intervals all summer.

969. RHUS CANADENSIS (Fragrant Sumac)—A low growing, native shrub having slender canes; foliage leaflets somewhat like that of a gooseberry. Flowers terminal, yellow, in small panicle; followed by red reddies. Especially attractive. In autumn when the leaves turn to a brilliant scarlet color. Native.

970. RHUS GLABRA (Smooth Sumac)—Grows about 6 feet high. Splendid foliage all summer, becoming brilliantly colored in autumn.

971. RHUS TYPHINA (Staghorn Sumac)—Sturdy grower, the branches covered with velvet like the new horns of a stag.

Anthony Waterer Spirea

974. SAMBUCUS CANADENSIS (American Elder)—This is the native elder of the wastelands. Beautiful when in flower, and much appreciated for its immense production of black, edible berries.

975. AMERICAN GOLDEN ELDER—Similar in habit of growth, but having foliage of bright yellow color.

977. SPIREA THUNBERGI (*Thunberg spirea*)—Dwarf shrub with very slender twigs and dainty foliage. Flowers white in early spring.

978. ANTHONY WATERER SPIREA—Low growing shrub with erect canes, each terminated by a flat topped cluster of pink flowers.

979. BILLARD SPIREA—Erect, becoming 6 feet tall. Flower clusters in panicle, bright pink.

980. VAN HOUTTE SPIREA—The most popular of all flowering shrubs, because of its great wealth of pure white flowers in spring.

985. SYMPHORICARPUS RACEMOSUS (Common Snowberry)—Inconspicuous rose colored flowers in June, followed by large clusters of milk-white fruits which remain far into the winter.

986. SYMPHORICARPUS VULGARIS (Coralberry)—Similar to the above, but with fruits of bright red color.

987. SYRINGA CHINENSIS (Chinese Lilac)—Grows 10 to 12 feet high; immense reddish purple panicles in late spring.

988. PERSIAN PURPLE LILAC—Medium grower, with slender leaves and bearing a profusion of purple flowers.

990. PERSIAN WHITE LILAC—The same, but with white flowers.

992. VIBURNUM DENTATUM (Arrowwood)—A beautiful shrub with bright green, heart shaped leaves, turning to purple and red in autumn. Flowers in flat topped clusters, creamy white, followed by black berries.

994. COMMON SNOWBALL—This popular shrub is too well known to need a description. Conspicuous in early spring because of its snow white balls of blossoms.

995. JAPANESE SNOWBALL—Flowers similar to the common snowball; leaves wrinkled and fuzzy.

996. WEIGELA ROSEA (Pink Weigela)—Tall, sturdy shrub, bearing a profusion of pink, trumpet-shaped blossoms in late spring.

997. EVA RATHKE WEIGELA—More dwarf in habit than the preceding. Flowers dark red. Late bloomer.

Van Houtte Spirea

FAYETTEVILLE - ARKANSAS

Plant a Garden of Hardy Flowers

For the beautification of the home grounds and for the supply of an abundance of lovely flowers for cutting there are none that have made such rapid strides into public favor as the Old Fashioned Hardy Garden Flowers. These afford the greatest range of colors and an abundance of sweet perfume throughout the entire summer. Every day in the Hardy Garden brings forth something new to interest and delight even the most critical, from the time the snow leaves the ground in spring until late fall when only hard freezing weather will stop such persistent bloomers as the hardy chrysanthemums, torchillies, etc.

Your landscape planting is not complete without a generous grouping of hardy perennials such as are listed below. While some kinds may be planted in the foreground of the shrub border, a better display will be had, and the plants will bloom more profusely if they are planted in a garden or border all by themselves. The following list contains only the popular, hardy sorts that are so very useful and so well liked everywhere.

Achillea

Yarrow

359. *Pearl*—The pure white, very double flowers of this plant are borne in great profusion the entire summer on strong, erect stems, 2 feet high. As a summer cut flower it is of great value.

Althea

Hollyhock

374. A. *ROSEA* (Hollyhock)—No Old Fashioned garden is complete without hollyhocks. We have a very select strain producing flowering spikes which become as much as 8 feet tall. Single and double flowers in many colors.

Aquelegia

Columbine

The Columbines are most elegant and charming hardy plants, producing their graceful, long-spurred flowers on stems rising 2 feet

or more above the beautiful, bluish-green foliage. 360. *Long Spurred Hybrids*—This is the most admired type of columbines because of the unusually large flowers that they produce, and the great range of color, which varies from creamy white to pink, lavender, blue and red.

360A. A. *CÆRULEA* (Colorado Columbine) Sturdy grower, producing large flowers with very long spurs.

Phlox

Sturdy grower, producing large flowers with

very long spurs.

361. A. *NOVA ANGELIE* (New England Aster)—Flowers in great profusion, as large as a silver dollar and of the deepest blue color, are produced by this plant in late summer. The canes become as much as 6 feet tall. It is the best blue flowered plant of its season.

Aster

Aster

361. A. *NOVA ANGELIE* (New England Aster)—Flowers in great profusion, as large as a silver dollar and of the deepest blue color, are produced by this plant in late summer. The canes become as much as 6 feet tall. It is the best blue flowered plant of its season.

Boltonia

Boltonia

362. B. *LATISQUAMA* (Violet Boltonia)—

The daisy-like flowers of this plant are produced in tremendous quantities in mid-summer. Each flower is about the size of a silver quarter and of a pinkish-violet color. Excellent for massing at the edge of shrubs.

363. C. *MONTANA* (Mountain bluet)—Grows 2 feet or more tall and bears a profusion of thistle-like flowers of violet blue color from July until fall.

Chrysanthemum

Chrysanthemum

Of the late blooming hardy garden flowers there are none that excel the charm of the hardy chrysanthemums. Their hardness enables them to endure the hard

freezes that usually arrive at about the time their blossoms are at their best. We offer the following splendid varieties:

331. *October Frost*—Pure white; excellent form. One of the earliest to bloom.

332. *Autumn Glow*—Flowers of rose-crimson color.

333. *Intensity*—Vigorous grower with fine stems and foliage. Color bright crimson.

334. *Golden Queen*—Rich yellow color and of grand form.

Coreopsis Coreopsis

364. C. *GRANDIFLORA* (Big Coreopsis)—Flowers 2 inches across, of rich golden yellow color and produced on tall, wiry stems; excellent for cutting. At the height of bloom during mid-summer, this plant is a mass of flowers. Excellent everywhere.

Dianthus Pink

Dianthus

365. D. *BARTATUS* (Sweet William)—This

is one of the most popular of hardy plants, very free flowering and producing a mass of charming flowers ranging in color from deepest red to white. This is an excellent plant to use for edging flower beds and shrub groups.

Gaillardia

Centaurea

Centaurea

366. C. *MONTANA* (Mountain bluet)—

Grows 2 feet or more tall and bears a profusion of thistle-like flowers of violet blue color from July until fall.

367. C. *PEONIAE* (Peony-flowered Centaurea)—

Flowers of various

colors, according to

the variety.

368. C. *GAILLARDIA* (Gaillardia)

Flowers of various

colors, according to

the variety.

369. C. *DELPHINIUM* (Delphinium)

Flowers of various

colors, according to

the variety.

370. C. *PHLOX* (Phlox)

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

This Spring plant a Garden of **Hardy Flowers**

[Continued]

Delphinium Larkspur

- 367A. *Belladonna*—A free and continuous bloomer with beautiful, light blue flowers in long, loose spikes. An old favorite.
367B. *Bellamosa*—This charming plant is a tall grower, producing spikes 3 feet or more tall. The flowers are of deep blue with lighter center.

Digitalis Foxglove

368. *Gloxinia Flowered*—The tall spikes of this plant are very lovely, and bear a profusion of thimble-like flowers of various shades of color.

Gaillardia Gaillardia

369. *GAILLARDIA ARISDATA* (Common Perennial Gaillardia)—A very showy bloomer, beginning to flower in July and continuing until frost. Flowers gorgeously colored with center of brown and petals marked with rings of crimson and orange.

Hibiscus Rosemallow

370. *Marvel*—A very sturdy perennial, producing strong canes 6 feet tall and bearing in the axils of the leaves great saucer-like flowers often 8 inches across. Colors range from white to deep red.

Hosta Plantainlily

378. *H. caerulea* (Blue plantainlily) (*Funkia*)—A favorite edging plant and among the easiest of all perennials to manage. Thrives in sun or shade and produces large numbers of flowers of deep blue colors on spikes well above the foliage.
378A. *H. plantaginea* (White Plantainlily) (*Funkia subcordata*)—Similar in habit to the preceding, but with large, heart-shaped leaves and white flowers.

Iris Iris

- The Iris is one of the most desirable and most popular of the early flowering perennials. The flowers possess a grace of form that is equaled in beauty only by some of the rarest orchids, and a perfume of delightful sweetness. We offer the following excellent varieties:

- Per doz., \$1.00; each... 15¢
380. *Dalmatica* (*Pallida dalmatica*)—One of the finest of the type, strong, vigorous habit, growing often to 4 feet high, with exceptionally fragrant, large flowers. Standards lavender; falls shaded with blue. Exquisite in every way.
380A. *Florentina*—An old favorite, producing a profusion of pure white flowers.
380B. *Honorabile*—Standards golden yellow, falls rich mahogany brown color.
380C. *Mme. Chereau*—Flowers of clear white color, handsomely feathered and bordered with blue. Edge wavy.
380D. *Mrs. Horace Darwin*—Standards white; falls veined with violet.

385. *IRIS KAEMPFERI* (Japanese Iris)—This lovely iris produces flowers of huge size and of marvelous richness of coloring and form. They come at a time when attractive flowers are particularly welcome. We have some choice varieties. Per doz., \$1.00; each... 15¢

Kniphofia Torchilily

389. *Bonfire Torchilily* (*Tritoma pfitzeri*)—This is one of the grandest of the torchillies, producing flowering stems 4 feet high, bearing great heads of bloom a foot long, of rich orange-scarlet color, shading to salmon-rose on the edge. Per doz., \$2.50; each... 25¢

**PRICES Except Where Noted
Strong Plants, Each 20c
Per Dozen \$2.00**

Paeonia Peony

Peonies are the most valuable and most beloved of all perennial plants. They give a grand display of majestic blossoms, rivaling the rose in grandeur of form, coloring and fragrance, and of much greater size. A favorite flower for memorial day. When once planted will endure for years, growing better with age. We offer the following grand varieties:

- 390A. *Festiva maxima*—Beautiful large, double white, with frilled petals and a bright cherry red spot in the center, borne on tall, stiff stems. This is the queen of the whites. Each... 50¢
390B. *Queen Victoria*—Flesh color fading to pure white. Very free bloomer. Each... 50¢
390C. *Edulis superba*—Bright mauve pink flowers of large size on stiff stems. Very fragrant; free bloomer. One of the best pinks. Each... 50¢
390D. *Golden Harvest*—Deep rose pink petals with creamy gold center. A much admired variety. Each... 50¢
390E. *La Tulipe*—Flowers delicate rose, fading to creamy white. This is an extra fine peony. Each... 50¢
390G. *Felix Crousse*—Deep ruby red. Very choice. Each... 80¢

Phlox Phlox

For mid-summer bloom few plants can compare in gaiety of colors with the hardy phlox. It is the showiest of all, and sure to bloom. We offer the following excellent varieties:

- 395A. *Miss Lingard*—A very fine pure white flower, beginning to bloom in June and continuing all summer.
395B. *Bridesmaid*—Pure white with large crimson eye.
395C. *Elizabeth Campbell*—Bright salmon pink with dark crimson eye.
396D. *Rheinlander*—Beautiful salmon pink.
397E. *Rijnstrom* (Rynstrom) — Bright carmine rose of great beauty.

Physalis Groundcherry or Lantern Plant

359. *P. franchetii* (Lantern Groundcherry)—An interesting perennial producing white flowers followed by green lantern-like pods which, in autumn, turn to a brilliant red. If the stems are cut, the pods dry and hold their color for months. Each... 25¢

Phyostegia False-dragonhead

356. *P. virginiana* (Virginia False-dragonhead)—One of the most showy of mid-summer flowering plants, forming dense bushes 4 to 6 feet tall, bearing spikes of delicate pinkish-lavender flowers not unlike giant heather.

Veronica Speedwell

397. *V. longifolia* (Beach Speedwell)—The showiest and best of the Speedwells; forms a bushy plant 2 to 3 feet tall, with long, dense spikes of deep blue flowers from the middle of July until fall. Each... 25¢

Yucca Yucca

398. *Y. filamentosa* (Common Yucca)—The broad, sword-like, evergreen foliage of this plant, and its 6-foot tall, branching spike of drooping, creamy-white flowers, makes this an effective plant 30¢ for all positions. Each

GLADIOLI FOR GARDEN GLORY

Gladioli are beautiful, they are grand. They are truly the flower for the millions and the millionaire. Every flower garden, no matter how small will glow with gladness when Gladioli are used. These lovely flowers are well fitted for all purposes, and make attractive displays either planted in masses or set in bunches of three or four among the perennials and annuals. As cut flowers, they last remarkably long in water, and develop perfect flowers from every bud on the spike.

349. **AMERICA**—A beautiful lavender pink. The flowers are of largest size and are borne on strong spikes 2 to 3 feet long. The spike is closely set with the beautiful blooms, which all face one way. This is a most popular variety for the garden and for cutting.

350. **PEACE**—Beautiful white flowers with pale lilac penciling on the two lower petals. An exceptionally fine flower.

351. **WAR**—Deep blood-red, shaded crimson-black; very tall and conspicuous. This is probably the best Gladiolus of this beautiful shade of red.

352. **NIAGARA**—A light crocus or primrose yellow, slightly tinted with rose pink in the throat; large, open flower on a strong spike. For color, texture and keeping qualities this is one of the very best varieties.

353. **MRS. FRANK PENDLETON**—One of the most exquisitely colored and formed Gladiolus in our entire lot. In addition, the size of bloom is not exceeded by any other. The color is a delicately flushed salmon pink, with a rich maroon blotch on the three lower petals.

355. **MARY FENNELL**—Produces a wide open flower of deep lilac or light

lavender, with a creamy yellow throat, the lower petals being penciled with yellow. A beautiful combination of colors, and a handsome flower.

355A. **GRETCHEN ZANG**—Soft shade of pink, blending into scarlet on lower petals. Spike tall and graceful.

355B. **LE MARECHAL FOCH**—Flowers of soft, delicate pink, a shade brighter than America; quite a number open at once. It is one of the earliest to bloom, and the flowers are of huge size.

354. **PRINCEPS**—Large amaryllis-like flowers of a rich, dark scarlet, with deep shadings in the throat and magnificent large white blotches on the lower petals.

Large Bulbs 10c Each; \$1.00 per dozen, Postpaid Except Where Noted.

356. **SUPERB MIXTURE**—Our Mixed Gladoli are made up from a very large number of the finest of named varieties and contain every conceivable color. We especially recommend this mixture to those who wish the largest range of coloring. Per dozen 65¢

Offer No. 1503

50

GLADIOLUS BULBS sure to bloom this year. We will pick out for you, from our finest varieties, many of which are not listed in this catalog, 10 big bulbs of each of 5 kinds, and send them to you postpaid for \$3.00.

\$3.00

SUMMER FLOWERING BULBS

CANNAS

CANNAS ARE THE MOST POPULAR BEDDING PLANTS

325. **THE PRESIDENT**—Height 4 feet. In color, a rich, glowing scarlet, and the immense, firm, rounded flowers, 7 inches across when open, are produced on strong, erect stalks well above the large, rich green foliage. Price, delivered, 25 for \$3.00;

5 for \$1.00; each

326. **BURBANK**—The color is a pure, strong, canary yellow, with some red spots in throat. The flower is often 4 to 5 inches across. Per doz., \$1.00; each 10¢

327. **KING HUMBERT**—The grandest Canna ever offered. Large heart-shaped leaves of purple maddened brown over bronze, the dark ribs sharply defined, crowned with immense heads of orchid-like flowers. Per doz., \$1.25; each 15¢

328. **WYOMING**—Seven feet, purple foliage. One of the most majestic Cannas. Blossoms orange colored, true orchid shape, with large rounded petals that flare and flutter in the breeze like glistening silken flags. Per doz., \$1.00; each 10¢

SPECIAL \$1.00 OFFER

329. We will make a selection of varieties for you for a complete Canna bed and will choose varieties that will please you. Will send you 20 bulbs for \$1.00, enough for a large bed.

TUBEROSES

346. One of the most delightfully fragrant and beautiful of the summer-flowering bulbs. By skillful management a succession of flowers may be obtained all the year 'round. Per doz., \$1.00; each

10¢

LILY

347. **LILIUM AURATUM** (Gold Banded Japan Lily)—The largest and most beautiful of all the Japanese lilies. The flower is ivory white, with a central band of bright yellow and numerous purple spots. Price, each

50¢

Lilium Auratum

Canna

CALADIUM

357. **ELEPHANT'S EAR**—The huge leaves of this plant are very attractive, giving the view a tropical appearance. A very pleasing effect is produced when these plants are set in front of cannas. Few persons in this climate have ever seen flowers on the Elephant's Ear, but the plants occasionally do bloom when the extra large size bulbs are planted. We have

been able to obtain a few of these extra large size bulbs, and while we do not guarantee that they will bloom, they are well worth trying, and the novelty of having an Elephant's Ear blossom is quite out of the ordinary. Price, Extra Large Bulbs, 50¢; Medium size

Dahlia

DASHEENS

348. Belong to the same family as the Elephant's Ear, and resemble them somewhat, but grow more upright. Price, postpaid, 3 for 50¢; each

20¢

DAHLIAS

The splendid qualities and gorgeous beauty of the present-day Dahlia have won for it a place at the head of the most important garden plants. None are easier to grow, respond more freely to care and attention, or grow more freely. Few cultivated plants have a wider range of color. Plant about May 1st in a moderately rich soil, covering the tubers three inches deep.

349. **MIXED DAHLIAS**—We have a very fine assortment of Dahlias of various colors and types, every one a grand bloomer and sure to please. While our supply of bulbs lasts we will send you, Postpaid, 6 excellent bulbs for 75¢; 12 bulbs for

\$1.40

LILY

347A. **L. TIGRINUM** (Tiger Lily)—One of the most popular of all the hardy garden lilies. Flowers of deep orange color, spotted with black. Thrives under nearly all conditions. Price, 4 for 75¢; each

25¢

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Hall Japanese
Honeysuckle

Vines For Porches and Arbors

250. **AMPELOPSIS** (Japanese Creeper; Boston Ivy)—A vine that clings to stone and brick walls to a great height. **40¢**
Popular; hardy. Each.
260. **BIGNONIA** (Trumpet creeper)—A robust, woody vine, climbing high and twining tightly, or clinging to wood, stone or brick. Flowers five inches long, great scarlet trumpets, much sought by humming birds, clustered at the ends of branches. In bloom nearly all summer. **30¢**
Each.
259. **BOUSINGAULTIA** (Madeira vine) Grows from tubers like potatoes. Will thrive in any soil or location. Splendid for the porch or over a window. Foliage fleshy, heart shaped. Blooms very freely in late summer, fragrant. Strong **10¢**
tubers. Each.
252. **CLEMATIS** (Jackman Clematis)—In mid-summer produces a profusion of immense flowers of rich violet-purple **75¢** color. A favorite everywhere. Each.
253. **SWEET AUTUMN CLEMATIS**—Forms a sheet of small white flowers in late summer. A lovely vine for **75¢** porch or pergola. Each.
251. **DIOSCOREA** (Cinnamon Vine)—Grows from a large root like a sweet potato; perfectly hardy and lives for years. A rapid grower; flowers small, fragrance of cinnamon. Good roots. **10¢**
Each.
254. **LONICERA** (Hall Japanese Honeysuckle)—A vigorous climber, profuse with white, deliciously fragrant flowers which turn yellow. Splendid for porch **50¢** planting. Each.
256. **TRUMPET HONEYSUCKLE**—The scarlet trumpet-shaped blossoms of this excellent climber are much loved by humming birds. If you are a lover of birds, plant one or more of these vines on your porch, pergola or fence and enjoy the delight of watching the daintiest of birds sip the sweet nectar from **30¢** the blossoms. Each.
257. **YELLOW TRUMPET HONEYSUCKLE**—Similar in habit of growth and form of blossom to the preceding. Blossoms of a yellow color and less ornamental than the Scarlet Trumpet. Each. **30¢**
258. **LYCIUM** (Matrimony vine)—A vine-like shrub that will grow anywhere, and is especially valuable for covering high, steep banks, or for use on low walls. The flowers are of a pinkish-violet, small but profuse. These are followed by fruits the size and color of cranberries which hang on for weeks in **30¢** the fall. Each.
255. **PUERARIA** (Kudzu-bean)—This is the most rampant grower of any vine that we have ever seen. In a single season it will produce runners fully seventy feet long. Its foliage is large and coarse and the stems very hairy. In the lower Gulf Coast region it is used as a forage and hay crop, but here we regard it as an ornamental vine. Strong plants. Each. **50¢**
261. **WISTERIA** (Japanese Wisteria)—A much loved vine for covering arbors and pergolas and appreciated for the long, pendant spikes of lavender colored, bean-shaped blossoms that **50¢** come in summer. Each.

Our Fair and Square GUARANTEE

We guarantee everything you buy from us to be exactly as represented, and to be satisfactory to you in every detail. You take no risk in ordering from us, for unless you are completely satisfied with your purchase, when the stock reaches you, and the saving you make when you buy from us, you may send the goods back and your money will be refunded.

PREMIER COLLECTION

50

**Two year Old
Apple Trees
Two Year Old
Peach Trees**

Take your choice of varieties—10 or more trees of a kind, making a total of 50 apples and 50 peaches, 100 trees in all. Every tree sent out under this Collection offer is of an extra select 2-year-old grade, 4 to 6 feet, big, heavy, husky, well branched, and chock full of vigor and vim. Trees you will be mighty proud of, and trees that will jump right into growth

and come into bearing surprisingly early. This Ozark Premier Collection is one of our biggest values. This is a GENUINE MONEY SAVER. The trees are worth twice what we ask for them. But we are sending out these extra select trees just as an example of how our high quality is combined with low price into making bargains of surprising merit. In years gone by we have made many excellent bargain offers on fruit trees of our own growing, but never in our 30 years of nursery business have we put out a bigger value in apple and peach trees than this.

For the commercial grower, who wants a few trees to fill in bare spaces, THIS OFFER IS A REAL GEM. For the suburban place or the farm, where a nice orchard of apples and peaches is desired, this offer simply can't be beat for quality and price. You will agree with us when you see the vigorous, fine trees you get in

this assortment. And every tree is sold on the fairest and squarest guarantee that can be put on trees.

Beautiful Roses For Your Garden

prematurely ripened and shriveled wood and small shoots, and cut back the longest and strongest shoots to 4 to 6 inches in length. When roses are treated in this manner they will grow and bloom all the better.

It would be impossible to exaggerate the beauty of the rose. The very name suggests beauty and fragrance. It is the flower we love the best and deserves all the affection and care we bestow upon it. To have roses all summer is now a possibility, even with but a small garden. Our list comprises reliable, hardy varieties, producing a large range of colors, which will bloom from spring till November. It is a question of careful selection and we will gladly assist you. Our roses are strong, field grown plants, produced under the most favorable of growing conditions and are certain to bloom freely. Roses for outdoor growing should be planted in a rich, well drained soil with full exposure to the sun. Roses do

not bloom well when planted in shady places. Teas and Hybrid Teas should be set about 18 inches apart and the Hybrid Perpetuals two feet or more apart. Do not put manure in direct contact with the roots. But after the plants are set, a liberal application of barnyard manure makes a most excellent dressing. When planting roses cut off all of the

225. AMERICAN BEAUTY—Large, globular, pink shaded with carmine; delicious odor.

226. ANNA DE DIESBACK—This rose was introduced in 1858 and is well known. It is a beautiful shade of carmine-pink; flowers are large, full and very fragrant. On account of its hardiness it's a fine garden sort.

227. CAROLINE TESTOUT (The Oregon Rose)—A large rose, especially adapted for table decoration. Deep pink in color, beautiful buds.

228. FRAU KARL DRUSCHKI—Pure white; large long buds, perfect form. It is the best white Hybrid Perpetual known and one of the best novelties of recent years. Will grow wherever other roses can be grown.

229. GRUSS AN TEPLITZ—Beautiful crimson red, wonderfully free-flowering. One of the finest for outside show.

230. GENERAL JACQUEMINOT—Bright crimson; large but not full, although very effective; hardy and fragrant. Famous the world over.

231. KAISERIN AUGUSTE VIKTORIA—Pure white, shading to lemon. Flowers large, fine formed, borne singly on strong, upright stems; continues beautiful even when fully expanded. The fragrance is distinct

from other varieties, being a combination of tea and magnolia. Free-flowering and vigorous, with glossy foliage.

232. KILLARNEY—Noted for its freedom of bloom and the large size of its intensely fragrant flowers. Buds are large, long and pointed. Color flesh, shaded white, suffused pale pink.

233. LA FRANCE—Probably the best known rose in cultivation. Both flowers and buds are of beautiful form and large size; very sweet; color delicate silvery rose, changing to silvery pink. Starts to bloom when very small and continues until stopped by frost.

234. MME. FRANCISCA KRUGER—Deep shade of copper-yellow flowers which bloom continuously. Excellent for bedding and massing.

235. MRS. JOHN LAING—Very free-flowering, commencing to bloom early in the season and continuing until autumn. Color a soft, delicate pink, with a satin tinge; very fragrant.

236. MARGARET DICKSON—Magnificent form, white with large pale, flesh center. Petals very large, well shaped and of great substance. Foliage very large, dark green. Fragrant. A fine variety.

237. MME. PLANTIER—Pure white, above medium size, produced in great abundance early in the season. One of the best hardy white roses, sometimes called the cemetery rose.

238. MME. GABRIEL LUIZET—Very distinct pink, large, cup-shaped; fragrant. It has no rival as an exhibition rose.

239. MARSHALL P. WILLER—Cherry carmine, large size, good

form, very fragrant, perpetual bloomer, vigorous grower; very valuable.

240. PAUL NEYRON—Deep red rose; splendid foliage and habit, with larger flowers than any other variety. Free bloomer.

This rose produces its blossoms at the ends of the long, straight canes that arise close to the bottom of the plant, and

is remarkable, not only for its freedom of bloom, but for its long, straight stems that are almost entirely thornless. For outdoor planting, Paul Neyron is one of the best of roses, and always rewards with a grand supply of the loveliest of roses.

241. SALET (Moss)—Bright rosy red; a

vigorous grower; an abundant bloomer, seldom surpassed; pretty in bud.

242. ULRICH BRUNNER—Bright cherry-red; very attractive; flowers of fine form

arising well upon the plant; petals of great substance; plant hardy, vigorous and resists mildew.

La France

PLANT ROSES

For Memorials, Wedding Anniversaries, Birthdays, Etc.

Roses speak a universal language. When words fail utterly in conveying the tender messages of sympathy or congratulation, roses are the flower of flowers that will carry the words in ways that reach the heart in fullness and beauty.

Use rose plants as gifts to friends. Plant them in your own yard to commemorate happenings which are dear to your own experience, and where you can gather the lovely blossoms for your own enjoyment and pleasure.

Roses are truly the "Queen of Flowers." And in spite of the wealth of bloom and beauty that is produced by the wonderful array of flowering shrubs and hardy perennials that we list in this catalog, none of them can compare in the soul-satisfying pleasure that is given by roses.

If you do not have room enough to have a real rose garden, you surely have room on your window sill for a rose bush in a pot.

Perkins

Climbing ROSES

243. CRIMSON RAMBLER—This is undoubtedly the most popular of all roses. It is hardy, wonderfully free-flowering, rich glowing crimson, intensely bright and vivid in color.

244. DOROTHY PERKINS—An extremely vigorous and hardy rose of the rambler type; a good companion for Crimson Rambler. It is shell pink in color, very free-flowering and entirely reliable. The plants are even harder than Crimson Rambler.

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Four Grand Monthly Roses

Enjoy the glorious beauty and sweet fragrance of these magnificent flowers. Plant them in your yard. They will bloom for you this season.

There is no flower more lovely than the rose—none with a greater host of admirers—none that brings the good cheer, the beauty, the delicate perfume of the rose. The very name itself is sweet with fragrance.

We want you to love roses just as we do, and to enjoy the beauty and satisfaction of having an abundance of these glorious flowers this very season. For that reason we are making you this very low price offer. The plants we send to you are extra strong, field-grown plants that are two years old. They are sure to bloom abundantly for you—better than any you have ever had before. That is just what we have grown them for. Plant these roses this spring. In just a few short weeks you will have roses ready to cut—glorious, fragrant beauties, roses you will love and cherish. And they will continue blooming for you all summer. What would be nicer?

Just think of the loveliness of the unfolding buds, and the open flowers that fill the air with their delicious perfume. Truly, a garden of roses is one of the greatest delights one can possibly have in his yard; a continual delight all season.

Here are the four popular colors—White, Pink, Yellow and Red, and the cream of the rose creation in each color. There are no better roses. Everyone is as nearly perfect from every standpoint as can be had. All are perfectly hardy, even in very cold climates. They will grow anywhere, but respond best when given a light, rich soil, sunny location and abundant moisture during dry weather.

SEND TODAY FOR THIS BARGAIN IN ROSES. You are certain to declare it the best investment you have ever made in flowers.

tea roses, and is admirably suited for strong growers, and produce in profusion flowers of excellent substance, rivaling the beauty of the well known Marechal Niel.

GRUSS AN TEPLITZ—Brilliant red in color, and one of the most astonishingly free bloomers of roses. It is constantly in bloom from early spring until freezing weather. The flowers are of large size, exquisite in gorgeous coloring, totally unlike any other red rose.

Incomparable in its sweet fragrance. Perfectly hardy everywhere.

KAISERIN AUGUSTE VIKTORIA—This is the grandest white Hybrid Tea rose in existence. It is a very strong, sturdy grower, needing an abundance of room. It has become the most popular of all white roses, because of the immensity of its blossoms, the continuous blooming from early spring until fall, and the perfection of opening buds and fully expanded flowers. This lovely rose is unexcelled for cutting, and is perfectly hardy everywhere. There is nothing finer among roses than this grand variety.

Asparagus

CULTURE—As early in the spring as the soil will work up in good shape, sow seeds thinly in drills on foot apart. When the seedlings are two to four inches tall, thin them out to stand 2 or 3 inches apart in the row. Keep the rows free from weeds by frequent cultivation. The following spring prepare your permanent beds by applying plenty of well-rotted manure and some coarse salt which should be worked into the soil. Set your plants in shallow trenches, 6 inches apart in the row and do not cut the first year. Those who war asparagus more quickly should set 2-year-old plants, obtainable from us.

400. BARR'S MAMMOTH—The stalks are very large, sometimes an inch in diameter and retain their thickness completely up to the top and have long heads. They are quick growing, tender and of excellent quality. Postpaid; oz., 15¢; $\frac{1}{4}$ lb., 40¢; pkt. 10¢

401. COLUMBIAN MAMMOTH WHITE—This excellent variety furnishes shoots of exceptionally large size and of superior tenderness and flavor. Color pure white until 4 or 6 inches above the surface. Postpaid; oz., 15¢; $\frac{1}{4}$ lb., 40¢; pkt. 10¢

Palmetto 400; pkt. 10¢

402. PALMETTO—A very early maturing and prolific variety, producing an abundance of early, large, deep green shoots of best quality. Postpaid; oz., 15¢; $\frac{1}{4}$ lb., 40¢; pkt. 10¢

Crisp Vegetables For Your Own Garden

Healthful; Nutritious; Necessary. Food experts, scientific investigators, dietitians are united in their acclaim that vegetables—lots of them—should be a part of the daily diet. In vegetables, Nature has put many properties, of vital importance in maintaining health, and which do not exist in foods of animal origin. Grow vegetables to eat, to can and to sell. Cut your food costs with garden crops. Plant a garden this year.

DWARF OR BUSH BEANS

Ask for Quantity Prices

CULTURE—Beans are tender, and should not be planted until all danger from frost is past. No time is gained by planting them before the ground becomes warm. Drop the beans two or three inches apart, in rows standing eighteen inches or two feet apart; cultivate only when dry; draw the soil slightly toward them. They will make green beans in six to eight weeks; sow every two weeks for a succession, if seasonable, up to September. Please write for prices in larger quantities than quoted below.

403. BLACK VALENTINE—A great improvement over the old standard early Red Valentine, being one-third longer, with pods perfectly round and straight and of excellent quality. It also has the additional advantage of being suitable for both early and late planting and is extremely hardy. It will withstand early and late frost, an excellent shipper, large yielder, and of very handsome appearance. Postpaid; lb., 35¢; pkt. 10¢

Not postpaid; 10 lbs., \$3.00.

404. BURPEE'S STRINGLESS GREEN POD—Surpasses all other bush beans in crisp, tender qualities and fine flavor. For

the home garden one of the best in its class. The pods are round, of good size, strictly stringless, and continuous bearing for a long time. Matures early. Seed brown. Postpaid; lb., 40¢; pkt. 10¢

Not postpaid; 10 lbs., \$3.50.

405. DWARF BLACK WAX—A very superior snap-short, ripening first among the earliest, and having the best characteristics. Pods round, yellowish white, fine flavor. Postpaid; lb., 40¢; pkt. 10¢

Not postpaid; 10 lbs., \$2.50.

406. DWARF GOLDEN WAX—Pods are long, large, brittle and entirely stringless, and of a beautiful rich golden wax color. Postpaid; lb., 35¢; pkt. 10¢

Not postpaid; 10 lbs., \$2.50.

407. EXTRA EARLY RED VALENTINE (Round Pod)—A valuable sort for home garden and shipping. Pods are usually ready to pick in about forty-three days from germination. Vine erect, pods medium length, curved, cylindrical, with creases in back; very fleshy; crisp and tender. Postpaid; lb., 35¢; pkt. 10¢

Not postpaid; 10 lbs., \$2.50.

408. GIANT STRINGLESS (Green Pod)

—A very hardy stocky vine, pods long, round and green in color, of exceptionally fine

quality and stringless throughout its entire growth. About a week earlier than Red Valentine and much more prolific. Seed yellow. Postpaid; lb., 40¢; pkt. 10¢

Not postpaid; 10 lbs., \$3.50.

409. REFUGEE OR 1000-TO-1—Splendid quality. Extremely productive. Highly

esteemed for late planting and for canning and pickling. Pods long, cylindrical, green becoming white, streaked with purple as they mature; of good quality as

snaps. Seed long, light drab, thickly dotted and splashed with purple. Postpaid; lb., 35¢; pkt. 10¢

Not postpaid; 10 lbs., \$2.50.

410. KING OF THE GARDEN LIMA—The old standard market and family sort. Vine

begins to produce pods at the foot of the pole and the bearing season continues until frost. Pods large, and well filled, with beans of mammoth size. Postpaid; lb., 40¢; pkt. 10¢

Not postpaid; 10 lbs., \$3.00.

411. KING OF THE GARDEN LIMA—The old standard market and family sort. Vine

begins to produce pods at the foot of the pole and the bearing season continues until frost. Pods large, and well filled, with beans of mammoth size. Postpaid; lb., 40¢; pkt. 10¢

Not postpaid; 10 lbs., \$3.00.

412. HENDERSON BUSH LIMA—Valuable on account of extreme earliness. Ex-

tremely productive, tender and delicious. The dry beans are small and white. Postpaid; lb., 40¢; pkt. 10¢

Not postpaid; 10 lbs., \$3.00.

413. BURPEE'S BUSH LIMA—The bush form of the Large White Lima. The bush

is about 20 inches high and up to two and a half feet in diameter bearing

from 50 to 100 large pods. Postpaid; lb., 40¢; pkt. 10¢

Not postpaid; 10 lbs., \$3.00.

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Pole Beans

Ask for Quantity Prices

Pole Beans are even more sensitive to cold and wet than the Dwarf varieties, and should be sown two weeks later. After settled warm weather, set poles four to eight feet long in rows four feet apart and extending north and south, the poles being three feet apart in the row. Around each stake plant five to eight beans two inches deep.

One pound will plant 100 hills.

410. KENTUCKY WONDER—Vine vigorous, climbing well and very productive, bearing its pods in large clusters; pods green, very long, often reaching nine or ten inches; near round when young and very crisp. Best pole bean for home garden and market. Postpaid; lb., 40c; pkt. 10c

Not postpaid; 10 lbs., \$2.50.

411. WHITE CORNFIELD—Extremely early, very productive; pods are borne in clusters of from four to six, broad, thick, solidly fleshy and stringless. Postpaid; lb., 35c; pkt. 10c

Not postpaid; 10 lbs., \$2.50.

412. WHITE CREESEBACK—Extremely early, very productive. Pods are borne in clusters from 4 to 6 broad which are solid, fleshy and stringless. Well adapted for shipping to distant markets. Seed white. Postpaid; lb., 35c; pkt. 10c

Not postpaid, 10 lbs., \$2.50.

Beets

CULTURE—Sow as soon as the land will permit, and for a general crop about the middle of April; sow in drills 15 inches apart and thin out to four inches; for winter use, sow the turnip variety about July.

416A. DETROIT DARK RED—A splendid deep red turnip beet, with small upright tops, early maturing and makes nice round finely-shaped roots. One of the finest for early market or home use. Postpaid; lb., 25c 1/4 lb., 25c; oz., 15c; pkt. 5c

417. ERYTHRINE BLOOD TURNIP—Here we have the old standby, the turnip beet, with its dark red color, well known to so many homesteads. Postpaid; lb., 25c; 1/4 lb., 25c; oz., 15c; pkt. 5c

418. ECLIPSE—An extra early variety, with round, smooth blood-red roots. Matures very early and is popular both for market and home garden. Postpaid; lb., 25c; 1/4 lb., 25c; oz., 15c; pkt. 5c

419. EGYPTIAN EARLY DARK RED—A very early, dark blood-red, medium size, tender and sweet; fine for kitchen garden. Postpaid; lb., 25c; 1/4 lb., 25c; oz., 15c; pkt. 5c

420. LONG SMOOTH BLOOD RED—When fully developed roots average 10 inches long by 3/4 inches in diameter at the top. They are almost parsnip-shaped, have firm, sweet, very dark flesh and make ideal pickles. Postpaid; lb., 25c; 1/4 lb., 25c; oz., 15c; pkt. 5c

421. SWISS CHARD OR SPINACH BEET

—Grown exclusively for the numerous fleshy tender leaves and leaf stalks. The mid-rib is cooked and served like asparagus, the leaves the same as spinach. The plants sometimes grow to a height of two feet. Swiss Chard should have a prominent place in all gardens. Valuable for greens for chickens by cutting the stem and the leaf. Postpaid; lb., 25c; 1/4 lb., 25c; oz., 15c; pkt. 5c

Brussels Sprouts

424. PERFECTION—This is the best variety for the South, grows almost two feet high and produces from the stem numerous little sprouts, one to two inches in diameter, resembling cabbage. Postpaid; oz., 25c; pkt. 5c

Mangels or Stock Beets

Ask for Quantity Prices

Mangels or Stock Beets are a splendid winter feed for cattle and hogs. Increases the milk yield from cows. Puts animals in better physical condition. Yield larger crops than turnips and are of greater feeding value. The best root food in existence for all kinds of livestock. Over forty tons have been grown on a single acre. No more profitable crop can be grown for stock and hog feed. Every farmer should plant one or two acres every year. No other acre on the farm would return better dividends. Under favorable conditions 40 tons per acre can be grown, and in feeding value this is equal to 130 bushels of corn. Root food helps to keep stock in a healthy condition, besides affording a variety of feed. All stock raisers and farmers should investigate the great food value of Mangels.

Try them and be convinced.

CULTURE—Much depends on good culture, so prepare your land thoroughly and plow deeply. Sow from about the middle of March until the middle of June, and give thorough cultivation. After the first cultivation, thin out, so as to stand six inches apart in the row, and cultivate like corn. If late in planting soak the seeds for 24 hours before planting. Do not begin feeding Mangels until after January first. Plant six pounds to the acre in rows 2 1/2 feet apart.

422. LONG RED—The largest of all Mangels and the heaviest cropper. The roots grow about 1/4 out of the ground and frequently measure two or more feet in length by six inches in diameter. An excellent keeper, nutritious and milk producing. Postpaid; lb., 60c; 1/4 lb., 20c; oz., 15c; pkt. 5c

Not postpaid; 5 or 10 lbs. at 50c per pound.

423. WHITE FRENCH SUGAR—A strain of beets very desirable for stock feeding, affording not only a very large crop, but exceedingly rich in sugar and other nutritive elements, and is a much better beet for stock feeding than the small sugar beet. The roots average ten to twelve inches, and the outline is that of a broad, thick wedge. The upper portion is of a soft, bright pink, shading lighter toward the bottom, where the lower portion for about one-third the length is white. Postpaid; lb., 60c; 1/4 lb., 20c; oz., 15c; pkt. 5c

Not postpaid; 5 or 10 lbs. at 50c per pound.

Cabbage

CULTURE—Good drainage, plenty of manure on rich, heavy loam, and frequent cultivation are essential to success in cabbage-growing. For the early sorts sow the seeds in the fall and when the plants are a month old, transplant to cold-frames, setting them down to the first leaves. Sow also in January and February and transplant 2 to 3 feet apart in the rows, according to variety planted. For late variety, sow from the middle to the last of spring and transplant when 4 to 6 inches high.

425. ALL SEASONS—One of the best of its class. Ready for the market only a few days later than the Early Summer and is much larger. The heads are firm, solid, and of good flavor. Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

426. CHARLESTON OR LARGE WAKEFIELD—Splendid strain of Jersey Wakefield, about a week later, with heads twice as large, weighing from 8 to 12 pounds each and more, and not so pointed as the original Charleston Wakefield; is a good keeper and may be planted as a second crop, to mature in autumn, if desired. Much used by market gardeners to follow Jersey Wakefield; a first rate shipper, and in great favor with everybody who knows it.

Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

427. COPENHAGEN MARKET—The heads are nearly round or slightly flattened, very hard and heavy. The growth is compact, there being few outside leaves, so the plants may be set close together. Copenhagen Market heads as soon as Jersey Wakefield cabbage. The most remarkable point about this cabbage is its uniformity—every plant under normal conditions will produce a good, solid head, and every head is as like another as two peas in a pod. The heads mature all at the same time so the crop can be cleaned up within a short time after the first heads mature. A very profitable cabbage to grow for market and an excellent variety of the home garden.

Postpaid; lb., \$2.75; 1/4 lb., 85c; oz., 30c; pkt. 10c

428. DANISH BALLHEAD or HOLLANDER—Heaviest cabbage for its size we have ever grown; exceedingly solid and hard; handsome; very hardy, a sure header, a good seller and one of the finest keepers, making it particularly desirable for shipping long distances. Our stock is grown by the most careful and experienced growers in Denmark, where the finest Ballhead Cabbage in the world is grown. Ours is the true short-stemmed Ballhead.

Postpaid; lb., \$2.75; 1/4 lb., 85c; oz., 30c; pkt. 10c

429. EARLY DWARF FLAT DUTCH—Has succeeded admirably on account of its ability to resist heat. Never flaws under the severest sun, and produces very fine heads after the earliest sorts have disappeared. We recommend it highly.

Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

430. EARLY JERSEY WAKEFIELD—Market gardeners can find nothing better for an early cabbage. Heads somewhat pointed, extremely solid, superior quality.

Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

431. LARGE LATE DRUMHEAD—A standard fall shipping sort. Makes a large, round, firm head, uniform in shape and color, which seldom bursts or rots. With good cultivation heads attain a weight of 20 to 30 pounds, and are of the finest quality. Sureness in heading and regularity in growth has made this one of the most popular sorts for winter keeping. The quality, either for slicing, for kraut or for general table use is unsurpassed.

Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

432. DRUMHEAD SAVOY—Best and largest heading of the Savoy Cabbage. Few people seem to know the delicious flavor of Savoy Cabbage. Far superior to the flat-leaved sorts, and as tender as cauliflower, after frost. Should be in every garden.

Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

433. LATE FLAT DUTCH—Grows to large size; flat, solid heads; a sure header, good keeper and shipper.

Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

434. MAMMOTH RED ROCK—Largest and surest heading red cabbage. Plants are large with numerous spreading leaves. Head is large, round, very solid, and of a deep red color. Ninety-eight per cent of the plants will form extra fine heads. Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10c

Our reputation for highest quality and lowest prices on nursery stock and seeds, extends from coast to coast.

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE — ARKANSAS

Frost Proof Cabbage Plants

Our Frost Proof Cabbage Plants are tough, hardy, and mature from three to five weeks earlier than hotbed grown plants. They are cheaper to buy, easier to grow and more certain to head satisfactorily than plants of your own growing. Our plants are all produced from select strains of seed in the open field

on the Gulf Coast. They are sturdy, husky and when planted in your garden, will survive a hard frost with no damage whatever. You can plant them fully three weeks ahead of home-grown plants, and have mature cabbages just that much earlier. They are the ideal plants for market gardeners to use.

Make Money Raising Horseradish

There are few vegetable crops that will make money for you any faster than Horseradish! Profits running into very large figures are easily possible. Some of our customers are making more than \$1,600 an acre from horseradish and are hardly able to keep up with the demand for this delicious condiment. There is an active market for horseradish near every good size town or city. If you are looking for some crop that you can grow on a small acreage and make big money from it, we suggest that you try horseradish, and especially so if you live near a large city. The roots are always salable on wholesale produce markets and to grocery stores. But the largest profits come when the roots are washed clean, grated, mixed with vinegar and sold to grocery stores, butcher shops and restaurants. Then you get the best profits. Our book "Horseradish Profits" tells just how to grow the crop and how to make money out of it by grating and bottling for a high class trade. With the instructions given in this little book, you can increase your income. In fact, many persons have built up a good and profitable business by growing and selling horseradish as indicated in this little book. A copy of this book is sent free, as indicated in the offer below.

Plant It For Quick Profits

146. MONEYMAKER HORSERADISH — A new variety that is proving to be a veritable gold mine to market gardeners. It produces large roots very quickly; grates into a pulp of splendid texture and excellent pungency. Because of its quick maturity, growers can get Moneymaker onto the market when the prices are best. Plants, 10¢ each; \$1.00 per dozen;

6 00
per
100

With every order for 100 roots we send copy of our booklet on Horseradish culture, which tells how to make money from this crop.

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Chinese Cabbage

435. CHINESE or CELERY CABBAGE—A new vegetable from China that is attracting much attention. By tying up the large outer leaves it blanches like celery. As a salad it rivals the finest lettuce, or cooked like cabbage or spinach, it makes splendid greens. For main crop sow the seed last of August, and transplant a foot apart when large enough. Postpaid; lb., \$2.50; $\frac{1}{4}$ lb., 75c; oz., 25c; pkt. 10¢

Chinese
Cabbage

COLLARD

A plant bearing a large mass of leaves on the top of a stout stalk. A species of cabbage, and the flavor is the same. It bears leaves all through the winter, and is used especially in the South for cabbage greens. Young plants may be started in boxes in early spring, and the young plants transplanted, allowing plenty of room for each plant. Set 14x18 inches.

437. TRUE GEORGIA—Grows from 4 to 5 feet high, and forms a very large, loose head. Leaves are tinged with purple. Postpaid; lb., \$1.75; $\frac{1}{4}$ lb., 50c; oz., 20c; pkt. 10¢

CARROTS

CULTURE—For early crops sow in spring, as soon as ground can be worked, in drills 15 inches apart; cover seed one-half inch; thin plants to three or four inches in rows.

438. DANVER'S HALF LONG—A rich orange red variety, very smooth and handsome. An excellent market variety. The most desirable main crop variety. Good keeper. Postpaid; lb., \$1.20; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. 5¢

439. GUERANDE, or OX-HEART—A good variety on soils too hard and stiff for the longer-growing sorts. Root is short, very thick, and has a small tap-root; flesh bright orange color, fine grained and sweet flavor. Postpaid; lb., \$1.20; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. 5¢

440. LONG ORANGE—Best late variety for general field culture. It keeps very well, and is therefore excellently adapted for winter use. Postpaid; lb., \$1.20; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. 5¢

CAULIFLOWER

Although one of the most delicious vegetables, is but little grown except by professional gardeners, because of the erroneous notion that it is so difficult to grow that only skilled gardeners can produce it. Anyone will be reasonably certain of success with this most desirable vegetable. Can be grown in the South as easily as Cabbage. All they need is rich soil and plenty of water. Planted both in the spring and in the fall. After the heads begin to form draw the leaves over the top and tie them to protect from the sun which will bleach the heads. Heads should be cut for use as soon as they are hard.

442. EARLY DWARF ERFURT—A remarkably sure heading Cauliflower. Of dwarf habit with short outside leaves. The heads when ready for market are of medium to large size, curd white; deep and of finest quality. Gives excellent results for either home garden or market. Postpaid; $\frac{1}{2}$ oz., 65c; pkt. 20¢

443. EARLY SNOWBALL—Undoubtedly the finest variety ever introduced. Produces beautiful snow-white heads of finest flavor. Postpaid; $\frac{1}{4}$ oz., 65c; pkt. 20¢

If you want to live better for less money, plant a good garden

CELERY

Celery seed is slow to germinate and ample time must be given. Sow thinly, cover lightly and keep constantly moist. Count on about 7,500 plants per ounce, or $\frac{1}{4}$ pound per acre. When the seedling plants are 3 inches high, clip for stocky growth, or else transplant.

White Plume

GOLDEN SELF-BLANCHING, or PARIS GOLDEN

—The best market variety, especially for early crop. The plant is naturally golden yellow (both stem and leaves), but needs to be blanched to make it brittle and fit for table; rather small bunch. French grown. Postpaid; oz., 85c; $\frac{1}{2}$ oz., 60c; pkt. 10¢

445. WHITE PLUME—A comparatively easy variety to grow, as it is fairly hardy, and being naturally white, is easy to blanch. The leaves are also white, tinged with green at tips. Forms a medium size bunch, fairly tall; early. Postpaid; oz., 25c; $\frac{1}{2}$ oz., 15c; pkt. 10¢

CELERIAC

446. Produces a tuber somewhat like a turnip and top like celery. It is largely grown for the purpose of flavoring soups. Postpaid; $\frac{1}{4}$ lb., 80c; oz., 25c; pkt. 10¢

SWEET CORN

CULTURE—Plant in hills 3 feet apart; leave 2 or 3 plants to the hill where ground is strong.

Offer No. 1525

“Suburban Home” GARDEN COLLECTION

Cut down the cost of living by growing your own food. Here are 23 of the finest varieties of vegetables, enough to give the home kitchen a full supply of good things all summer long. Every one a dependable sort, preferred by critical gardeners.

The total cost of this collection, if bought at regular list prices is \$3.10. You get it here postpaid to your door for **\$2.50**

447. COUNTRY GENTLEMAN or SHOE-PEG—A well-known medium-early sort. Very productive. Market gardeners who supply hotels and high-class restaurants depend on this for main crop. Postpaid; 5 lbs., \$1.35; lb., 35c; pkt. 10¢

Golden Bantam

448. EARLY ADAMS—While not a sweet corn is usually classed with them. The ears are well filled. It can be planted earlier than sweet corn. The stalks grow about 6 feet high on good land, bearing 2 or 3 medium size ears of white grains of excellent quality. A very popular roasting ear corn. Postpaid; 5 lbs., \$1.25; lb., 30c; pkt. 10¢

449. GOLDEN BANTAM—A very early sweet corn with golden-yellow grains. Generally considered the sweetest and tenderest variety in existence. Probably more extensively grown than any other early variety. Ears 6 to 7 inches long. Postpaid; 5 lbs., \$1.35; lb., 35c; pkt. 10¢

450. MAMMOTH WHITE CORY—One of the largest and best extra early sweet corns. Each stalk furnishes two or more large, fine-shaped ears. The ears are twelve-rowed, very symmetrical and handsome. The grain is large, broad, very white and of remarkably good quality for such an early sort. Postpaid; 5 lbs., \$1.25; lb., 30c; pkt. 10¢

451. STOWELL'S EVERGREEN—Standard main crop variety, excelling all other late sorts in productiveness and fine quality. The most popular canning variety. Our stock was grown for us by one of the most careful growers. Postpaid; 5 lbs., \$1.35; lb., 35c; pkt. 10¢

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

CANTALOUPES

Ask for Quantity Prices

CULTURE—The soil for Cantaloupes must be light, rich and sandy for if grown on a heavy soil the quality will be poor and they will not be so early. When danger of frost is over drop 8 or 10 seeds in a hill, 6 feet apart each way, covering about 1 inch deep. As soon as they commence to run thin out to 3 or 4 best plants in a hill and cultivate until the vines cover the ground. The seed can also be planted in drills, and when plants are large enough thin out to about 2 feet in the row. If slow to fruit, pinch off the ends of the growing shoots. The best way to prepare the grounds for cantaloupes is to list the rows 6 feet apart opening up a furrow and putting barnyard manure in the furrow, then cover up. This should be done at least 30 days before the seed is planted so as to give the manure time to rot in the ground.

490. SALMON-TINTED 10-25 POLLOCK—Beautiful salmon color netted and ribbed; oval in shape. Most delicious flavor and elegant shipper. Small seed cavity and flesh solid and crispy. Does exceedingly well on most soils but reaches its best on light sandy loams. Postpaid; 1 lb., 10¢ \$1.40; 1/4 lb., 45¢; 1 oz., 15¢; pkt. 10¢

491. GENUINE ROCKY FORD—A sweet, luscious melon that has grown world famous.

The Rocky Ford has proven to be the most valuable cantaloupe. The vines are exceedingly healthy and vigorous, bearing an enormous quantity of fruits during the entire season. The color of the skin is of a rich greenish-gold; the netting is prominent and light in color; appear-

ance very attractive. The flesh is very deep, ripening clear to the rind, very solid, yet thoroughly melting and it has an exceedingly small seed cavity. It is very sweet and luscious. Postpaid; 1 lb., 10¢ \$1.40; 1/4 lb., 45¢; 1 oz., 15¢; pkt. 10¢

492. LARGE HACKENSACK—Very large, green-fleshed melon. Vines hardy, vigorous and productive. Fruits nearly round, usually somewhat flattened; ribs large and of irregular width, densely covered with coarse netting. Flesh green, thick, coarse, but juicy and sweet. Postpaid; 1 lb., 10¢ \$1.40; 1/4 lb., 45¢; 1 oz., 15¢; pkt. 10¢

493. BANANA—An entirely distinct variety, bearing long slender banana-like fruit. Flesh deep salmon color, thick, and of good quality. Postpaid; 1 lb., \$1.65; 1/4 lb., 50¢; oz., 20¢; pkt. 10¢

494. HONEY DEW MELON—The delicious honey-like flavor of this new melon has created a sensation wherever used. Of good size, weighing 6 to 8 pounds; light cream-colored, smooth skin with thick, rich and sweet flesh of light green color. The rind is thin but tough and so close that the rich flesh is practically sealed up where it keeps in finest condition for several months after it is ripe. Postpaid; 1 lb., \$1.65; 1/4 lb., 50¢; oz., 20¢; pkt. 10¢

AN ACRE OF STRAWBERRIES

Make \$500 the first year. You can do it. Strawberries are Big Money Makers. They excel any small fruit in the big profits and quick returns they yield. We will start you in strawberry growing, sending you

5,000 Klondike Strawberry Plants

for only \$17.50. This is enough plants to set an acre. Plant them this spring. Next spring reap the rich harvest that is possible. They will establish you in a profit-making business of your own. Klondike Strawberry is the Great Money-maker of the Southwest. The plants we send you have been grown on new ground and are full of vigor—just the kind the commercial grower must have. Order this Offer today and save money. Set the plants this spring and make money.

5,000 Klondike Plants \$17.50
By Express, Collect

CUCUMBERS

Ask for Quantity Prices

CULTURE—Cucumbers should not be planted until the ground gets warm, unless you are prepared to protect them during the cold storms. Plant in hills 6 feet apart each way, enrich the hills with a quantity of decomposed manure or packing house fertilizer; scatter 10 or 15 seeds on each hill, cover one inch deep and press the soil firmly over them; thin out to three or four plants to the hill; never allow any of the fruits to ripen on the vine, as they will cease setting fruit as soon as seed commences to mature.

452. THE DAVIS PERFECT—An excellent variety both for outdoor and forcing purposes; unequalled for shape, quality, color and productiveness. Postpaid; 1 lb., \$1.25; 1/4 lb., 35¢; 1 oz., 15¢; pkt. 5¢

453. EARLY CLUSTER—Vine vigorous, producing the bulk of the crop near the root and in clusters. Fruit short, with uniformly thick end, dark green, but paler at blossom end. A very productive sort. Postpaid; 1 lb., \$1.35; 1/4 lb., 45¢; 1 oz., 15¢; pkt. 10¢

454. EXTRA LONG GREEN—Very productive; fruits quite long, averaging 10 to 12 inches in length. Very popular both as a slicer and for pickles. One of the best general purpose cucumbers. Postpaid; 1 lb., \$1.50; 1/4 lb., 45¢; 1 oz., 15¢; pkt. 10¢

455. IMPROVED EARLY WHITE SPINE—Valuable for the home garden as well as for early market. Under favorable conditions the fruits reach a length of 7 inches. They are borne early and in good numbers. Of uniform shape, almost cylindrical and

fairly well covered with small white spines. Postpaid; 1 lb., \$1.35; 1/4 lb., 45¢; 1 oz., 15¢; pkt. 10¢

456. JAPANESE CLIMBING—This is a strong and vigorous grower; fine for pickling. Postpaid; 1 lb., \$1.50; 1/4 lb., 50¢; 1 oz., 20¢; pkt. 5¢

457. SHORT GREEN PICKLING—Known as Early Frame, and is an excellent sort, both for table use and for pickling. Comes into condition for use a little later than Early Cluster. Postpaid; 1 lb., \$1.35; 1/4 lb., 45¢; oz., 15¢; pkt. 10¢

EGG PLANT

CULTURE—The seed should be planted in hotbed or box in the house, care being taken that the plants have an even, continuous heat. They do not respond to a setback very readily. Transplant only vigorous plants when the weather is warm.

458. BLACK BEAUTY

—The best early market variety. Also the best for home use. Fully ten days earlier than the New York Improved, very attractive in appearance and entirely spineless. The fruits set freely and develop quickly, so that the entire crop can be gathered before frost. Postpaid; 1/4 lb., \$2.00; oz., 60¢; 10¢

459. NEW YORK IMPROVED SPINELESS—Our selected strain of this popular sort has no superior. The most beautiful, as well as edible, of the many varieties of egg plant. A well grown specimen never fails to take the premium at the fair. Absolutely spineless. Postpaid; 1/4 lb., \$2.00; oz., 60¢; pkt. 10¢

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

ENDIVE

486.B. MAMMOTH GREEN CURLLED—A beautiful and valuable variety. Superior to any other. Grows 15 to 20 inches in diameter. Leaves are very crisp, tufty and full. Extremely hardy, equally suitable for spring, summer or autumn planting. Postpaid; lb., \$1.25; 1/4 lb., 40c; oz., 15c; pkt. 5¢

HERBS

Varieties marked with an * are perennials.

461. ANISE	Used for seasoning and garnishing	10c
462. *BALM	Leaves used medicinally	10c
463. BASIL, SWEET		10c
464. BORAGE	Leaves are used as a salad	10c
465. *CARAWAY	Seeds used medicinally and in bread	10c
466. CORIANDER	Seeds used for flavoring	10c
467. DILL	Leaves used with pickles, seeds for flavoring soups and vinegar	10c
468. FENNEL, SWEET	Seeds for flavoring; leaves for garnishing	10c
469. *HOREHOUND	Has medicinal qualities	10c
470. *LAVENDER	Its flowers are used in the manufacture of oil and distilled water	10c

472. ROSEMARY	Leaves used for seasoning	10c
474. SAVORY	Leaves used for stuffing and sauces	10c
475. *THYME	For seasoning	10c
476. *WORMWOOD	Beneficial for poultry	10c

KALE

477. SIBERIAN—Popular boiling-greens for fall, winter, and spring. Very popular in the South. Quite hardy and deserves more general cultivation in the North. Postpaid; lb., \$1.25; 1/4 lb., 40c; oz., 15c; pkt. 10¢

KOHLRABI

478. EARLY WHITE VIENNA—Also called "Turnip-Rooted Cabbage." Forms large turnip-like bulbs on the stem above the ground. Should be used while young and nutritious. Culture same as for early cabbage. Very much sweeter than turnips. Postpaid; 1/4 lb., 60c; oz., 20c; pkt. 5¢

Kohlrabi

LETTUCE

CULTURE—Lettuce thrives best in light, very rich, moist soil, but does well in common garden soil enriched with rotten manure. For first crop sow in gentle heat in February, and transplant to ten inches apart. May be sown thickly and cut when plants are very young. For a summer supply sow thinly in shallow drills in a cool, partially shaded place, in rich soil, and thin to a foot apart.

480. BIG BOSTON—One of the most popular of the old standard varieties; desirable for forcing. Especially valuable for early outdoor planting or for late fall planting as it will endure cold weather conditions better than any other variety. Large compact heads of light green leaves, tender and crisp. Postpaid; lb., \$2.50; 1/4 lb., 60c; oz., 25c; pkt. 10¢

481. BLACK SEEDED SIMPSON—A superior variety; large, light colored heads. Postpaid; lb., \$2.00; 1/4 lb., 40c; oz., 15c; pkt. 5¢

482. CALIFORNIA CREAM BUTTER—A reliable heading variety. The heads are a rich, creamy yellow inside and of a tender buttery flavor. Outer leaves green, spotted brown. Medium early and withstands the summer heat. Postpaid; lb., \$1.30; 1/4 lb., 40c; oz., 15c; pkt. 5¢

Ozark Brand Lawn Grass Seed

483. This mixture is far better than straight Blue Grass. It is made up mostly of Blue Grass and White Clover and some other grasses that will grow rapidly and make a fine showing immediately. The coarser grasses will protect the Blue Grass until it gets well established.

The Kentucky Blue Grass and White Clover will eventually drive out the other grasses and make a fine lawn. This mixture is as good as we can make it and we have had a number of years' experience with grass seeds. Full directions for making and care of lawn on each package. Sow one pound to 150 square feet. Put up in neat colored cartons and in bulk.

In bulk,
10 lbs. \$5.00

483. EARLY CURLLED SIMPSON—Early; forms a compact mass of tender leaves of a yellowish green color. Postpaid; lb., \$2.00; 1/4 lb., 60c; oz., 20c; pkt. 10¢

484. IMPROVED HANSON—In table quality the Hanson is perfection itself, being free from bitter taste. Forms immense, tender, crisp heads that remain long in good table condition. The outer leaves are large and broad, blistered and crumpled with frilled edges. Probably more largely grown than any other variety. Postpaid; lb., \$2.25; 1/4 lb., 60c; oz., 20c; pkt. 10¢

485. MAY KING—Of quick growth and produces large, handsome heads with few outside leaves. Color light green, outer leaves folding closely, producing round, solid heads 6 to 7 inches in diameter. Splendid for market gardeners or private use. Postpaid; lb., \$2.00; 1/4 lb., 60c; oz., 15c; pkt. 5¢

Grand Rapids

486. PRIZE HEAD—Plant large, deep green, so washed with red as often to appear more red than green, forming a head of a dense mass of leaves rather than one like a cabbage. Postpaid; lb., \$2.25; 1/4 lb., 60c; oz., 20c; pkt. 10¢

486-A. GRAND RAPIDS—Especially adapted for greenhouse culture, being the best variety of its kind for this use. Can also be grown outdoors early in the spring or late fall. Makes a large compact bunch of curled and fringed leaves. Grows very fast and keeps for a long time after being cut. Postpaid; lb., \$2.50; 1/4 lb., 75c; oz., 25c; pkt. 10¢

487. PARIS WHITE COS, ROMAINE OR CELERY LETTUCE—Has no equal for quality. Forms long, conical heads which, if tied up, blanch pure white and make solid heads as crisp as celery stalks. Postpaid; lb., \$2.00; 1/4 lb., 60c; oz., 15c; pkt. 5¢

CORN SALAD

507-A. For spring salad or garnishing, a good substitute for lettuce or spinach. Does not do well in hot weather. Should be planted as early as possible in spring. Ounce plants 30 feet in row. Postpaid; 1/4 lb., 50c; oz., 15c; pkt. 5¢

LEEK

479. BROAD LONDON FLAG—Belongs to the onion family, but does not form bulbs. The long thick neck of the plant is blanched in the fall and used same as young onions, having a sweet onion-like flavor. Popular in the South, but little known in the North. Postpaid; 1/4 lb., 60c; oz., 20c; pkt. 5¢

MUSTARD

503. LARGE SMOOTH LEAVED—Has a large, fleshy leaf. The flavor is mild and it is quite slow in sending up its seed stalk, remaining a long time fit for table use. Postpaid; lb., \$1.00; 1/4 lb., 35c; oz., 10c; 5¢

504. SOUTHERN GIANT CURLLED—Highly esteemed for salads, particularly in the South. Leaves are twice the size of the ordinary white mustard; flavor sweet and pungent. Postpaid; lb., 75c; 1/4 lb., 35c; oz., 10c; 5¢

505. WHITE MUSTARD—The leaves are rather small and smooth. The seed is larger than that of other mustards, of light yellow color and are used in pickling for family use. The seed of this variety is used in making "ground mustard." Postpaid; lb., 75c; 1/4 lb., 30c; oz., 10c; 5¢

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

OKRA OR GUMBO

Ask for Quantity Prices

CULTURE—When the ground has become warm, sow thickly in drills 2 feet apart, and when large enough, thin out to 8 inches apart in the rows.

506. MAMMOTH LONG POD—Plant of medium height, producing beautiful long, slender, deep green pods, which remain tender a long time. Postpaid; lb., 5¢; 65¢; ½ lb., 25¢; oz., 10¢; pkt. 5¢

507. WHITE VELVET—Plant of medium height, bearing a large crop, of white smooth pods, which retain their tenderness until nearly full sized. Postpaid; lb., 65¢; ½ lb., 25¢; oz., 10¢; pkt. 5¢

ONIONS

Ask for Quantity Prices

CULTURE—Onions are raised in two ways, from seed and from sets. Seed sown in early spring produces ripe onions in the fall, while sets planted at the same time make green "bunching" onions in a few weeks and dry ripe onions in July or earlier. Sets may be put out in the fall and will produce green onions much earlier than when set out in the spring. To raise good onions from seed the land must be rich and in fine condition. Sow the seed as early as possible in rows 14 inches apart. Weed as soon as the onions appear and keep well cultivated all through the season. Seed may also be sown in a hot bed or greenhouse in February or March and the onions transplanted to the open ground when warm enough. The finest onions are raised in this way.

508. IMPROVED YELLOW GIANT—Succeeds everywhere, whether grown for home use or marketing it gives universal satisfaction, yielding onions often 14 inches around. Easily grown. Postpaid; lb., \$2.25; 65¢; oz., 25¢; ½ lb., 10¢; 15¢; pkt.

509. LARGE RED GLOBE—Medium early; grows to a large size; skin deep red, flesh fine grained, mild and tender. Postpaid; lb., \$2.25; 65¢; oz., 25¢; ½ lb., 10¢; 15¢; pkt.

510. LARGE RED WETHERSFIELD—The old standard sort; best for main crop. Large deep red, thick, nearly round, fine grained, pleasant flavored and productive. Ripens in September and keeps well. Postpaid; lb., \$2.25; 65¢; oz., 25¢; ½ lb., 10¢; 15¢; pkt.

511. PRIZETAKER—The Prizetaker Onion has proved itself to be the greatest acquisition in years, and is by far the handsomest, most productive and largest of all yellow globe onions. Always grows to a uniform shape, which is a perfect globe; has a very small neck and ripens up without stiffness of the neck. In market it never fails to attract attention on account of its immense size and its beauty, and is sure to bring a far better price than any other onion. It is even more attractive in appearance than the large Spanish Onions sold on the city fruit stands; in fact, it takes the place of that variety. Postpaid; lb., \$2.25; 65¢; oz., 25¢; ½ oz., 15¢; pkt. 10¢

512. WHITE SILVER SKIN—Matures early; rather flat in shape, mild flavor; excellent for winter; very much esteemed for pickling when small. Postpaid; lb., \$2.25; 65¢; oz., 25¢; ½ oz., 10¢; 15¢; pkt.

513. ONION SETS. Bed and yellow 60 cents gallon, P. P. White 70 cents gallon, P. P.

BERMUDA ONIONS

Bermuda onions are largely grown in the South and have been there a most profitable investment. They are planted there in the fall and shipped North in May and are the earliest large new onions on the market. Growers do equally well with them in the North. They are the quickest growing onions known, sown at the same time as Silver Skin they will produce fully grown bulbs, about 3 inches in diameter, when the others are only 1 inch large. The seed we offer are genuine Teneriffe grown.

514. WHITE BERMUDA—The bulbs are quite broad and flat in form. The color is not a clear white but rather a pale straw; flesh crisp, solid and mild. Early ripening. Postpaid; lb., \$1.25; 65¢; oz., 25¢; ½ oz., 10¢; 15¢; pkt.

515. RED BERMUDA—Similar in form and early ripening to the Bermuda White but grow larger in size, ranging from 3 to 4 inches in diameter. Very flat and of a light pink color. The flesh is white, slightly suffused with pink; very mild. Postpaid; lb., \$1.25; 65¢; oz., 25¢; ½ oz., 10¢; 15¢; pkt.

516. CRYSTAL WHITE WAX—This new variety is a large, pure white flat onion. The earliest and most popular onion with the large growers in the South. Produces the mildest and sweetest onions of them all. Very fine for slicing, the color being so clear and pure. Postpaid; lb., \$1.25; 65¢; oz., 25¢; ½ oz., 10¢; 15¢; pkt.

USE BERMUDA ONION PLANTS

517. BERMUDA ONION PLANTS—The Bermuda Onion has made Texas famous. Train loads of this superior onion have been shipped from Texas every year. Planted extensively in the South for home use and for market and brings the highest price on all markets. Can be grown successfully wherever sets are grown. By setting out our plants early as you do sets you can have onions quicker and at lower cost than from sets. The plants make much better onions as the sets have to rot before making into onions requiring much longer time to mature and is not nearly so large after spending its strength in rotting.

The plants we are offering are the Crystal White Bermuda, the sweetest of all Bermuda varieties. Postpaid; per 1,000, \$3.50; 200 up to 1,000, 40¢ per 100:

50¢
Per 100

Large Red Wethersfield

PARSLEY

Parsley is used as a garnish for meats and salads and also adds a pleasing flavor to soups. Soak seed for several hours previous to sowing in warm, hot water, which will facilitate germination. Leave soaking for about 6 hours. Sow in border or frame. Thin rows to 8 inches each way. Use one ounce of seed to 150 feet of drill.

518. DOUBBLE CURLY—Standard variety, curled leaves, finest quality. Postpaid; lb., 90¢; ½ lb., 30¢; oz., 15¢; pkt. 10¢

PARSNIPS

CULTURE—Sow in early spring, in rows 2 to 3 feet apart; thin to 4 to 6 inches in the row. A packet will sow about 40 feet of drill, an ounce about 200 feet, 4 to 5 pounds per acre in drills 2½ feet apart. Cover the seed ¼ inch. Ready to use in about 80 days or may be stored in the cellar for winter use or left in the ground all winter and dug when weather permits.

519. HOLLOW GROWN—Best for table use; a vegetable of merit easily raised and of great productiveness. Postpaid; ½ lb., 50¢; oz., 15¢; pkt. 10¢

PEAS

Ask for Quantity Prices

CULTURE—Sow in earliest spring and make successive plantings every ten days until June 1. In the latter part of August sow early peas for an autumn crop. Drill 1 to 2 inches deep in rows 2½ to 4 feet apart. In the field use no sticks. In garden culture sow in double rows 10 inches apart, and use supports for the tall growing varieties.

520. EXTRA EARLY ALASKA—Of remarkable earliness and hardiness. A good yielder and produces pods of good size and dark green color, which are well filled with round smooth peas of splendid flavor. Postpaid; 10 lbs., \$3.50; lb., 40¢; pkt. 10¢

521. AMERICAN WONDER—Vigorous, producing vines, with a luxuriant foliage, and producing the leaves on one side of the stalk; growing from nine to twelve inches high. On account of its dwarf habit of growth it is very desirable for private garden use. Pods are light colored, straight, round, about two and one-half inches long and blunt at the end. Fit for picking fifty-five days from planting. Seed is wrinkled, green, medium in size and square at the ends. Postpaid; 10 lbs., \$3.25; lb., 35¢; pkt. 10¢

522. FIRST OF ALL—A reliable early cropper of the hardy smooth seed and variety. Not quite as early as Alaska, but great improvement over its parent, old Philadelphia. Postpaid; 10 lbs., \$2.50; lb., 35¢; pkt. 10¢

523. NOTT'S EXCELSIOR—A dwarf variety and a good one. The vines are more vigorous than American Wonder, growing 12 to 15 inches in height; is very desirable as a second planting. Postpaid; 10 lbs., \$3.25; lb., 35¢; pkt. 10¢

524. TELEPHONE—A vigorous grower; extra large, well filled pods. Postpaid; 10 lbs., \$3.25; lb., 35¢; pkt. 10¢ Alaska

525. WHITE MARROWFAT—Grows 4 to 5 feet in height. Pods large, round, light green and well filled. Excellent for summer crop. Postpaid; 10 lbs., \$3.00; lb., 35¢; pkt. 10¢

What Folks Say About Our Fruit Trees

FINE CONDITION

I received the 12 fruit trees last week, and I want to say I never received any in any better condition.—J. N. Hodgin, North Carolina.

SURPRISED AND PLEASED I received the 10 trees which I ordered on the special coupon, and was very much surprised and pleased with the fine varieties and nice stock.—E. Fatten, Illinois.

HAD GOOD ROOTS

We received our trees and are well pleased with them. They certainly had fine roots, and were in good shape when received.—C. K. Jenkins, Kansas.

PEPPERS

CULTURE—Sow in early spring in a hotbed in shallow drills 6 inches apart. In order to make strong, healthy plants, they should be transplanted when a few inches high into another bed. For later plants, drill the seeds in a warm place in the garden about the middle of spring, and transplant the seedlings when 2 inches high. Set the plants in rows about 18 inches apart and a foot apart in the rows. The pepper delights in a rich, warm soil, and should be well cultivated.

531. LONG RED CAYENNE—Bright red fruits, 3 to 4 inches long, very hot. Postpaid; $\frac{1}{4}$ lb., \$1.50; oz., 50c; **10¢**

Chinese Giant

532. NEW CHINESE GIANT—The largest mild pepper. On account of its earliness, productiveness and large size, truckers have found this a most profitable variety. Flesh unusually thick, mild and sweet. Postpaid; $\frac{1}{4}$ lb., \$1.50; oz., 50c; **10¢**

Pimento

533. SWEET BELL, or BULLNOSE—A very large pepper of square shape, mild, thick and hard. Suitable for stuffing and for mixing pickles. Less pungent than other sorts, and notwithstanding its size, one of the earliest. Postpaid; $\frac{1}{4}$ lb., \$1.50; oz., 50c; **10¢**

534. PIMENTO PEPPER—This is a sweet pepper—that is the difference—one which you will enjoy eating in salad, either fresh or canned. Canners and market gardeners are planting Pimento largely. Very thick flesh, wonderful mild flavor. Postpaid; $\frac{1}{4}$ lb., **10¢**

\$1.75; oz., 50c; pkt.

PUMPKINS

Pumpkins can be easily grown among a crop of sweet or field corn, or wherever there is room for the vines to spread. In the small garden they can be grown along the fence row where the vines can climb over the fence without interfering with other crops. The hills should not be closer than 10 feet apart to give the vines room to spread. The fruits should be cut from the vine, leaving the stems attached to the fruit. Store them in a warm, dry place. One ounce of seed will plant 25 to 50 hills according to the size of the seed.

520. KENTUCKY FIELD—Large round, flattened; hardy and productive. One to two feet in diameter. It has thick flesh of extra fine quality and is a splendid sort for canning, family and market use, and is used largely for stock feeding. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 25c; oz., 10c; pkt. **5¢**

Small Sugar

521. LARGE CHEESE—Best for canning; has heavy, thick, sweet meat; large round flattened variety, with creamy-buff skin. An excellent keeper and very productive; good quality. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 25c; oz., 10c; pkt. **5¢**

522. SMALL SUGAR OR PIE—A handsome prolific variety; fruits of small size, averaging about ten inches in diameter, of excellent keeping qualities, flattened and slightly ribbed. Skin deep orange, yellow flesh, fine grained and sweet. Postpaid; lb., \$1.00; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. **5¢**

Offer No. 1015

250 STRAWBERRY PLANTS

THE BARGAIN WORTH WHILE

Strawberries! The very word is fragrant and delicious. The most luscious of spring fruits. Loved by everyone, and never better than when picked fresh from your own garden. This Offer will bring you just enough plants to make a nice sized patch. We will select for you 3 spring bearing varieties of the choicest fruits for home use and 1 of the best ever-bearing sorts. With this assortment, you easily can have an abundance of fruit for every home need. You can begin picking berries from the everbearing kind this very season, and next spring gather gallons and gallons of crimson goodness. Just think of the deliciousness of the berries with cream and sugar, and of your own make of "sun-kissed preserves." Send for the plants today.

RADISHES

CULTURE—The soil for radishes should be light, rich and well pulverized, as their mild and crisp qualities depend much on their rapid growth. For very early use, sow in mild hotbeds in January, and in open ground as soon as the ground can be worked; for succession, sow at intervals of ten or twelve days; they also do well sown in the fall.

535. **CHINA ROSE WINTER**—Distinct, handsome variety of winter radish; skin deep rose color, flesh pure white, solid, of fine flavor; good keeper well into spring. (Very large size and shape roots). Ready for use in about 40 days. Postpaid; lb., 85c 1/4 lb., 30c; 10¢ oz., 15c; pkt.

536. **CRIMSON GIANT**—A large-sized extra early turnip radish. Grows quickly, and even when it attains large size, remains tender and of fine flavor to the last. A money-maker for the market gardener. Its bright crimson color makes it a seller on first sight. Postpaid; 1/4 lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

537. **EARLY SCARLET TURNIP**—A small, round, red, turnip-shaped radish with a small top and of quick growth. An early variety of rich color, crisp and tender. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

538. **EARLY SCARLET TURNIP, WHITE TIP**—A most popular and attractive variety, a great favorite in many large markets. The radish is bright scarlet, with white tip and of a beautiful shape; flesh white, crisp, and finely flavored.

Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

539. **EARLY WHITE TURNIP**—Very handsome; of quick growth; sweet, juicy and tender; skin ivory white, flesh pure white. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

540. **FRENCH BREAKFAST**—A fine forcing radish, maturing in twenty days from germination; makes very little top, and may be cultivated very close together. It is oval-shaped, skin bright scarlet, but tipped at the end with pure white. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

541. **LONG SCARLET**—It grows 6 to 7 inches long, half out of the ground. It is very brittle and crisp, and quick growth; color bright scarlet. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

542. **LONG WHITE ICICLE**—The finest white radish grown. Long slender root which remains tender and crisp until grown. Matures early, has small top which permits close planting. Considered by many to be the finest radish. Plant every 10 days for succession. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

543. **LONG WHITE LADY FINGER**—Beautiful in shape; skin and flesh are pure white, very crisp and tender; a most rapid grower and long standing. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

Early Scarlet Turnip white radish grown. Long slender root which remains tender and crisp until grown. Matures early, has small top which permits close planting. Considered by many to be the finest radish. Plant every 10 days for succession. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

544. **WHITE ICICLE**—A long, slender, white radish, very crisp and tender; a most rapid grower and long standing. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

545. **WHITE LADY FINGER**—A long, slender, white radish, very crisp and tender; a most rapid grower and long standing. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

546. **WHITE TURNIP**—A small, round, white radish, very crisp and tender; a most rapid grower and long standing. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

547. **WHITE TURNIP, LONG**—A long, slender, white radish, very crisp and tender; a most rapid grower and long standing. Postpaid; lb., 85c; 1/4 lb., 30c; oz., 15c; pkt. 10¢

548. **GENUINE HUBBARD**—The well-known winter squash so largely grown throughout the country. Large size, dark green in color, hard shell, thick deep orange flesh of the highest quality. An excellent winter keeper, none better. Postpaid; lb., \$1.50; 1/4 lb., 50c; oz., 15c; pkt. 5¢

549. **LIGHT WHITE BUSH, or PATTY PAN**—The best early variety. Plants are of true bush form and produce fruit very early in the season. Largely grown in the South for shipment to Northern markets. Postpaid; lb., \$1.40; 1/4 lb., 50c; oz., 15c; pkt. 5¢

550. **YELLOW SUMMER CROOKNECK**—Plants are very productive and early-bearing; skin of fruit very thickly warted and of orange-yellow color. Postpaid; lb., \$1.40; 1/4 lb., 50c; oz., 15c; pkt. 5¢

551. **DELICIOUS**—A squash of exceptional merit for table use. A fall and winter variety. The fruit varies in shape and size, weight ranging from 5 to 10 pounds each. Rind very thin, uniformly green; flesh very thick and dark orange color. Postpaid; lb., \$2.00; 1/4 lb., 60c; oz., 20c; pkt. 10¢

Our big 32-page complete Planting Guide FREE with seed order amounting to \$2.00.

RHUBARB OR PIEPLANT

CULTURE—Sow the seed in cold frame in the spring and as soon as the plants are large enough transplant into rows 5 feet apart each way, and each spring work into the soil a liberal supply of decomposed stable manure. One ounce of seed will grow 75 feet of row.

545. **RHUBARB** is vigorous and productive. The leaf stalks are very numerous, the longer ones being from 15 to 20 inches in length, and fully 1 1/2 inches wide. The whole plant is nearly 5 1/2 feet in diameter, while the leaves, exclusive of the flower stalks, are about 2 1/2 feet in height. Rhubarb is very highly esteemed for use in pies, tarts, jelly and marmalade, and large quantities are sold in all markets every year. It is the first vegetable of the season and no garden should be without it. Postpaid; 1/4 lb., 90c; oz., 30c; pkt. 10¢

RHUBARB ROOTS—Rhubarb roots are set out and cultivated as the above, and this method gives edible rhubarb in a very short time.

SALSIFY OR VEGETABLE OYSTER

A delicious vegetable for winter use. Should not be used before frost and it is improved by remaining in the ground during freezing weather. Sow in shallow rows 18 inches apart early in the spring and let it grow all summer. One ounce of seed to 100 feet of drill.

546. **MAMMOTH SANDWICH ISLAND**—The best white variety. Large and strong growing, with long, smooth, white, tapering roots and less liable to branch than any other kind. Postpaid; 1/4 lb., 75c; oz., 25c; pkt. 10¢

SPINACH

Salsify

Cultivated very extensively for "greens." A profitable crop for market. Select a rich well-drained soil, highly manured. For a succession sow early in April and again in May in drills 1 foot apart and 1 inch deep, properly thinning out when the plants are an inch in the leaf. For early spring use sow early in autumn and protect the plants with a light covering of leaves or straw.

547. **BLOOMSDALE (SAVOY)**—Earliest and best of all. The leaves are numerous, curled and wrinkled. Postpaid; lb., 60c; 1/4 lb., 25c; oz., 10c; pkt. 5¢

547A. **NEW ZEALAND**—The habit of growth is quite different from other plants, becoming quite bush-like in form. The tender growing tips are cut and used in the same way as other kinds of spinach. This variety endures hot weather, and makes a very strong growth during the summer. The more it is cut, the better it grows. Postpaid; lb., \$1.00; 1/4 lb., 45c; oz., 20c; pkt. 10¢

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

TOMATOES

Ask for Quantity Prices

CULTURE—For early crops sow in January and February in pots and boxes, and place near a window or in spent mild bedded; keep well watered; when plants are three inches high transplant into another frame, to remain until ready for planting out; this makes them strong and stocky. If you wish the first fruits that set to ripen quickly, pinch off the tops of vine and later fruit shoots; all vining varieties ought to be staked and tied up.

553. DWARF CHAMPION—A purplish-pink variety, forming a strong, erect, bushy plant. Often sold as a tree tomato. Fruit smooth, medium sized, solid and good flavor. Desirable for forcing, as it can be planted close to the grass and more closely on the bench than the tall-growing kinds. Postpaid; $\frac{1}{4}$ lb., 90c; oz., 30c; $\frac{1}{2}$ oz., 15c; pkt. **10¢**

Stone

553. GLOBE—One of the newer sort of unquestionable merit. In season of maturity it closely rivals June Pink, perfecting its first fruits within a week after that recognized standard for earliness. But the fruits are very much handsomer, being nearly round, with a skin free of blemish, filled with solid meat. Globe is unusually prolific. Fruits are borne in clusters of 4 to 6 and frequently 5 clusters are carried by well developed plants of finest table quality. **10¢** Postpaid; $\frac{1}{4}$ lb., 90c; oz., 30c; $\frac{1}{2}$ oz., 15c; pkt.

554. JOHN BAER—An extra early tomato; large, smooth, bright scarlet fruit of excellent quality. Short vigorous vines enormously productive. Fruits larger and smoother with less seeds than the Earlianana but somewhat later. Plants are compact in growth with short close-jointed branches setting fruit very freely in the center. Postpaid; $\frac{1}{4}$ lb., \$1.00; oz., 35c; $\frac{1}{2}$ oz., 20c; pkt. **10¢**

555. LIVINGSTON'S BEAUTY (Color Purple)—One of the oldest and still very popular in the great shipping centers for reason of its being always exceptionally smooth and uniform in size. One of the best main crop sorts. Postpaid; $\frac{1}{4}$ lb., 90c; oz., 30c; $\frac{1}{2}$ oz., 15c; pkt. **10¢**

556. PONDEROSA—The fruit ripens early and bears well until very late; very solid, almost seedless; of good sub-acid flavor and of immense size, frequently weighing considerably more than two pounds. Postpaid; $\frac{1}{4}$ lb., \$1.10; oz., 35c; $\frac{1}{2}$ oz., 20c; pkt. **10¢**

557. SPARKS' EARLIANA—One of the earliest, medium size, of the purplish-pink color, very prolific, fruits forming almost in clusters. Very handsome in shape, quite solid, and of fine quality. Very popular for early market. Postpaid; $\frac{1}{4}$ lb., 90c; oz., 30c; $\frac{1}{2}$ oz., 15c; pkt. **10¢**

558. STONE—The Standard bright red main crop throughout the country. Solid as a rock, heavy as a stone; as sweet as any tomato can be; these are a few of the points that put Stone in a class of its own. A great favorite with canners on account of its solidity and the great crops which it yields. Postpaid; $\frac{1}{4}$ lb., 90c; oz., 30c; $\frac{1}{2}$ oz., 15c; pkt. **10¢**

few of the points that put Stone in a class of its own. A great favorite with canners on account of its solidity and the great crops which it yields. Postpaid; $\frac{1}{4}$ lb., 90c; oz., 30c; $\frac{1}{2}$ oz., 15c; pkt. **10¢**

497. CITRON—Grows uniformly round and smooth, striped and marbled with light green, flesh white and solid, seed red. This variety is not used for eating in the raw state, but for preserves, pickles, etc.

Postpaid; lb., \$1.00; $\frac{1}{4}$ lb., 35c; oz., 15c; pkt. **5¢**

498. GEORGIA RATTLESNAKE—The fruits are long, light green in color, with mottled stripes of a darker shade. The flesh dark red, very tender and sweet. Postpaid; lb., 80c; $\frac{1}{4}$ lb., 25c; oz., 10c; pkt. **5¢**

499. HALBERT'S HONEY—One of the finest melons for the home garden, of superb luscious quality; medium large, oval; dark glossy green; flesh bright crimson. Very tender and sweet. Postpaid; lb., 80c; $\frac{1}{4}$ lb., 35c; oz., 15c; pkt. **5¢**

500. IMPROVED KLECKLY SWEETS—Special strain of this grand market gardener's melon. Large, oblong, 26 inches in length by 10 to 12 inches in diameter, dark green, flesh bright scarlet, rind only about half an inch thick. Extremely sweet. Postpaid; lb., \$1.10; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. **10¢**

559. SMALL PRESERVING TOMATOES—An interesting packet comprising a mixture of small preserving varieties, including Red and Yellow Cherry, Peach, Plum, Pear and Currant. Also yellow and purple husk tomatoes. These varieties are not only desirable for preserves, but dried in sun, packed down with sugar, make splendid substitute for figs. Postpaid; $\frac{1}{4}$ lb., \$1.10; oz., 35c; $\frac{1}{2}$ oz., 20c; pkt. **10¢**

TURNIPS

Ask for Quantity Prices

CULTURE—For summer use sow early in spring in light, rich or new soil, in drills 1½ to 2 feet apart according to size of the variety and cover one-half inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly stirred. Thin early and keep free from weeds so that the young plants will not be checked in growth. Any overcrowding will result in rough and poorly flavored roots. It is important to get the spring and summer crop started very early so that the turnips may have time to grow to sufficient size before hot weather causes them to become tough and bitter.

560. EXTRA EARLY WHITE MILAN—The earliest turnip. Tops very small, distinctly strap-leaved, and growing very erect and compact. Bulbs form earliest of any sort. The clean, white roots are smooth, flat, symmetrical and handsome in appearance. Flesh is white, tender, and sweet. Postpaid; lb., \$1.25; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. **5¢**

Large Yellow

561. EARLY FLAT WHITE DUTCH—A quick-growing, medium-sized root for early spring or fall planting. The skin and flesh are both pure white, the latter being quite tender and sweet. Is flat with a fine tapering root; the leaf is strap-shaped. For home use there is no turnip that we would rather recommend. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 30c; oz., 10c; pkt.

5¢

562. LARGE YELLOW, OR AMBLER GLOBE—A popular, yellow-fleshed, sweet-flavored turnip that produces a good crop and will keep in perfect condition until spring. It is globe-shaped and size averages large. It is highly esteemed by housewives for table use and popular for stock feeding. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 30c; oz., 10c; pkt. **5¢**

Early Flat White Dutch

563. PURPLE TOP STRAP-LEAVED—Most widely cultivated and best known variety. Used largely for sowing broadcast among corn and potatoes. It is round and flat, white on the bottom and reddish-purple above ground, and a very quick grower. Fine table variety. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 30c; oz., 10c; pkt. **5¢**

564. PURPLE TOP WHITE GLOBE—Of a perfect globe shape, almost six inches in diameter with smooth, white skin; flesh pure white, firm and crisp, and of quick growth. A good keeper and is fine for market. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 30c; oz., 10c; pkt. **5¢**

565. SEVEN TOP—Does not produce a good root, but is extensively grown in the South for the tops, which are used as greens. Very hardy and will grow all winter. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 30c; oz., 10c; pkt. **5¢**

566. EARLY WHITE EGG—A quick-growing egg-shaped variety, perfectly smooth, pure white, growing half out of the ground, with small top and rough leaves. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 30c; oz., 10c; pkt. **5¢**

567. RUTABAGA—All kinds of stock relish Rutabagas, and thrive upon them when fed in combination with hay. If sown the last of July or the first of August, the tops make an excellent pasture for sheep during the autumn and the turnips furnish succulent food for them throughout the winter. Yields 20 tons to the acre. Postpaid; lb., 75c; $\frac{1}{4}$ lb., 30c; oz., 10c; pkt. **5¢**

New Crop

WATERMELONS

Pure Seed

CULTURE—Plant in hills 8 or 10 feet apart, dropping ten seeds to the hill; thin out to three plants to the hill; cultivate until the vines cover the ground, and pinch the ends of the early shoots to induce early fruiting.

497. CITRON—Grows uniformly round and smooth, striped and marbled with light green, flesh white and solid, seed red. This variety is not used for eating in the raw state, but for preserves, pickles, etc.

Postpaid; lb., \$1.00; $\frac{1}{4}$ lb., 35c; oz., 15c; pkt. **5¢**

498. GEORGIA RATTLESNAKE—The fruits are long, light green in color, with mottled stripes of a darker shade. The flesh dark red, very tender and sweet. Postpaid; lb., 80c; $\frac{1}{4}$ lb., 25c; oz., 10c; pkt. **5¢**

499. HALBERT'S HONEY—One of the finest melons for the home garden, of superb luscious quality; medium large, oval; dark glossy green; flesh bright crimson. Very tender and sweet. Postpaid; lb., 80c; $\frac{1}{4}$ lb., 35c; oz., 15c; pkt. **5¢**

500. IMPROVED KLECKLY SWEETS—Special strain of this grand market gardener's melon. Large, oblong, 26 inches in length by 10 to 12 inches in diameter, dark green, flesh bright scarlet, rind only about half an inch thick. Extremely sweet. Postpaid; lb., \$1.10; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. **10¢**

501. IRISH GRAY—This melon is large, the rind a mottled greenish-gray. The flesh red, crisp, free from stringiness and as sweet as honey. A little earlier than Tom Watson. Postpaid; lb., \$1.10; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. **10¢**

502. TOM WATSON—The finest all-purpose melon. The average size 24 to 28 inches long and 12 to 14 inches in diameter. It has a dark mottled green rind, thin, but tough enough to stand shipping long distances. The seed we offer is of the very best strain. Postpaid; lb., \$1.10; $\frac{1}{4}$ lb., 40c; oz., 15c; pkt. **10¢**

Imp. Kleckly Sweet

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE — ARKANSAS

Flower Seeds

The beauty and fragrance of our garden flowers fill a place in our lives that nothing can replace. Some vines or tall plants may be grown to make more slightly some fence or pile of stone or stump or building. Some plants can be grown in a partial shade where grass does not grow and others are serviceable in hanging baskets, vases, or veranda boxes. Some plants used for cuttings bring the sunshine to those that must live indoors, while others are useful for cemetery lots, a tribute to those that have gone before us. Borders, beds and masses of flowers may appeal to us most as "the bouquets that live." Most flowers are as easy to grow as vegetables. The same practices that promote the growth of grains, vegetables and fruit apply to flowers. Most seed should be covered four times its least diameter. Drained, moist, warm, mellow soil should be the flower's home, not soil that is wet or soil that will bake. The seeds we are offering are the best that we can procure, all thoroughly tested before we send them out.

Flower Seeds are Postpaid

650. AGERATUM MEXICANUM—A hardy annual which produces an abundance of light blue and lavender flowers throughout the summer. Flowers are very desirable for bouquets. Plants will also do well in the house if potted in the fall before frosts. Height, 12 inches. Pkt. **10¢**

651. ASTERS—These universally grown and greatly admired flowers have undergone a great improvement in varieties of late years. Our mixtures contain a number of the best strains and furnish a choice selection of cut flowers in many shades of color. Sow indoors or under glass and at different times for a succession of bloom. Pkt. **10¢**

652. ANTIRRHINUM, or SNAP DRAGON—One of the most desirable flowers for general garden culture. They come in great quantity of colors and are as equally good for bouquets or for mass planting. They are biennials but can be handled as annuals also when sown early inside. They bloom in July and then until frost if covered up slightly. They go through the winter and bloom abundantly the second year for extra early flowers. Start in the house and transplant outdoors when weather is favorable. Pkt. **10¢**

653. BACHELOR BUTTON (Ragged Robin)—One of the most popular and desirable of old-fashioned garden annuals. Good for bouquets when mixed with other flowers. The plants reseed. Pkt. **10¢**

654. BALSAM—Commonly called Ladies' Slipper and Touch-Me-Not, forming neat symmetrical tree-like plant and a profusion of double and semi-double wax-like flowers in the most brilliant colors. Of easy culture, but don't plant the seed until the ground gets warm, as they are rather tender. Best mixed colors. Pkt. **10¢**

655. CANDYTUFT (Giant Hyacinth)—One of the most useful and popular annuals. Completely covered with clusters of flowers that are esteemed for bouquets; are also grown as border plants.

Aster The flowers are large, and are pure white. Pkt. **10¢**

656. CARNATION (Marguerite Mixed)—These lovely fragrant carnations produce fine double flowers from seed sown in the garden early in the spring. When well started, the young plants should be transplanted to stand 12 inches apart. They are quite hardy, flowering the first season until late in the fall, and can be potted for winter bloom. Pkt. **10¢**

657. CHRYSANTHEMUM (Mixed)—These are not the large varieties grown and handled by florists. The annual varieties we offer are of many beautiful colors and similar to large daisies. If the shoots are nipped off when the plants are young they become more bushy. For early bloom start indoors, or sow where plants are to bloom. Pkt. **10¢**

Offer No. 1505 Sweet Perfume Flower Garden

What is home without flowers growing about it? And how lovely it is to have an abundance of flowers for bouquets on the table, where you can enjoy the sweet fragrance of the gorgeous flowers. How they beautify the home! How they increase the attractiveness of the home grounds with their wealth of bloom! In this collection, we send to you 12 big packets of the best blooming, fragrant garden flowers of the following kinds:

AGERATUM
BALSAM
CANDYTUFT
POPPY
HOLLYHOCKS
SWEETPEAS

PETUNIA
PHLOX
NASTURTIUM
MIGNONETTE
PINKS
MARIGOLD

Send for this Garden of "Sweet Perfume." Enjoy its beauty and fragrance this summer. Only a half a dollar will bring it to you.

50¢

658. CLEMATIS—Well-known and very popular perennial climbers. Usually grown from roots but can also be started from seed. They will climb on any support and are excellent for porches. Pkt. **10¢**

659. COLEUS—Without question the most popular and most admired of foliage plants. It is a tender perennial having variegated and beautifully marked foliage. Unexcelled for borders, ribbon beds, etc. A rapid grower and of easy culture. Pkt. **10¢**

660. CYPRESS VINE (Ipomoea Quamoclit)—This dainty, graceful and feathery foliage makes this one of the most beautiful of climbers. It is especially desirable for a light screen in front of the porch. It bears an abundance of small scarlet and white flowers which contrast beautifully with the green leaves. Tender annual, growing to a height of 12 feet. Pkt. **10¢**

661. CYCLAMEN—A charming house plant with beautiful foliage and richly colored, fragrant flowers. A tender perennial, one foot high. Pkt. **25¢**

662. COCKSCOMB—Very showy yellow and crimson annuals. Extra large velvety flower heads or combs. Very easy culture.

Cut when partially open and hang in a dark closet to dry for winter decorations. Pkt. **10¢**

663. COSMOS (Mixed)—When many of the garden flowers are through blooming the Cosmos starts in. Tall, graceful, bushy, with feathery foliage. Plants producing a great variety of daisy-like flowers in many colors. Sow out doors after danger of frost is past. Pkt. **5¢**

664. DIANTHUS, or PINKS—An old-time garden favorite and a magnificent flower about 12 inches high, producing an abundance of brilliant colored blossoms. They are used in beds or borders. The seed may be sown out doors when the danger of frost is over, and they will produce

flowers in profusion during the summer and up well in the autumn. Pkt. **10¢**

665. FOXGLOVE (Digitalis)—Another old garden favorite. A stately, ornamental plant especially adapted for perennial borders and for planting among shrubbery. Flowers are of all colors, are bell or thimble-shaped, and borne in tall spikes. New plants may be obtained by dividing the roots. Will do well in half-shady places. Height, 3 to 5 feet. Hardy perennial Pkt. **10¢**

666. FORGET-ME-NOT (Myosotis Alpestris)—Few spring flowers are more universally admired than the pretty little Forget-Me-Not. Are used principally for bedding and mass planting. Seed may be sown any time from early spring until mid-summer. It is perennial but should be given a slight protection during the winter. Pkt. **10¢**

667. GERANIUM—We know of no plant that is better or more universally admired than the Geranium. Commonly propagated by cuttings but may also be grown from seed which is very interesting. Pkt. **10¢**

When you buy from us, you get your trees or seeds by the shortest route from the grower to you. Everything we sell is sold under the fairest and squarest guarantee that was ever written.

Shasta Daisy

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

FLOWER SEEDS—Continued

GYPSOPHILA (Baby's Breath)—Graceful plants of light fairy-like growth. Always useful for combining with other flowers in bouquets. Flowers very freely and succeeds in any garden soil. In bloom from July until frost.

Height, one to two feet.
668. *Paniculata*, pure white. Pkt. 10¢

669. *Elegans*, delicate pink. Pkt. 10¢

670. **HELIOTROPE** (Mixed)—An old-fashioned favorite plant noted for the intense fragrance of the violet-colored flowers. If sown early indoors or in hotbeds, large, stocky plants can be produced which will bloom all season outdoors. Easy to grow from seed. Heliotropes are good pot plants for the 10¢ house during winter. Pkt. 10¢

671. **HOLLYHOCKS**—A favorite with everyone. Tall and stately and always handsome.

Most beautiful when seen in groups of long rows with a 10¢ background of evergreens or shrubbery. Pkt. 10¢

672. **ICE PLANT** (*Mesembryanthemum Crystallinum*)—A fine plant for sunny borders and also for dry, sunny situations on banks, rock work, old walls, etc. The foliage is very beautiful, being covered with ice-like globules. Useful for garnishing. 10¢

Tender annual growing about 6 inches high. Pkt. 10¢

673. **LARKSPUR, DWARF BEDDING**—These lovely annuals are quite hardy. The blooms are exceedingly handsome and most suitable for beds. Height, 1 foot. Pkt. 5¢

674. **MARIGOLD**—One of those appreciated "sure-to-grow-and-bloom" garden flowers. Sow in spring where plants are to stand or in boxes and transplant. Grows about 2 feet tall and 5¢ thrives best in a sandy loam. Pkt. 5¢

675. **MIGNONETTE** (*Resseda Odorata*)—An unassuming flower with a very delicate odor making a splendid addition to any bouquet. If seed is sown in April and again in July flowers may be had all summer and fall. Can also be grown in pots 10¢ for winter flowering. Pkt.

Coscomb

Most beautiful when seen in groups of long rows with a 10¢ background of evergreens or shrubbery. Pkt. 10¢

676. **MOON FLOWER**—Immense pure white moon-like flowers, 5 to 6 inches across. Opens in the evening. A great climber 10¢ for porches, etc. Pkt. 10¢

677. **MORNING GLORY**—Too well known to need description.

Unsurpassed for covering fences,

arbors, porches, etc. Splendid mixture. Oz., 20c; pkt. 5¢

678. **GIANT FLOWERING DWARF MIXED**—These grand new bedding Nasturtiums are brilliant in the extreme. They produce in wonderful abundance large flowers of the most gorgeous hues. The colors are very intense, making a sharp diversity

of color not to be found in common mixtures. The plants are

strong and vigorous, growing very quickly and producing erect,

symmetrical bushes, with foliage from light green to deep

blue-green. 1/4 lb., 40c; oz., 15c; pkt. 5¢

679. **TALL GIANT FLOWERING MIXED**—A wonderful diversity of rich colors and new and striking combinations are found in this unequalled mixture. A row in full bloom is truly gorgeous beyond description, containing as it does every shade and tint of yellow, rose, scarlet, carmine, orange, lemon, bronze, violet, purple, maroon, ruby, cream and pink, both in solid colors and mottled and striped in many showy and exquisite ways. 5¢

680. **PANSY (Mixed)**—Pansies are familiar to most everyone and few are planting a garden without pansies. During recent years there has been a great improvement in size and color 10¢ of flowers and in length and strength of flower stems. Pkt. 10¢

681. **PETUNIA (Mixed)**—For vases, urns and window boxes there is hardly a plant that can compare with petunias. Continues blooming in a multitude of colors and of drooping habit. It is one of the most effective flowering plants, far superior for these purposes than geraniums. Single and double flowers. Best started in boxes or under glass. Plenty of moisture and rich soil. Pkt. 10¢

682. **PHLOX DRUMMONDI**—The showiest and the most easily raised of all annuals. We know of no flower which produces such a continuous supply of the most attractive blooms in a most wonderful range of colors. All the tints of the rainbow are represented with all possible variations of stripes, veins and eyes of contrasting shades. Seed should be sown in the ground as soon as danger of frost is over and in a few weeks the beds are a blaze of glory. 10¢

Pkt.

683. **ALBA**—Have beautiful round petaled pure white flowers which overlap each other. 10¢

Pkt.

684. **COCCINEA**—Same variety as Alba only deep red or fiery scarlet. Pkt. 10¢

685. **MIXED PHLOX**—All varieties and colors in a splendid mixture. Pkt. 10¢

Larkspur

Most beautiful when seen in groups of long rows with a 10¢ background of evergreens or shrubbery. Pkt. 10¢

686. **POPPY (Mixed)**—These wonderful plants with their multitude of colors put life into the garden before most any other plants have started. Against a background of green foliage, there are hardly any plants presenting such an intense array or veritable riot of colors. Thrive best in a sandy loam and should be sown very early and only in sunny exposure. Sow several times for succession. 5¢

Pkt.

687. **PORTULACA (Rose Moss)**—A low spreading annual. About 6 inches high, flowers appear in a short time from seed and throughout the entire summer they produce a perfect carpet of brilliant color. Thrives on any kind of soil and will grow in beds; also used for edging and in rock work. Once established it withstands dry weather and heat to a remarkable degree. The beautiful colors make a dazzling display. Pkt. 10¢

688. **SALVIA SPLENDENS** (Scarlet Sage)—A standard bedding plant that keeps the garden bright with color until late in autumn. This plant lends itself to many uses. It makes a good pot plant, does well in window boxes and is useful for cutting to give color. Its best use however, is as a hedge or border plant. Where long, broad bands of intense color are desirable the seed should be sown in beds and when planted outdoors should be cold-framed, the same as cabbage or tomato. Pkt.

689. **SHASTA DAISY**—The plant grows fast and increases rapidly. It is a fine bloomer. The flowers measure 2 to 3 inches across and are borne on long stems. They have two rows of long, broad white petals and a yellow center. Pkt. 10¢

690. **SWEET ALYSSUM (Little Gem)**—Dwarf, neat, compact habit, blooms from early spring until frost. Excellent for bordering beds or walks; also desirable for hanging baskets or vases. Flowers white, fragrant, completely covering the plant. 5¢

Oz., 25c; pkt.

691. **SWEET WILLIAM (Mixed)**—Fine border plant and excellent for cutting. They are hardy, free-flowering and have a splendid bloom for several weeks. The plants have all varieties of colors ranging from the light to the darker shades. Sow outdoors early in the spring and three to six inches in the row. Seed can be sown in the fall. 10¢

Pkt.

692. **ZINNIA**—

Illustration of a zinnia flower, showing its characteristic daisy-like appearance with many small petals.

Zinnia

PLEASED

Some time ago I ordered some peach

and apple trees. I sure am well

pleased with them and am doing all

I can to help you advertise your

trees.—B. T. LANG, Mississippi.

GOOD

I have received the apple trees ordered from you in good condition

and well pleased.—MRS. B. V. McCOOL, Mississippi.

PERFECT

I received the last lot of fruit sprouts a few days ago, and set

them out the same day. They were in perfect condition.—C. H.

VOWELL, Mississippi.

Beautify Your Home

It pays. It pays first in satisfaction it gives you. It

pays in the increased value of your place in case you want

to sell it. We have a splendid assortment of shade trees,

flowering shrubs and perennials that are just right for

use in landscape work. See them on other pages of this

catalog.

Have a Flower Garden

You will enjoy it. Set aside a part of your yard for a

real, old fashioned flower garden filled with the glorious

hardy plants that we list on another page of this catalog.

An abundance of flowers increases the beauty of the home

and brings good cheer at all times.

Plant an Orchard

Grow fruit for your own use, and some for market. There

is big money in fruit growing. We have specialized in

the production of high class trees for orchard planting and

challenge the world on the prices that we make. See the

Grand Bargain Offers of fruit trees and vines listed on this catalog. Send for one or

more of them.

It Is Easy To Order

Make up an order amounting to \$10 or more, and it

will be sent prepaid, except where otherwise indicated.

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

SWEET PEAS

CULTURE—Early in the spring make a trench 3 or 4 inches deep in rich mellow soil, so arranged that no water can stand in it, and plant in the bottom covering at first only 1 inch deep. When the plants are 2 inches high cultivate and as they gradually grow fill up the trench. When the plants are about 1 inch high support should be furnished for the vines to run on. The roots should not be allowed to become too dry. Water should be applied thoroughly once or twice a week, early in the morning, or in the evening, is better than light sprinkling. Nothing can give more beauty and enchantment to a garden than sweet peas, with their most beautiful colors. The seed we offer are of the pure Spencer type.

691. KING WHITE SPENCER—The best white Spencer. The flowers produced, generally four on a stem, are of extremely large size, of fine substance and well placed on thick long stems. The standard is decidedly frilled and waved and the large waved wings gracefully

cover the keel. The vines are strong and vigorous. 10¢

692. BARBARA—A particularly fine salmon-colored self of large size and best Spencer form. Make a most "selling" bunch either for exhibition or table decoration and is the most brilliant of the Spencer variety. Requires to be slightly shaded. 10¢

693. KING EDWARD SPENCER—Very large brilliant red flower, considered the best red Spencer. Perfectly waved. 10¢

694. MARGARET MADISON—Entire flower clear light azure blue, free from any trace of pink; a most pleasing color; large, both standard and wings artistically ruffled. Very popular. 10¢

695. SPENCER MIXED—Excellent mixture of best Spencer Sweet Peas. 1/4 lb., 65¢; oz., 20¢; pkt. 10¢

696. ROYAL MIXED—A good sweet pea of all colors, but not as large as Spencers. Lb., \$1.00; 1/4 lb., 40¢; oz., 15¢; 10¢

698. VERBENA—A popular annual of low spreading growth. It produces large clusters of showy flowers about 2 or 3 inches across which are of wide range of colors. Shades and stripes usually running from pure white to deep purple. Sow seed in early spring in boxes or in open ground after danger from frost is past. Verbena grown from seed are more vigorous and healthy than when grown from cuttings. Pkt. 10¢

699. VINCA (Periwinkle or Old Maid)—A free-blooming, tender, perennial bedding plant. It has glossy, green leaves and pretty red and white flowers. They flower from seed the first season and if taken into the house before frost they will bloom all winter. A fine cut-flower as the buds open readily in water. Pkt. 10¢

700. ZINNIA (Giant Flowered Mixed)—An improved strain of the old-fashioned Zinnia producing double flowers of great size. The plants grow about 15 inches high and the double flowers are produced in great abundance on short stems. They produce flowers all summer and late into the fall. Splendid effect can be produced in beds and borders. With these magnificent flowers we offer a mixture of well-balanced colors: White, red, pink and yellow. Pkt. 10¢

Offer No. 1017

Ozark Champion OFFER

Here are some extra select trees and plants for your farm or home garden. You pick your choice of varieties, 5 or more trees of any one kind. We send you only the very best grades of trees—2-year-old apple trees, extra large peach and blackberry plants. We are sure you will agree with us when you see these trees, that they are the finest lot of trees you ever got for the money. If low prices talk, if quality counts, if you want to make money by saving money, you will get all of it, and more, in this Ozark Champion Offer.

This offer is bound to create a tremendous demand. Orders are bound to pour in for these trees, and especially for the more choice varieties of apples, such as Delicious, Stayman Winesap, King David, Grimes Golden and similar luscious gems. And to be sure of getting the varieties you want, send your order today. Avoid disappointment by sending for these trees NOW. Sent express collect.

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

FIELD SEED

BETTER SEEDS FOR LESS MONEY

"As ye sow, so shall ye reap." There was a time when every farmer saved his own seed from year to year. But those days are gone. It is no more economical for the average farmer to bother about saving his own seed of the field crops he will plant than it is for him to make his own shoes or clothing.

Not everyone can grow seed that is fit for planting—seed that not only will have high germination and strength to grow into maturity, but which will reproduce the parent type in all purity. To produce seed for planting is a business in itself; and to buy seed that has been grown altogether for planting gives one a better grade of seed for less money.

In our Field Seed Department, we exercise every possible care to have our stocks of greatest purity and virility. Every item that we list has been grown under the most favorable conditions to maintain the purity of the strain, and retain the utmost strength in the seed. Every item is carefully tested by us for germination and is superior to the legal standard before it is packed for shipment. We take the greatest of pride in the quality of our farm seeds, and the rapid growth of our trade in this department speaks most forcefully of the way our customers have appreciated and profited through the use of our seeds.

PRICES on Field Seeds are always subject to market changes, in quantities of more than one pound. Some kinds of seeds vary in price almost daily. Because of this, we ask that you let us quote you by letter on your requirements at the time you are ready to buy. In that way we can give you the benefit of the lowest prices the day your order is received. We prepay the postage on one pound lots of all field seeds, as indicated in this catalog. We do not prepay the express or freight charges on larger quantities.

LET US HELP YOU improve your crops. We have put time, money and painstaking care into our assortment of farm seeds, and not only can we supply you with better seeds than you can get for the same money elsewhere, but we can help you in an advisory way, to grow bigger crops from the same amount of ground. Write to us about what you have been growing, and what you want to grow. Let us give you the benefit of our years of experience with farm seeds, and make you a quotation on the varieties and quantities of seeds that you want to plant.

We have had many years of experience with field seeds, not alone as seedsmen, but as farmers, for every year we raise immense fields of various kinds.

The picture below is a photograph of the first cutting of hay from one of our fields of red clover here at Fayetteville, Arkansas.

IT IS EASY TO ORDER

Use the order blank with this catalog, filling in the blank lines with your name and address, plainly written. It is not necessary that you write out the names of the varieties you want, as all items have a variety or offer number. Use the number instead of writing the names.

How To Send Your Money

The safest way is by money order, either postal or express, or bank draft. Your personal check will be accepted. It is unsafe to enclose currency, unless it is securely folded in heavy paper and registered.

How To Have Your Order SHIPPED

We prepay the transportation charges on many of the items in this catalog. These are plainly marked "Postpaid." Other items are sent by express or freight, charges collect. Be sure to let us know which form of transportation you prefer; otherwise we will ship by the quickest method.

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

ALFALFA

806. ALFALFA—This is the most valuable of all perennial hay crops. It produces a hay of the highest feeding value and one that is relished by all farm animals. At the same time, its deep penetrating roots loosen up the soil and add nitrogen, as do all leguminous crops. In this way, alfalfa improves the texture and fertility of the soil for crops that may follow. Alfalfa hay is the most profitable hay to grow, and when alfalfa is once well established, it will endure for many years with little or no attention other than that of cutting the hay three or more times a season. It is the one crop that will produce two tons of high priced feed stuff where only one grew before. Plant alfalfa and get some of the great revenue that comes from growing this profit-making legume. Don't let your neighbor grow bigger and better crops than you do simply because he grows this big money crop, and improves his soil at the same time. The returns from an acre of alfalfa will far exceed that of any other similar crop and make the land richer at the same time. Think of that! Make the land richer! What you get off as hay isn't all there is to alfalfa. Much of its real worth is left in the ground for the benefit of other crops. Alfalfa is a cash crop and a soil improver at the same time. Plant it and profit. If you have never grown it before, inoculate it before you plant it and you will have all the better crop.

Plant alfalfa. Be an up-to-date farmer. Don't try to squeeze along and make a bare existence in the same old rut. Alfalfa will pull you out of the hole if you will give it a chance.

It is an easy crop to grow if a little care is taken in planting the very best of seed. Poor seed is expensive at any price. Your seed bed should be plowed very early in the spring, or what is better—the fall before. Just before planting the seed, work the surface into a fine state of cultivation by harrowing and dragging.

Use the best grade of seeds, and if your land has never had alfalfa on it, inoculate with some of the culture listed in the back of this catalog.

Just as soon as the danger of hard freezing weather is over drill your seed at the rate of 16 to 20 pounds to the acre.

Alfalfa

Prices Fluctuate

On quantities; let us quote you by letter the lowest market price the day you want to order.

RED CLOVER

800. RED CLOVER—Without a doubt, red clover is the backbone of present day successful farming. It is a hard proposition for a farmer to get along without the use of red clover, as it is a soil improver of first rank, and a hay producer of tremendous value everywhere. The hay cures readily and is of excellent feeding value for all farm animals. As a pasture crop it has no equal where one only intends to pasture

the land for a short time and then put it into other crops. It builds up the land through the addition of nitrogen to the soil. Timothy frequently is planted with red clover, and for pasture purposes no other combination will give the satisfaction of a nice field of these two crops. As a cover crop for an orchard, red clover is without an equal. Every orchard should be seeded to red clover every few years and the hay allowed to remain right on the ground as a mulch, or plowed under. The price of clover seed in quantities fluctuates greatly. We are always glad to quote the current price by letter. Ask for our quantity prices.

Per Pound, Postpaid **45¢**

Red Clover

VETCH

809. WINTER OR HAIRY VETCH—For soil improvement there is hardly any crop that fits in so well under all conditions as Winter Vetch. It is a heavy carrier of root tubercles and these increase in size and number more in cold weather than with any other legume. It will grow and enrich the soil during the fall, winter and early spring, and in many sections of the South it will produce an enormous crop during the winter months when other crops would be dormant. It does well on poor lands where clovers fail. It needs a good seed bed with plenty of moisture to begin with, but after it is established it will withstand almost any degree of heat or cold or drought. Like all legumes, it gathers nitrogen from the air and deposits it in the tubercles on its roots. When being grown on land that has never produced Vetch before, the seed should be inoculated before being planted. Winter Vetch forms such an excellent forage crop for early spring that it is becoming very popular for this use alone. It supplies a very excellent and succulent forage just at the time the appetite of farm animals is beginning to lag from the long winter's feeding on dry forage. Plant a few acres of it this season. It will not disappoint you for it is not only an excellent soil improver but an excellent forage crop as well.

Per Pound, Postpaid **30¢**

Vetch

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

ALSIKE

808. ALSIKE or SWEDISH CLOVER (*Trifolium Hybridum*)—Alsike clover is especially valuable for growing on wet or swampy land. If you have a piece of land that is too damp for alfalfa or other clovers or grass, sow a mixture of about 4 pounds of Alsike Clover and 10 pounds of Red Top Grass seed. This will make an excellent crop of hay. Alsike clover is very hardy, is perpetual, will withstand drought and will not winter-kill. About 6 pounds will sow an acre and, as the seed is very fine, it should be covered very slightly. For bottom lands needing drainage but not subject to overflow an excellent mixture is as follows: Four pounds of Red Clover, 2 pounds of Alsike Clover and 10 pounds of Timothy per acre. Postpaid; 1 lb. **35¢**

WHITE CLOVER

Write for Quantity Prices

803. WHITE CLOVER—This low growing, perennial clover is among the most valuable of honey plants, producing a grade of honey that is equal to if not superior to alfalfa honey. It makes an excellent pasture, especially when mixed with the seeds of pasture grasses. It is highly valued in lawns. A little White Clover seed mixed with blue grass makes a splendid combination for an all-year green lawn. Postpaid; 1 lb. **\$1.00**

SWEET CLOVER

Write for Quantity Prices

807. WHITE BIENNIAL (*Mellilotus Alba*, or *Bokhara*)—The white-flowered variety frequently seen growing wild along the roadsides. Many farmers are using this as a pasture clover, claiming it to be equal to Alfalfa and superceded to common Red Clover for this purpose. For hay, it is cut when about 18 inches to 2 feet high and before it begins to branch heavily. If the mower bar is set about 6 inches above the ground it will cut above the first branches and the clover produces a second crop. If cut too close to the ground, the plants are not likely to survive the first cutting. Sow very early in the spring or fall, and without a nurse crop. Germinates more quickly and freely if sown on a well-prepared seed bed. Postpaid; 1 lb. **35¢**

Sweet Clover

COW PEAS

Write for Quantity Prices

Make poor land rich, and rich land more productive. Cow Peas are especially valuable as a "catch crop" for forage or hay and there are many million acres of land in the Middle West that could be improved in productivity by sowing Cow Peas after wheat has been harvested. Cow Peas require from 70 to 90 days to mature a crop of peas, and if the crop is put in the last of June or the first half of July there will be plenty of time for the wheat crop to mature as well as to produce a good hay crop. The same land can be used for seeding wheat again in the fall months. 816. WHIPPOORWILL—A favorite early-maturing variety of medium growth. The seed is reddish-brown speckled.

MUNG BEANS

824-A. The greatest forage crop of the present. As compared to the Soy Bean the stalk is more tender for stock to eat, puts more nitrogen in the soil and will take only one-fourth as much seed to plant an acre. Four pounds plants one acre. Can be planted in rows 3 to 3½ feet apart. The beans make the finest chicken feed, and the stalks are the finest chicken feed, doubling the yield of cow peas to the acre. One of the greatest drought resisters known. Can be planted on any kind of soil, but if you want to improve your land, plant MUNG BEANS. Postpaid; 1 lb. **40¢**

WE WANT YOUR ORDER

And to get it, we offer you the very best of quality in trees or seeds for the least money. CONCORD GRAPE

100 1-Year VINES

\$5.00

With a \$10.00 Purchase

Concord has no equal as a table grape, or a grape for making into grape juice, jams, jelly or other delicacies. It is the favorite black grape for eating out of the hand. It is the most important market grape east of the Rocky Mountains. And it is the one grape that will grow and yield big crops year after year in almost any kind of soil, North or South. It is dependable. Send for these vines and start a vineyard of your own. The possibilities are almost unlimited. Our vines are "Heart of the Ozarks" grown. They are produced right on our own land and are hardy, sturdy vines that will get right down to business for you. The demand for grapes is very strong, and our supply is limited.

Better order Today and avoid Disappointment

1000 Blackberry Plants

Offer No. 1004

500 LAWTON 500 McDONALD
The Best of the Blackberries

These are the most profitable varieties to grow; hardy, disease-resistant; heavy croppers. You will make no mistake in planting these blackberries this spring. As older in a young orchard, they are fine, bring in big profits while the trees are coming into bearing. McDonald is an early fruiter, and brings top prices because of its earliness. Lawton is an excellent market berry, and a good pollinator for McDonald. Both varieties are endorsed by the largest commercial growers and horticulturists of the Southwest as money makers. Don't delay planting these fruits. We make you this bargain offer of 1000 plants for \$33.75 to get you started on the road to Big Money, and have you as a regular customer. We send you strong, one-year plants by express, charges collect.

\$33.75

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

SOJA OR SOY BEANS

Write for Quantity Prices

826. This valuable forage and fertilizing plant is similar to clover in its habits of growth, but produces pods filled with nutritious beans, relished by all kinds of stock. For pasturing or feeding as green fodder it is very valuable, and nearly equal to clover for fertilizing. Because of its erect habit of growth, they are far easier to harvest and cure than the Cow Peas. A larger crop may be secured by planting and cultivating like corn, cutting with a corn binder and curing in shocks. 1 lb., postpaid **15¢**

Spanish Peanuts

BUCKWHEAT

Write for Quantity Prices

815. GIANT JAPANESE—The great midseason crop. Can be sown as late as July and make a bumper yield. Every farmer should have at least 5 acres. Sow $\frac{1}{4}$ bushel per acre. Average yield 30 bushels per acre. Big money-maker. One of the best plants for bees to feed on. 1 lb., postpaid **25¢**

SUNFLOWER

Write for Quantity Prices

825. MAMMOTH RUSSIAN—The largest of all Sunflowers. One of the best paying crops that can be raised for chick-feed. Seeds are the best of food for poultry and is much cheaper to raise than corn. It also affords protection against malaria. Plant as you would corn, and about the same amount. 1 lb., postpaid **30¢**

RAPE

Write for Quantity Prices

817. DWARF ESSEX—Where there are hogs there should also be Dwarf Essex Rape. Under favorable circumstances, Dwarf Essex Rape is ready for pasture in six weeks from time of sowing. One acre of good Rape will carry a dozen pigs for two months. One of the experiment stations found that an acre of Rape produced as much gain on pigs when used for pasture crop along with grain as 56 bushels of corn would produce. In addition to the feeding value of Rape, the hogs are bound to be stronger and gain more rapidly on the Rape pasture than the ones which have been fed on grain alone. A plant with as great feeding value as Rape should find a welcome on all farms where hogs are raised. An acre of Rape in the experiment equaled much more than an average acre of corn and the cost of producing was much less, and the cost or harvesting was nothing, as it was done by the hogs. Also fine for chickens and turkeys. 1 lb., postpaid **30¢**

Plant Rape for Hogs

Experiment equaled much more than an average acre of corn and the cost of producing was much less, and the cost or harvesting was nothing, as it was done by the hogs. Also fine for chickens and turkeys. 1 lb., postpaid **30¢**

TIMOTHY

Write for Quantity Prices

813. As a grass to cut for hay, Timothy is the standard everywhere. It is the great non-leguminous hay crop and does better in the northern half of the United States than it does in the southern half of the country. Our Timothy seed is all new crop seed, the only kind that is worth buying. Send for samples and prices. 1 lb., postpaid **25¢**

DOING FINE
I ordered peach trees from you the first of April and every one is growing and doing fine. I feel so proud of them and show them to everybody. Am well pleased with my purchase.—MRS. A. J. SMITH, Kansas.

PLEASED WITH THEM
I received your shipment of the 20th, apple trees and 1 grape vine, all in first class condition and I sure am well pleased with them.—CLYDE T. PHELPS, Missouri.

Timothy

MILLET

Write for Quantity Prices

820. GOLDEN or TENNESSEE GERMAN—This is the most popular variety and much superior to Western or the ordinary so-called Millet. Try some of both and compare results. This is the Millet that has enormous big heads and wide leaves. It is the rankest of all Millets, growing from four to five feet high, and makes lots of feed either as hay or grain. Can be sown as late as July in this latitude, and on that account is valuable where other crops have been washed out and lost. 1 lb., postpaid **15¢**

OATS

Write for Quantity Prices

804. RED RUST PROOF—This excellent variety continues to live up to its name—rust proof. If your oat crop was a failure last year from rust, try Red Rust Proof this year. It is giving excellent satisfaction, and is the standard variety for this locality. We do not believe you can beat it for heavy yields. Because of the market fluctuation of prices, we ask that you write us for prices when you are ready to buy.

805. EARLY MAY—A variety that ripens very early. It does well even on this poor land, and in many localities is preferred to all other varieties of oats. The seed we offer was grown in Washington County, Ark., where the variety reaches its perfection. Write for prices at planting time.

TREES O. K.

I received the trees all o. k. I thank you for the trees. They arrived in good shape. They are just doing fine.—T. E. BRASWELL, Arizona.

Red Rust Proof

SAVE MONEY

If you want to make a big saving on the cost of the Field Seeds you will need for planting this season, send in your order NOW. Prices always go up as planting time nears. And the stronger the demand, the more rapidly prices advance. By buying your seed early—even months in advance of planting time—you buy when the demand is weakest and prices lowest. Early buying is an easy way to save money.

We are always glad to quote quantity prices on field seeds, and especially glad to have our customers take advantage of the low prices that prevail very early in the season.

Remember the old proverb—"A penny saved is a penny earned." And it comes lots easier. You don't have to sweat and work and fight bugs when you save money by buying early. Send Your Order NOW.

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

BERMUDA GRASS

812. Very fine for binding loose and dry soils. The habits of this grass is to set roots at each joint that touches the ground, thereby forming a complete sod. Furnishes excellent pasture. Is decidedly a summer grass, as it does not start off until ground is thoroughly warm in the spring, and turns to a buff color after killing frost in the fall. We believe this grass will help solve the pasture question during the hot, dry summer months. Best time to sow Bermuda is about the last of February or any time during March. But will not germinate until the ground gets warm. Sow on top of snow or just before a rain if possible. Also valuable in some sections as a lawn grass. Sow 3 lbs. postpaid to 5 pounds to the acre. 1 lb., postpaid 75¢

KENTUCKY BLUE GRASS

Write for Quantity Prices

810. No other grass is more valuable for permanent pastures, and none can equal it in year around pasture or feeding value. It is the king of grasses, standing above all other kinds when it comes to its endurance of close pasturing and the number of head of stock it will carry per acre. No farm can afford to be without a blue grass pasture any more than to be without live stock. Kentucky Blue Grass not only is the most palatable of grasses, but it also is much richer in protein and other nourishing elements than any other kind. It is the standard grass for lawns. 1 lb., postpaid 50¢

ORCHARD GRASS

Write for Quantity Prices

813-A. Adapted to middle United States, especially what is known as the Ozark section. Wherever it has been given a fair trial it has been placed in the front rank of grasses for permanent pasture. It is a rank deep root perennial and it does not form true sod as it grows in bunches. It starts very early in the spring and keeps on growing during the summer months. It resists drought better than Timothy and blue grass and grows well in the shade. You may plant orchard grass any time during the fall or winter and would recommend sowing on top of snow if the ground is well prepared. 1 lb., postpaid 30¢

RED TOP OR HERD'S GRASS

Write for Quantity Prices

814. This is well adapted to the Southwest. Suitable for meadow and pasture mixture, or for use in lawn making. Adapts itself to any soil, but produces best results on moist, rich soils, where it grows 2 to 2½ feet high. Often sown with Timothy and Clover, and outlasts both. Sow 20 to 25 pounds per acre for lawns. For pastures, 8 to 10 pounds per acre. 1 lb., postpaid 30¢

SUDAN GRASS

811. A sweet, heavy-yielding grass; absolutely drought-proof and grows successfully everywhere sorghums will grow. Livestock of

all kinds eat it greedily and as forage for cattle it will add weight more rapidly than any other variety of sorghum grasses. Yields more pasture per acre than any other annual forage crop. Sudan is absolutely free from the objectionable root system which makes Johnson Grass so difficult to eradicate. Sudan Grass is an annual and requires reseeding each year. It is no more difficult to get rid of than sorghum, cowpeas or other similar crops, and it may be sown, either drilled in cultivated rows 3½ feet apart, or broadcast. For drilling rows 3½ feet apart it will require 3 to 6 pounds per acre, depending on the cultivation of the land. Broadcast it should be sown 20 to 25 pounds per acre. The seed should not be sown until the ground is warm in the spring; in this latitude about May 15th is the earliest practical date. The first hay crop will be ready to harvest about 45 to 50 days from date of sowing. The second crop from 30 to 35 days. The third crop from 30 to 35 days. If you wish to save a seed crop from Sudan it will require 80 to 90 days from date of sowing the seed until the seed crop is to be harvested. After threshing, the straw will prove as nutritious as any other variety of sorghum. Sudan may be sown as far north as any other variety of the sorghum family. In many states it is going to supersede millet and the quality of the foliage is so much better. 1 lb., postpaid 20¢

Have You Included Sweet Clover In Your Order?

This grand clover is giving farmers so much satisfaction for soil improving purposes, and as a hay crop that it has fairly leaped into popularity and become a staple crop. If you have never grown this wonderful legume, try some of it this year. The seed is cheaper than red clover or alfalfa and it produces results quickly. Plant some of it this year and give it a trial for hay. See how its deep penetrating roots loosen up the soil, and how other crops will flourish when you plow the sweet clover under. It will produce a wonderful leguminous pasture for your hogs and stock and build up your land faster than with more expensive crops.

Popcorn

For
The Kids

Plant at least a few rows of popcorn for the children. They will love to eat it next winter. It is nourishing. It is appetizing, and few things taste half so good on cold stormy nights of winter as a big dish of popcorn hot out of the popper! And popcorn balls! They are ever so good—just the things that mammas like to make for their little girls and boys to munch on when they come home from school. An apple in one hand, a popcorn ball in the other! What a treat for the kiddies! Here are two excellent varieties of popcorn:

801. BABY RICE—Small ears and small grains which pop to a fair size. The popped corn is deliciously tender and will bring a premium on the market. Postpaid; lb., 30c; pkt., 10c

802. WHITE RICE—A very fine variety. Kernels long pointed like rice. Very prolific and fine for popping. Pops larger than Baby Rice. Postpaid, lb., 30c; pkt., 10c

ARKANSAS SEED & NURSERY CO.

FAYETTEVILLE - ARKANSAS

THE NON SACCHARINE SORGHUMS

For dry land and poor land no grain and forage crop produces heavier yields than do the non-saccharine sorghums listed below—Feterita, milo maize, and Kaffir corn. These crops succeed in the driest seasons when ordinary corn fails completely. In weight of grain, these crops will yield even more per acre than ordinary corn on the same land. And in the way of dry forage they are all heavy producers of a very palatable forage that is relished by livestock. They are cultivated in the same way as ordinary corn and will grow on the same kind of land, or even on land too poor and too dry for corn. With all of the non-saccharine sorghums, the stalks should be cut and shocked to cure as soon as the grain has begun to glaze. The curing of the forage should be thorough, and the hay perfectly dry before it is stacked. This will avoid the souring that is otherwise liable to occur. The seed from these sorghums is threshed in an ordinary thresher from which all but one row of concave teeth have been removed. For dry lands in the Southwest, these non-saccharine sorghums are the most valuable of forage crops. If you have never grown them, try some of them this year. If you grow them regularly, let us quote you a price on the seed you will need this season.

Kaffir

FETERITA

Write for Quantity Prices

819-A. This grand forage crop came to this country from Egypt. In many ways it is similar to Kaffir, but grows a little taller and produces larger heads. The two best features about Feterita are its wonderful ability to produce a crop in the driest kind of weather, and the earliness of its maturity. It will mature a month earlier than Kaffir.

Chinch bugs do not bother Feterita. The grain of Feterita is similar to that of Milo but is pure white, larger and softer. It is planted in rows like Kaffir and Milo, requiring about 8 to 10 pounds to plant an acre, or in very dry localities, perhaps only half this quantity; cultivation is the same as for Kaffir.

20¢
1 lb., postpaid

Milo Maize

MILO MAIZE

Write for Quantity Prices

818. Milo Maize is a heavy cropper and splendid drought resister and one of the surest grain crops for the dry lands of the Southwest. It is planted and handled in the same way as Kaffir, but as it has a softer grain it should not be planted so early. Milo makes an excellent feed for all poultry and livestock.

1 lb., postpaid

20¢

FORAGE SORGHUM

Write for Quantity Prices

823. BLACK AMBER—One of the most valuable for ensilage, and is practically sourless when stacked out of doors, and usually can be fed as late as the middle of May following the harvest without deterioration in any respect. We can also recommend it for forage.

1 lb. postpaid

15¢

824. EARLY ORANGE—Later than the Amber, the stalks shorter and heavier. For forage or ensilage it is first class. One of the heaviest producers of the entire Sorghum family. 1 lb., postpaid

15¢

KAFFIR CORN

819. WHITE—As a fodder and grain crop Kaffir Corn is one of the best, particularly in dry seasons, or for the dry sections of the Southwest. In dry locations, Kaffir Corn is a much better crop producer than ordinary corn, turning off a better crop of grain, and producing a fodder that is greatly relished by livestock. Where Kaffir is to be grown for its grain, it should be sown in rows and cultivated like corn, but where it is to be used as a forage, it is sown broadcast, usually at the rate of 75 to 100 pounds to an acre. Kaffir Corn is an excellent grain for poultry, and chicken farmers would do well to grow a sufficient amount of it for that purpose. The grain is much relished by all live-

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

Seed Corn for the Southwest

Don't Fail to Ask for Our Prices on Seed Corn in Lots of 1 Bushel or More
We Are Seed Corn Headquarters for the Southwest and Can Save You Money on Seed Corn
Quotations on Seed Corn Are F. O. B. Fayetteville

Every corn grower knows that seed corn "wears out" and consequently buys the best seed corn he can buy. We cannot understand why so much inferior corn is planted—good seed corn only costs a few cents more per acre and the increase in the crop pays the extra cost many, many times. Plant our carefully selected and tested seed corn.

827. ST. CHARLES WHITE—Known throughout the South as a standard large red cob corn. A big yielder and especially adapted to bottom land. The stalks are tall and large-growing, bearing from 1 to 2 large ears—12 to 14 inches long. It has been known to yield as high as 85 bushels to the acre. The seed we offer you this year was grown on our own farms in 1924 along the White River in Washington County, Arkansas, where this variety of corn grows to perfection. 120 days. Peck. \$1.00

828. STRAWBERRY—A good reliable variety, extra large ear. Grains red and white striped; withstands drought excellently and a heavy yielder. We grew a pure strain of this variety on our seed farms in 1924 and can offer a very high grade of seed. 120 days. Peck. \$1.00

829. IOWA SILVER MINE—Ninety-Day corn. Stalks grow to a height of 7 to 8 feet and set the ears about $3\frac{1}{2}$ feet from the ground. It has not a large growth of fodder, having been bred essentially for grain, though it has plenty of blades to support the growth and is as well rooted as any corn grown. The ears measure from 10 to 12 inches in length and weigh over $1\frac{1}{2}$ pounds. They are uniform in size and shape with 16 to 20 rows of deep, pure white kernels on small white cob. It is ready for market earlier than any white corn grown. Seventy pounds of this corn in the ear will make 62 pounds shelled. 90 to 100 days. Peck. 90¢

830. HICKORY KING—An entirely distinct variety of white corn, combining the largest grain with the smallest cob. A single grain will completely cover the cob of an ear broken in half. A great yielder, giving more shelled corn to the acre bulk of ears than any other variety. It is satisfied with any kind of soil and will produce good strong stalks bearing two and occasionally three good ears. A good drouth resister. We recommend it very highly. 90 to 100 days. Peck. \$1.35

831. REID'S YELLOW DENT—Thoroughbred, pedigree, carefully selected stock. During the past 5 or 6 years this variety has come rapidly to the front and now occupies a prominent position in all lists. It is of handsome shape and color and largely grown for exhibiting at fairs, corn shows and is used by many corn schools as a standard for judging, and is too well known to require lengthy description. We have selected the choicest ears so that we are sure our seed cannot fail to please the most particular. It is of handsome yellow color, smooth, deeply grained and the kernels are packed very closely on the cob, thus giving it an appearance of great solidity. Matures in about 115 days. Peck. \$1.00

832. GOLDEN BEAUTY—One of the most popular varieties of yellow corn. The grains are not deep but well shaped; extra long ear. A corn containing a high percentage of protein; matures early; well filled at both butt and tip. Next to June Corn and Hickory King, possibly the best drouth resist. Peck. \$1.25

833-A. BLOODY BUTCHER—Makes a large ear, and is a great yielder of both grain and fodder, and we believe one of the best drouth-resisting corns. Makes in about 100 days. Peck. 90¢

Spray Pumps for every Need

Sprayers for Whitewashing, Disinfecting and General Spraying Purposes

Whitewash your barn, fences, outbuildings with a sprayer. They will look better, and the work is easily, quickly and cheaply done when you spray the whitewash on. Sprayed whitewash sticks and it fills the cracks, making a smooth, even coat.

Disinfect your poultry house every week or two with a sprayer. The poultry will thrive better, produce more eggs, gain in weight and be more profitable. It is easy to spray any of the common disinfectants, and much more effective than when the material is applied with a brush.

You can keep down the fleas and lice on hogs, hog buildings and barns by spraying with suitable materials. Easily and cheaply done, and thoroughly disinfects at the same time. Nothing like it when cholera is prevalent.

All fruit trees and garden crops need to be sprayed, and here are some of the best sprayers made for orchard and garden use. If you have no sprayer, send for one of these outfits today. It will make more money for you, in crops saved, than any similar investment you can find.

We carry the following sprayers in stock and can ship any of them from either our warehouse, or from the factory at Ashland, Ohio:

Tanglefoot

Just the thing to put on the trunks of trees to keep bugs and ants away from the tops. **TREE TANGLEFOOT** will effectually protect shade and fruit trees from most of our destructive insect pests. Particularly recommended against Canker Worms, Brown-Tail Moths, Tussock Moths, Gypsy Moths, Climbing Cut Worms, Ants and Woolly Aphis. One application stays sticky three months or longer (ten to twenty times as long as any other effective banding compound). One pound makes about ten linear feet of band. It will not soften, run or melt, yet is always elastic, expanding with growth of tree.

FOR TREE SURGERY—Superior to anything on the market for painting wounds. It is the best application after pruning or trimming. It will waterproof crotch, cavity or wound when nothing else will.

Price, F. O. B. Dallas: 25-lb. wooden pails, \$9.75; 20-lb. cans, \$8.00; 10-lb. cans, \$4.25; 5-lb. cans, \$2.25; 1-lb. cans,

FARMOGERM

A Seed
Inoculant That
Increases Crop Production

Seeds of all legumes—beans, peas, clover, alfalfa and related crops—will yield far better if inoculated with Farmogerm, and in addition leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops. Gardeners and farmers who have used **FARMOGERM** would not be without it. **FARMOGERM** stays good indefinitely and always has its full strength. Just add water and shake the bottle and sprinkle over the seeds as directed. Your crop will benefit beyond your expectations.

FARMOGERM is economical. The one-acre size bottle of **FARMOGERM** is sufficient for 15 pounds of clover, 20 pounds of alfalfa, 40 pounds of vetch, etc. When ordering, be sure to state what crop you wish to inoculate. New scientific methods of manufacture have given lower prices. You cannot now afford to do without **FARMOGERM**.

A special composite culture is prepared for peas, beans and sweet peas— $\frac{1}{4}$ -acre size only. You'll get more peas and beans, and larger sweet peas by using this. Ask for No. 5. Price, 50¢. **FARMOGERM** prices are: 12-acre size, \$8.00; 3-acre size, \$2.50; 1-acre size, postpaid

\$1.00

Full directions accompany each bottle.

Broadcast Seeder

Here is just the thing that you need for broadcasting grain and grass seed on small patches of ground, or on rough land that you cannot get onto with a grain drill. You will more than save the cost of it on seeding a very few acres of ground, and have the seed more evenly scattered than if broadcasted by hand. The strong shoulder strap allows the seeder to be

carried with ease, and in just the right position for operation. Full directions for use accompany each machine. Include one of these seeders with your order for grain or grass seed.

\$2.25

I thank you very, very much for the seeds and Cabbage plants you sent me. I received them the 27th day of March and was over-satisfied with them. If I need more seeds I will always order from you.—DAVE LOMBAD, Wilburton, Oklahoma.

I received my order for 20 Apple trees and 12 Peach trees and will say they reached me in good condition. I have them set out and they look fine.—W. B. HIGGINS, Butler, Oklahoma.

STIM-U-PLANT

An All-the-Year Fertilizer for Garden and House Plants

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilizer for this purpose is Stim-U-plant, an odorless, highly concentrated plant-food, in tablet form, with guaranteed chemical analysis of 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash. The proportions are accurate, there is no unnecessary filler (and in this form you are able to apply plant-food exactly when and where and as needed. Order Stim-U-plant tablets with your seed and plant order. Price, 1,000 tablets for \$3.50; 100 for 75¢; 80 for 25¢;

By express only at buyer's expense. 90¢

HARDY TREES, PLANTS AND SEEDS FROM THE HEART OF THE OZARKS

TERMS

ORDER NOW

Send your order early, just as long ahead of planting time as possible. This avoids the last minute rush, allows a better selection of stock for you. Look through the catalog, make your selections and send your order today.

OUR TERMS

Our prices are low as we sell for cash with order only. In the case of large orders for nursery stock an exception is made to customers who have a satisfactory bank rating, and who send a deposit with their order amounting to one-fourth of the total.

TRANSPORTATION

All orders amounting to \$10 or more are sent Transportation Prepaid, except field seeds, and as otherwise noted. Orders for less than \$10, when you want the shipment prepaid, must be accompanied by 10c for each dollar's worth, to pay the transportation. Field seeds in quantity more than one pound are not prepaid, unless arranged for. Free goods given with purchases of certain amounts, apply only where order is made up from regular catalog prices and not to special collections where catalog prices are greatly reduced.

COMPLAINTS

If there is anything wrong with your order when it arrives, please write us about it immediately, and satisfactory adjustment will be made. Remember we guarantee satisfaction or will refund money. Plants are living things, and through unfavorable climatic conditions, insects, fungi or neglect, they may fail to live after being planted. This makes it impossible to guarantee the trees or plants to grow. We guarantee safe arrival, and stock to be in good living condition and true to name.

TREES TRIMMED FOR PLANTING

One of the commonest causes for trees not doing well after they are planted is because they were not suitably pruned beforehand. We prune all of our trees—tops and roots—in the most scientific manner before they are packed for shipment. This assures you of receiving your trees trimmed just right for planting, and ready to put right in the ground.

NON-WARRANTY

The Arkansas Seed & Nursery Company gives no warranty expressed or implied as to description, quality or productiveness of any plants, bulbs, seeds, or any other matter that we send out; and will not in any way be responsible for the crop. If the stock is not accepted on these terms they must be returned at once and your money will be refunded. This is because of soil and climatic conditions, the method of planting and handling the crop, and other conditions over which we have no control.

HOW TO ORDER—IT'S EASY

Use the order blank. Write your name and address plainly. Be sure to state how you prefer to have your stock shipped—mail, express or freight. Mark the quantity of each variety and write in the name of the variety, or use the catalog number. Carry out the prices correctly, total the amount, attach your check or money order and it is ready to mail.

SPECIAL QUOTATIONS

We are always glad to make special quotations by letter on large quantities of any variety not priced in this catalog. Write to us about the varieties, sizes and quantities you want and get our estimates. We are always glad to make especially low prices on large commercial orchards.

Four Grand New Fruits

**Cynthiana Grape, Dwarf Juneberry
Progressive Everbearing Strawberry
Arkansas Beauty Peach**

Here are four wonderful Fruits that will give you a genuine surprise in the way of bountiful crops, delicious quality and magnificent opportunity for growing them in a big way. Each fruit is a gem in its class. Each one is deserving of extensive cultivation. Each one is superb for home use, to eat out of the hand or for culinary purposes.

115-A. **CYNTHIANA GRAPE**—This is a real wonder grape because of the great tonic value which it possesses. Its juice is extremely rich in iron and health-giving acids. The bunches are of large size, the berries small, jet black and overspread with a delicate blue bloom, and possessed of a very heavy, rich dark red juice. For juice making purposes it has no superior and when its superior merits for this purpose become better known, it is sure to be one of the most important juice grapes of commerce. Be one of the first in your locality to grow this grand juice grape.

157. **IMPROVED DWARF JUNEBERRY**—This native of the Ozarks produces most delicious fruits; excellent for eating out of the hand, splendid for pies and superb for jams or canning. In size, color and flavor, the berries have a close resemblance to the Northern huckleberry. The bush becomes two to three feet tall at maturity, and when in bloom, it vies in beauty with any of the spireas, as its twigs are planked with large, white blossoms. This excellent fruit has wonderful possibilities in a commercial way, and we are sure you will be delighted with it if you will give it a trial.

66. **PROGRESSIVE EVERBEARING STRAWBERRY**—The grandest of the everbearers. Fruits of large size, and shapely; very dark red in color, and of most exquisite flavor. Plants set this spring will bear this summer and continue right on through the season until stopped by cold weather. From this glorious variety you can pick fresh strawberries from your own plants for your Thanksgiving or Christmas dinner. Next spring you can begin picking berries from it as soon as from ordinary kinds and keep right on until fall. Progressive is an ideal strawberry for the home garden and is making friends by the thousands.

45. **ARKANSAS BEAUTY PEACH**—This magnificient peach is all that its name implies. It is a beauty in appearance. Its skin is a dainty whitish pink, overspread with a beautiful blush on the sunny side. Its flesh is white and of a most exquisite, honied flavor, sweet and delicious. It is a perfect freestone and ripens in the early part of the summer just when highly flavored peaches are most appreciated. This is one of the finest of all peaches for the home orchard and is a variety that you are certain to prize very highly when you get acquainted with its many merits.

Just to let you get acquainted with the excellence of these grand fruits, we will send to you, Postpaid, 1 Cynthiana Grape vine, 1 Imp. Dwarf Juneberry bush, 1 Arkansas Beauty peach tree and 25 Progressive Everbearing Strawberry plants for only
